TO MY MOTHER

## PREFACE

This textbook is intended primarily for students who are beginning the study of the Greek Testament either without any previous acquaintance with the Greek language or with an acquaintance so imperfect that a renewed course of elementary instruction is noeded. Owing to the exigencies of the present educational situation, many who desire to use the Greek Testament are unable to approach the subject through a study of classical Attic prose. The situation is undoubtedly to be regretted, but its existence should not be ignored. It is unfortunate that so many students of the New Testament have no acquaintance with classical Greek, but it would be still more unfortunate if such students, on account of their lack of acquaintance with classical Greek, should be discouraged from making themselves acquainted at least with the easier language of the New Testament.

The New Testament usage will here be presented without any reference to Attic prose. But a previoue acquaintance with Attic prose, even though it be only a smattering, will prove to be an immense assistance in the mastery of the course. By students who possess such acquaintance the lessons can be covered much more rapidly than by mere beginners.

The book is an instruction book, and not a descriptive grammar. Since it is an instruction book, everything in it is made subservient to the imparting of a reading acquaintance with the language. In a descriptive grammar, for example, the rules may be formulated with a lapidary succinctness which would here be out of place. The effort is made here to eater upon those explanations which the fifteen years' experience of the author in teaching New Testament Greek has shown to be essential. In a descrip-
tive grammar, moreover, the illustrations would have to be limited to what can actually be found in the New Testament, but in the present book they are reduced so far as possible to an ideally simple form, which does not always appear in the New Testament books. In this way the vocabulary at every point ean be confined to what the student has actually studied, and confusing footnotes can be avoided. It is highly important that only one grammatical point should be considered at a time. An introduction of illustrations taken from the New Testament would often so overlay the explanation with new words and with subsidiary usages unfamiliar to the student that the specific grammatical point under discussion would be altogether obscured. Of course, however, the effort has been made not to introduce into the illustrations any usages except those which are common in the New Testament idiom.

The character of the book as an instruction book bas also determined the choice and order of the material. The treatment has been limited to a few essential points, and no attempt has been made to exhibit the real richness and flexibility of the New Testament language, which can be discovered only through reading. This limitation may in places give rise to criticism, as for example in connection with the treatment of participles. The author is well aware of the fundamentally non-temporal character of the tenses in the participle, and also of the great variety in the shades of thought which the participle can express. But after all it is highly important for the beginner to understand clearly the distinction between the present and the aorist participle, and that distinction can be made clear at the beginning only through the proper use of our temporal mode of thought. Only when what is simple and usual has been firmly impressed upon the student's mind by patient repetition can the finer and more diffeult points be safely touched.

The treatment of the participle, moreover, has been thrust as far forward as possible in the book, in order that ample time may be allowed for practising the usages which it involves. Experience shows that in learaing to read New Testament Greek, the participle is almost the crux of the whole matter.
Special attention has been given to the exercises. Until the very last few lessons (and then only in the GreekEnglish exercises) the sentences have not for the most part been taken from the New Testament, since the book is intended as an instruction book in Greek and not as a stimulus to memory of the English Bible. At a later stage in the study of New Testament Greek, the student's memory of the English Bible is not an unmixed evil, for repeated reading of already familiar passages will often ix the meaning of a word in the mind far better than it could ever be fixed by the mere learning of a vocabulary. But in the early stages, such assistance will do far more harm than good. In the exercises, the effort has been made to exhibit definitely the forms and grammatical usages which have just been discussed in the same lesson, and also to keep constantly before the mind, in ever new relationships, the most important usages that have been discussed before.

The vocabularies have been limited to words which are very common in the New Testament or which require special explanation. Everywhere the effort has been made to introduce the words in the illustrations and exercises. The learning of lists of words, unless the words so learned are actually used, is a waste of time.
The author desires to express appreciation of the pioneer work which has been done in this country by Professor John Homer Huddilston, Ph.D., in his Essentials of New Testament Greek, First Edition, 1895, and also of the larger English book of Rev. H. P. V. Nunn, M.A., entitled The

Elements of New Testament Greek, First Edition, 1913. The two books by John Williams White, The Beginner's Greek Book, 1895, and The First Greeti Book, 1896, have also been consulted with profit, especially as regards the form of presentation. Among reference works, the new grammar of J. H. Moulton, A Grammar of New Testament Greek, edited by Wilbert Francis Howard, especially Part ii of Vol. II, on Accidence, 1920, and the work by E. D. Burton on Moods and Tenses in New Testament Greek, 1906, have been found particularly useful. Acknowledgment is also to be made to Blass-Debrunner, Grammatik des neutestamentlichen Griechisch, 1913, and to the convenient summary of classical usage in Goodwin's Greek Grammar. And both the Greek-English Lexicon of the New Testament of Grimm-Thayer and Moulton and Geden's Concordance to the Greek Testament have been found absolutely indispensable throughout. The advanced student will find much useful material in the large work of A. T. Robertson, $A$ Grammar of the Greek New Testament in the Light of Bistorical Research, 1914.

- The author is deeply grateful to Professor Edward Capps, Ph.D., LL.D., of Princeton University, who, in the most gracious possible way, has examined the proof of the book throughout, and (of course without becoming at all responsible for any faults or errors) has rendered invaluable assistance at many points. Much encouragement and help have also been received from the wise counsel and unfailing kindness of the Rev. Professor William Park Armstrong, D.D., of Princeton Theological Seminary.

## TABLE OF CONTENTS

LEBBON Page
Introduction ..... 1
I. The Alphabet ..... 9
II. Accent ..... 13
III. Present Active Indicative ..... 20
IV. The Second Declension. Order of Words. Movable $\nu$. ..... 23
V. The First Declension ..... 29
VI. The Article. Adjectives of the Firat and Second De- clension. Agreement. Use of the Artiele. At- tributive and Predicate Positions of Adjectives. Substantive Use of Adjectives ..... 38
VII. Masculime Nouns of the First Declengion. Preposi- tions ..... 38
VIII. Enclitics. Personal Pronouns. Present Indicative of $\epsilon i \mu i$ ..... 44
IX. Demonstrative Pronouns. Further Uses of aútbs... ..... 52
X. Present Middle and Passive Indieative, ütb with the Genitive. The Dative of Means. Deponent Verbs. Compound Verbs. The Position of ou'. Various Cases with Verbs ..... 57
XI. Imperfect Active Indicative. Imperfect Indicative of $\epsilon l \mu L^{\prime}$. Accent of $\neq \sigma \tau L(\nu)$ ..... 64
XII. Imperfect Middle and Passive Indicative. Singular Verb with Neuter Plural Subject. Uses of kaí and oúdé ..... 68
XIII. Future Active and Middle Indicative ..... 74
XIV. First Aorist Active and Middle Indicative. Con- structions with $\pi \iota \sigma \tau \epsilon \dot{U} \omega$. ..... 81
$\cdot X V$. Second Aorist Active and Middle Indicative ..... 87
XVI. Aorist Passive Indicative. Future Passive Indicative ..... 92
XVII. The Third Declension ..... 97
XVIII. Present Participles. Use of Participles ..... 102
XIX. Aorist Participles Active and Middle. Use of Parti- ciples (continued). The Negatives ou' and $\mu \dot{\eta}$ ..... 113
XX. Aorist Passive Participle. Genitive Absolute ..... 121
XXI. The Subjunctive Mood ..... 128
XXII. The Present and Aorist Infinitives. The Articular In- finitive. Indireat Discourse. Proper Names ..... 136
IDgson ..... PAGE
XXIII. Contract Verbs ..... 143
XXIV. Fhrure and First Aorist Active and Middle of Liquid Verbs ..... 150
XXV. More Nouns of the Third Declension. Adjectives of the Third Declension in $-\eta s,-\epsilon s$ ..... 157
XXVI. Declension of $\pi a \hat{s}$, $\pi 0 \lambda \dot{s}, ~ \in \hat{s}$, and Numerals. Attributive and Substantive Uses of Prepositional Phrases and of the Genitive. Accusative of Extent of Time and Space ..... 163
XXVII. Interrogative, Indefinite and Relative Pronouns. De- liberative Questions. Conditional Relative Clauses ..... 170
XXVIII. The Imperative Mood ..... 177
XXIX. The Perfect Tense. Review of $\lambda \dot{u} \omega$ ..... 183
XXX. Comparison of Adjectives. Declension of $\mu$ ei $\zeta \omega \nu$. Genitive of Comparison and Use of $\eta_{n}$. Adverbs. Genitive with Adverbs of Place. Genitive of Time, Genitive of the Articular Infinitive Expressing Purpose. Dative of Respect. Accusative of Speci- fioation. Dative of Time. Possessive Adjectives. $\mu \dot{\eta}$ Used es a Conjunetion. tva with the Sub- junctive in Various Uses. $\mu \eta^{\prime}$ with the Indicative in Questions Expecting a Negative Answer. ..... 192
XXXI. Conjugation of $\delta i \delta \omega \mu L$. Second Aorist of $\gamma i \nu \dot{\omega} \sigma \kappa \omega \omega$. XXXIII. Conjugation of lor $\eta \mu \mathrm{L}$ and oida. The Optative Mood. Conditions Contrary to Fact. Uses of خivouat ..... 216
Paradigms. ..... 223
Vocabularies. ..... 253
Inder ..... 279

## INTRODUCTION

During the classical period, the Greek language was divided into a number of dialects, of which there were three great families-the Doric, the Aeolic, and the Ionic. In the fifth century before Christ, one branch of the Ionic family, the Attic, attained the supremacy, especially as the language of prose literature. The Attic dialect was the language of Athens in her glory-the language of Thucydides, of Plato, of Demosthenes, and of most of the other great prose writers of Greece.

Various causes contributed to make the Attic dialect dominant in the Greek-speaking world. First and foremost must be put the genius of the Athenian writers. But the political and commercial importance of Athens was also not without its effect. Hosts of strangers came into contact with Athens through government, war and trade, and the Athenian colonies also extended the infuence of the mother city. The Athenian Empire, indeed, soon fell to pieces. Athens was conquered first by Sparta in the Peloponnesian war, and then, in the middle of the fourth century before Christ, along with the other Greek cities, came under the domination of the king of Macedonia, Philip. But the influence of the Attic dialect survived the loss of political power; the language of Athens became also the language of her conquerors.
Macedonia was not originally a Greek kingdom, but it adopted the dominant civilization of the day, which was the civilization of Athens. The tutor of Philip's son, Alexander the Great, was Aristotle, the Greek philosopher; and that fact is only one indication of the conditions of the time. With astonishing rapidity Alexander made himself master of the whole eastern world, and the triumphs of the Mace-
donian arms were also triumphs of the Greek language in its Attic form. The empire of Alexander, indeed, at once fell to pieces after his death in 323 B.C.; but the kingdoms into which it was divided were, at least so far as the court and the governing classes were concerned, Greek kingdoms. Thus the Macedonian conquest meant nothing less than the Hellenization of the Eart, or at any rate it meant an enormous acceleration of the Hellenizing process which had already begun.

When the Romans, in the last two centuries before Christ, conquered the eastern part of the Mediterranean world, they made no attempt to suppress the Greek language. On the contrary, the conquerors to a very considerable extent were conquered by those whom they conquered. Rome herself had already come under Greek influence, and now she made use of the Greek language in administering at least the eastern part of her vast empire. The language of the Roman Empire was not so much Latin as it was Greek.

Thus in the first century after Christ Greek had pecome a world language. The ancient languages of the various countries did indeed continue to exist, and many districts were bilingual-the original local languages existing side by side with the Greek. But at least in the great cities throughout the Empire-certainly in the East-the Greek language was everywhere understood. Even in Rome itself there was a large Greek-speaking population. It is not surprising that Paul's letter to the Roman Church is written not in Latin but in Greek.

But the Greek language had to pay a price for this enormous extension of its influence. In its career of conquest it experienced important changes. The ancient Greek dialects other than Attic, although they disappeared almost completely before the beginning of the Christian era, may
have exerted considerable influence upon the Greek of the new unified world. Less important, no doubt, than the influence of the Greek dialects, and far less important than might have been expected, was the influence of foreign languages. But influences of a more subtle and less tangible kind were mightily at work. Language is a reflection of the intellectual and spiritual habits of the people who use it. Attic prose, for example, reflects the spiritual life of a small city-state, which was unified by an intense patriotism and a glorious literary tradition. But after the time of Alexander, the Attic speech was no longer the language of a small group of citizens living in the closest spiritual association; on the contrary it had become the medium of exchange for peoples of the most diverse character. It is not surprising, then, that the language of the new cosmopolitan age was very different from the original Attic dialect upon which it was founded.

This new world langusge which prevailed after Alexander has been cailed not inappropriately "the Koine." The word "Koine" means "common"; it is not a bad designation, therefore, for a language which was a common medium of exchange for diverse peoples. The Koiné, then, is the Greek world language that prevailed from about 300 B.C. to the close of ancient history at about A.D. 500.

The New Testament was written within this Koine period. Linguistically considered, it is united in a very close way with the Greek translation of the Old Testament called the "Septuagint," which was made at Alexandria in the centuries just preceding the Christian era, and with certain Christian writings of the early part of the second century after Christ, which are ordinarily associated under the name "Apostolic Fathers." Within this triple group, it is true, the language of the New Testament is easily supreme. But ao far as the bare instrument of expression
is concerned the writings of the group belong together. Where, then, within the development of the Koine is this whole group to be placed?

It has always been observed that the language of the New Testament differs strikingly from the great Attic prose writers such as Thucydides or Plato or Demosthenes. That fact is not surprising. It can easily be explained by the lapse of centuries and by the important changes which the creation of the new cosmopolitanism involved. But another fact is more surprising. It is discovered, namely, that the language of the New Testament differs not merely from that of the Attic prose writers of four centuries before, but also from that of the Greek writers of the very period within which the New Testament was written. The Greek of the New Testament is very different, for example, from the Greek of Plutarch.

This difference used sometimes to be explained by the hypothesis that the New Testament was written in a Jew-ish-Greek dialect-a form of Greek very strongly influenced by the Semitic languages, Hebrew and Aramaic. But in recent years another explanation has been coming increasingly into vogue. This other explanation has been given an important impetis by the discovery, in Egypt, of the "nonliterary papyri." For the most part the Koine had until recently been known to seholars almost exclusively through literature. But within the past twenty or thirty years there have been discovered in Egypt, where the dry air has preserved even the fragile writing-material of antiquity, great numbers of documents such as wills, receipts, petitions and private letters. These documents are not "literature." Many of them were intended merely to be read once and then thrown away. They exhibit, therefore, not the polished language of books but the actual spoken language of everyday life. And on account of their important
divergence from the language of such writers as Plutarch they have revealed with new clearness the interesting fact that in the Koine period there was a wide gap between the language of literature and the language of every day. The literary men of the period imitated the great Attic models with more or less exactitude; they maintained an artificial literary tradition. The obscure writers of the non-literary papyri, on the other hand, imitated nothing, but simply expressed themselves, without affectation, in the language of the street.

But it is discovered that the language of the New Testament, at various points where it differs from the literature even of the Koine period, agrees with the non-literary pam pyri. That discovery has suggested a new hypothesis to account for the apparent peculiarity of the language of the New Testament. It is now supposed that the impression of peculiarity which has been made upon the minds of modern readers by New Testament Greek is due merely to the fact that until recently our knowledge of the spoken as distinguished from the literary language of the Koine period has been so limited. In reality, it is said, the New Testament is written simply in the popular form of the Koine which was spoken in the cities throughout the whole of the Greek-speaking world.
This hypothesis undoubtedly contains a large element of truth. Undoubtedly the language of the New Testament is no artificial language of books, and no Jewish-Greek jargon, but the natural, living language of the period. But the Semitic influence should not be underestimated. The New Testament writers were nearly all Jews, and all of them were strongly influenced by the Old Testament. In particular, they were influenced, so far as language is concerned, by the Septuagint, and the Septuagint was influenced, as most ancient translations were, by the language of
the original. The Septuagint had gone far toward producing a Greek vocabulary to express the deepest things of the religion of Israel. And this vocabulary wes profoundly influential in the New Testament. Moreover, the originality of the New Testament writers should not be ignored. They had come under the influence of new convictions of a transforming kind, and those new convictions had their effect in the sphere of language. Common words had to be given new and loftier meanings, and common men were lifted to $e$ higher realm by a new and glorious experience. It is not surprising, then, that despite linguistic similarities in detail the New Testament books, even in form, are vastly different from the letters that have been discovered in Egypt. The New Testament writers have used the common, living language of the day. But they have used it in the expression of uncommon thoughts, and the language itself, in the process, has been to some extent transformed. The Epistle to the Hebrews shows that even conscious art could be made the instrument of profound sincerity, and the letters of Paul, even the shortest and simplest of them, are no mere private jottings intended to be thrown away, like the letters that have been discovered upon the rubbish heaps of Egypt, but letters addressed by an apostle to the Church of God. The cosmopolitan popular language of the Graeco-Roman world served its purpose in history well. It broke down racial and linguistic barriers. And at one point in its life it became sublime.

## LESSONS

# NEW TESTAMENT GREEK <br> LESSON I 

The Alphabet

1. The Greek alphabet is as follows:

| Capital Lettera | Small | Name | Pronunciation |
| :---: | :---: | :---: | :---: |
| A | $a$ | Alpha | a as in father |
| B | $\beta$ | Beta | b |
| $\boldsymbol{r}$ | $\boldsymbol{\gamma}$ | Gamma | g as in got ${ }^{\text {d }}$ |
| $\Delta$ | $\delta$ | Delta | d |
| E | $\epsilon$ | Epsilon | e as in get |
| Z | 5 | Zeta | dz |
| H | $\eta$ | Eta | a as in late |
| $\theta$ | $\theta$ | Theta | th |
| I | $\downarrow$ | Iota | i as in pit, ee as in feet |
| K | $k$ | Kappa | k |
| $\Delta$ | $\lambda$ | Lambds. | 1 |
| M | $\mu$ | Mu | m |
| N | p | Nu | n |
| 家 | $\xi$ | Xi | x |
| 0 | - | Omicran | o as in obey |
| II | $\pi$ | Pi | p |
| P | $p^{2}$ | Rho | r |
| $\Sigma$ | $\sigma(s)^{3}$ | Sigma | $s$ |
| T | $\tau$ | Tau | t |
| T | $v$ | Upsilon | French u or German ti |
| $\underline{\Phi}$ | ¢ | Phi | ph |
| X | $\boldsymbol{\chi}$ | Chi | German ch in Ach |
| $\Psi$ | $\psi$ | Psi | ps |
| $\Omega$ | $\omega$ | Omega | 0 as in note |

${ }^{1}$ Before another $\gamma$ or $\kappa$ or $\chi, \gamma$ is pronounced like ng.
${ }^{2}$ At the beginning of a word $\rho$ is written $\dot{\rho}$, rh.
is is written at the end of a word, elaewhere $\sigma$.
2. The student is advised to learn the small letters thoroughly, in connection with the first lesson, leaving the capital letters to be picked up later, as they occur. It should be observed that sentences are begun with small letters, not with capitals. Before the formation of the letters is practised, guidance should be obtained from the teacher, since it is impracticable to copy exactly the printed form of the letters, and since bad habits of penmanship ought by all means to be avoided. For example, $\beta$ and $\rho$ should be formed without lifting the pen and by beginning at the bottom. In these matters the help of a teacher is indispensable.
3. The Greek vowels are as follows:

| Short | Long |
| :---: | :---: |
| $a$ | $a$ |
| $E$ | 7 |
| 0 | $\omega$ |
| $b$ | 6 |
| $v$ | $\nu$ |

It will be noted that $a, a$, and $u$ can be either long or short. The long $a$ and $v$ are pronounced very much like the corresponding short letters, except that the sound is held longer; the short $\iota$ is pronounced like in in pit and the long 4 like ee in feet.
$\epsilon$ is always short, and $\eta$ is the long of it; o is always short, and $\omega$ is the long of it. This clear distinction in appearance between the long and short e and o makes the matter of quantity very much easier in Greek than it is in Latin.

1 and $v$ are called close vowels; and the others open vowels.
4. A diphthong is a combination of two vowels in a single syllable. The second letter of a diphthong is always
a close vowel. The first letter is always an open vowel except in the case of $u$. The common diphthongs are as follows:
al, pronounced like ai in aisle
$\epsilon \ell$, pronounced like $\bar{a}$ in fate (thus $\epsilon$ and $\eta$ are pronounced alike)
ol, pronounced like oi in oil
$a v$, pronounced like ow in cow
$\epsilon v$, pronounced like eu in feud
ov, pronounced like oo in food
us, pronounced like uee in queen
The diphthongs $\eta v$ and $\omega v$ (pronounced by drawing the sounds of each letter closely together) are rare. When 4 unites with long a, $\eta$ or $\omega$ to form one sound, the $\iota$ is written under the other letter instead of after it, and is called iota subscript. Thus $a, \eta, \ddagger$. This iota subscript has no effect whatever upon the pronunciation; $q$ being pronounced like long $a, \eta$ like $\eta, \varphi$ like $\omega$.
5. A vowel or diphthong at the beginning of a word always has a breathing. The breathing stands over a vowel; and in the case of a diphthong it stands over the second of the two component vowels.

The rough breathing (') indicates that an $h$-sound is to be pronounced before the initial vowel or diphthong; the smooth breathing (') indicates that no such h-sound is to be pronounced. Thus $\varepsilon y$ is to be pronounced en, and $\varepsilon \nu$ is to be pronounced hen; ou is to be pronounced oo, and ovi is to be pronounced hoo.
6. There are three accents, the aoute ('), the circumflex ( ${ }^{\circ}$ ), and the grave ('). These accents, like the breathings, stand over a vowel, and, in the case of a diphthong, over the second of the two component vowels. When a breathing and an accent stand over the same vowel, the breathing
comes first, except in the case of the circumflex accent, which stands over the breathing. Thus oikov, otkos. The use of the accents will be studied in Lesson II. Here it should simply be observed that the stress in pronunciation is to be placed on the syllable that has any one of the accents.
7.

## Punctuation

There are four marks of punctuation: the comma (,) and the period (.), both written on the line and corresponding to the comma and the period in English; the colon, which is a dot above the line ( $\cdot$ ), and takes the place of the English colon and semicolon; and the questionmark (;) which looks like an English semicolon.

## 8.

## Exercise

After learning to write the small letters of the alphabet and give the names of the letters in order, the student should practise pronouncing Greek words and sentences found anywhere in the book. Throughout the entire study, great care should be devoted to pronunciation, and the Greek sentences should always be read aloud both in the preparation of the lessons and in the work of the classroom. In this way the language will be learned not only by the eye, but also by the ear, and will be fixed much more firmly in the memory. The student should try to read the Greek sentences with expression, thinking of the meaning as he reads.

## LESSON II

Accent
9. The Greek accents indicated in ancient times not stress (what we call accent), but musical pitch. But since it is impossible for us to reproduce the original pronunciation, the best we can do is to place the stress of the voice upon the syllable where the accent occurs, and give up any distinction in pronunciation between the acute, the circumflex and the grave. Having adopted this method of pronunciation, we should adhere to it rigidly; for unless some one method is adhered to, the language can never be fixed in the memory. It is also important to learn to write the accents correctly, since the accents serve to distinguish various forms from one another and are therefore a great help and not a hindrance in the learning of the language.

## 10. Preliminary Definitions

The last syllable of a word is colled the ultima; the one before that, the penult; and the one before that, the antepenult.
Thus, in the word $\lambda a \mu \beta \dot{\alpha} \nu o \mu \in \nu$, the ultime is $-\mu \in \nu$, the penult is $-\nu o-$, and the antepenult is $-\beta a-$.

Syllables containing a long vowel or a diphthong are long. But final at and ol (that is, al and ol coming at the very end of a word) are considered short so far as accent is concerned.

Thus the last syllable of a doparaus is long because it contains the diphthong ov; the last syllable of a $a \theta \rho \omega \pi \pi o<$ is short because the oc is here final or ; the last syllable of autpoutoss is long because here the ou has a letter after it and so, not being final ou, is long like any other diphthong.
It will be remembered that $\epsilon$ and o are always short, and $\eta$ and $\omega$ always long. The quantity (long or short) of $a$,
b, 'and $v$, muat be learned by observation in the individual cases.

## 11. General Rules of Accent

1. The acute (") can stand only on one of the last three syllables of a word; the circumflex (") only on one of the last two; and the grave (') only on the last.

Examples: This rule would be violated by ätooto osos, for here the accent would stand on the fourth syllable from the end. It would also be violated by $\pi / \sigma \tau \epsilon \hat{v} 0 \mu \epsilon \nu$, for here the circumflex would stand on the third syllable from the end.
2. The circumflex accent cannot stend on a short syllable.
3. If the ultima is long,
(a) the antepenult cannot be accented,
(b) the penult, if it is accented at all, must have the acute.

Examples: Rule 3a would be violated by ánóaroh $\frac{1}{}$ or a a borajov, because in these cases the ultima is long; but it is not violated by á $\pi \dot{\sigma} \sigma \pi 0 \lambda \epsilon$ or á abocrohol, because here the ultima is short. Rule 3 b would be violated by $\delta 0 \hat{\mathrm{u}}$ 入ov or $\delta o \hat{\lambda} \lambda \omega \nu$, but is not violated by $\delta o u ̂ \lambda o s ~ o r ~ \delta o u ̂ \lambda o u . ~$
4. If the ultima is short, a long penult, if it is accented at all, must have the circumflex.

Examples: This rule would be violated by doûde or סoildoc; but it is not violated by $\delta$ oundou, because here the ultima is not short, or by viós, because here, although a long penult comes before a short ultima, the penult is not accented at all. The rule does not say that a long penult before a short ultima must have the circumflex, but only that if it is accented at all it must have the circumflex rather than some other kind of accent.
5. A long ultima can have either the acute or the circumflex.

Examples: $\dot{d} \delta \in \lambda \phi 0 \hat{a}$ and $\dot{d} \delta \in \lambda \phi 0 \dot{U}$ both conform to the general rules of accent. Further observation, based on other considerations, is necessary in order to tell which is right.
6. An acute accent on the last syllable of a word is changed to the grave when followed, without intervening mark of punctuation, by other words in a sentence.

Examples: di $\delta \in \lambda \neq o ́ s$ is right where áde $\lambda \phi \phi_{s}$ stands alone; but d $\delta \in \lambda \phi \delta_{s}$ a $\pi$ oorídou violates the rule-it should be

12. It should be observed that these general rules of accent do not tell what the accenting of any individual word is to be; they only tell what it cannot be. In other words, they merely fix certain limits within which the accenting of Greek words must remain. What the accent actually is, within these limits, can be determined in part by the special rules which follow, but in very many cases must be learned by observation of the individual words. Thus if we heve a form $\lambda$ vouevou to accent, the general rules would permit $\lambda$ voдevoú or $\lambda$ оонеvoî or $\lambda v o \mu$ évou; any other way of accenting would violate the general rules. But which of the three possibilities is actually to be chosen is a matter for further observation. Or if we have a form $\pi \rho o \sigma \omega \pi 0 \nu$ to accent, the general rules would permit $\pi \rho \delta \sigma \omega \pi о \nu, \pi \rho \circ \sigma \hat{\omega} \pi о \nu$ or $\pi \rho о \sigma \omega \pi \delta \partial$.
There are two special rules which help to fix the accent of many words more closely than it is fixed by the general rules. They are as follows:

## 13. <br> Rule of Verb Accent

Verbs have recessive accent.
Explanation: The rule means that, in verbs, the accent goes back as far as the general rules of accent will permit. This rule definitely fixes the accent of any verb form; it is not necessary to know what verb the form is derived from
or to have any other information whatever. Knowing that it is a verb form, one needs only to look at the ultima. If the ultima is short, an acute must be placed on the antepenult (supposing the word to have as many as three syllables); if the ultima is long, an acute must be placed on the penult.

Examples: Suppose a verb form equourkov is to be accented. In accordance with the rule of verb accent, the accent is trying to get as far back as the general rules of

 Rule 3a. Therefore the penult must be accented. But
 correct. On the other hand, if a verb form equvore is to be accented, although $\begin{gathered}\text { žı }\end{gathered}$ aorke is forbidden by Rule 1, E $\gamma$ ivoorke is permitted; and since verbs have recessive accent, that accenting, $\epsilon$ ' $\boldsymbol{i \nu \omega \sigma \kappa \epsilon , ~ i s ~ c o r r e c t , ~ a n d ~} \epsilon \gamma \iota \nu \hat{\omega} \sigma \kappa \epsilon$ or Eyıvorkt would be wrong. If the verb has only two syllables, Rule 4 often comes into play. Thus if the verb form $\sigma \omega \zeta \epsilon$ is to be accented, the rule of recessive verb accent decrees that the former of the two syllables shall be accented. But Rule 4 decrees that the accent shall be not $\sigma \dot{\omega} \zeta \epsilon$ but $\sigma \hat{\omega} \zeta \epsilon$.

## 14.

## Rule of Noun Accent

In nouns, the accent remains on the same syllable as in the nominative singular, so nearly as the general rules of accent will permit.

Explanation: This rule differs from the rule of verb accent in that it does not of itself fix the accent of noun forms. The accent on the nominative singular (the form given in the vocabularies) must be learned by observation for every noun separately, just as the spelling of the word must be learned. So much is merely a part of the learning of the vocabularies. But when once the accent on the
nominative singular has been given, the accent on the other forms of the noun is fixed by the rule.

Examples:
(1) If there be a noun $\lambda$ ovos, neither the general rules of accent in $\$ 11$ nor the rule of noun accent will determine whether the accent is dóyos or doybs. But once it has been determined that the accent is dónos, $^{\text {o }}$ then the accent on the other forms of the noun can be determined. The other forms, without the accent, are $\lambda о \gamma \circ v, \lambda o \gamma \varphi, \lambda o \gamma o v$,
 forms the acute will stand on the penult; since (a) the rule of noun accent decrees that the accent remains there if the general rules of accent permit, and since (b) the general rules of accent never forbid the accent to be placed on a penult, and since (c) Rule 2 decrees that only an acute accent can stand on a short syllable.
(2) In the case of a noun oikos, its various forms being after the analogy of $\lambda$ byos above, (a) and (b) of the considerations mentioned above with regard to $\lambda$ óyos still hold. But (c) does not hold, since here the penult is not short but long. In this case, Rules 3 b and 4 will determine when the accent is acute and when it is circumflex; when the ultima is long, the accent (on the penult) will be acute, and when the ultima is short, the accent (on the penult) will be cir-
 oíкoเs, oíkous.
(3) In the case of a noun ä $\nu \theta \rho \omega \pi$ os the accent is trying in every other form to get back to the antepenult, in accordance with the rule of noun accent, since it is the antepenult which is accented in the nominative singular. But where the ultima is long, the accent cannot get back to the antepenult, since that would violate Rule 3a. The nearest syllable to the antepenult which it can reach in these cases is the penult. The rule of noun accent decrees that that
nearest syllable is the one upon which the accent must stand. But since the ultima is long in these cases, Rule 3 b decrees that the accent (upon the penult) shall be an acute

(4) In the case of a noun doos the accent will stand in every form upon the ultima, since the general rules of accent never prevent the accent from standing on an ultima. If the ultima is short the accent must of course be acute. But if the ultima is long, the accent, so far as the general rules are concerned, can be either acute or circumflex. In these eases, therefore, the rules so far given will not determine which accent is to be used. Thus dòós, doov, d $\delta E$ é, oboi.
 d $\delta \hat{\omega} \nu$, d $\delta o i ̂ t, ~ d \delta o \hat{u}$ are correct must be left for future determination. The decision is part of the learning of the declension of this particular class of nouns.

## 15.

 Exercises(In all written exercises, the breathings and accents should be put in immediately after each word has been written just as the i's are dotted and the t's crossed in English. It is just as wrong to wait until the end of a whole paradigm or a whole sentence to add the breathings and accents as it would be to wait similarly in English before one crosses the t's.)
I. Write the following verb forms with the accent, and then pronounce them:
 3. $\delta \iota \delta a \sigma \kappa \epsilon, \delta \iota \delta a \sigma \kappa о \nu \tau a \iota, \delta i \delta a \sigma к о \mu \epsilon \theta a$ (the final $a$ is short). 4. $\lambda v \epsilon$ (the $v$ here, as in all these forms beginning with $\lambda U$, is long), $\lambda v o v, \lambda$ vovol (the final tis short). 5. $\lambda v \sigma a l, \lambda v \sigma \omega, \lambda v e r e$.
II. Accent the following forms of the nouns whose nominative singular is (1) $\alpha \pi b \sigma \pi o \lambda o s$, (2) $\kappa \dot{\omega} \mu \eta$, (3) $\pi \lambda o \hat{o} \nu$ :

 (final a short), $\pi \lambda o t \omega \nu, \pi \lambda o t o t s, \pi \lambda o t o v, \pi \lambda o t \omega, \pi \lambda o t o v$.
III. Are the following words accented correctly, so far as the general rules of accent are concerned? If not, tell in each case what rule (or rules) has been violated. Then accent each of the words in all the ways which the general rules of accent would permit.

Note: The student should apply the principles of accent in the study of all subsequent lessons, observing how the rules are followed, and never passing by the accenting of any word in the 'paradigms or exercises until it is thoroughly understood. In this way, correct accenting will aoon become second nature, and the various logical steps by which it is arrived at will no longer need to be consciously formulated.]

## LESSON III

Present Active Indicative
16.

## Vocabulary

（The vocabularies should be learned after the paradigms and explanatory parts of the lessons，but before the exer－ cises．）

| $\beta \lambda \epsilon ̇ \pi \omega, I$ see． | 入ацвáv，I Iake． |
| :---: | :---: |
| रıขむ̇бк山，I know． | $\lambda \in \gamma \omega, I$ say． |
| रرаáфw，I write． | 入íw，I loose，I destroy |
|  | exa，I have． |

17．The Greek verb has tense，voice，and mood，like the verb in other languages．The present tense（in the indica－ tive）refers to present time；the active voice represents the subject as acting instead of being acted upon；the indicative mood makes an assertion，in distinction，for example，from a command or a wish．

18．The present active indicative of the verb $\lambda \dot{v} \omega, I$ loose，is as follows：

Sing．
1．$\lambda \dot{v} \omega, I$ loose or $I$ am loosing．
2．入úes，thou loosest or thou art loosing．
3．$\lambda \in \epsilon L$ ，he looses or he is loosing．

Plur．
1．$\lambda$ dousev，we loose or we are loosing． 2．入uete，ye loose or ye are loosing．
3．$\lambda$ fovor，they loose or they are loosing．

19．It will be observed that the distinctions between first person（person speaking），second person（person spoken to），third person（person spoken of），and between singular and plural numbers，which in English are indicated for the
most part by subject-pronouns, are indicated in Greek by the endings. Thus no pronoun is necessary to translate we loose into Greek; the we is sufficiently indicated by the ending -ouev.
20. The part of the verb which remains constant throughout the conjugation and has the various endings added to it is called the stem. Thus the present stem of $\lambda j \omega$ is $\lambda u$. The present stem of a verb can be obtained by removing the final $\omega$ from the form given in the vocabulary. Thus the present stem of $\lambda \dot{\varepsilon} \gamma \omega, I$ say, is $\lambda \epsilon \gamma-$. The conjugation of the present active indicative of any verb in the vocabulary can be obtained by substituting the present stem of that verb for $\lambda v$ - and then adding the endings $-\omega$, $-\epsilon t s,-\epsilon \iota,-\rho \mu \epsilon \nu,-\epsilon \tau \epsilon,-o v \sigma \iota$, as they are given above.

The primary personal endings, which would naturally stand in the tenses called primary tenses ${ }^{1}$, were, it seems, originally as follows:

| Eing. | Plur. |  |
| :--- | :--- | :--- |
| 1. | $-\mu \iota$ | 1. |
| 2. | $-\sigma \iota$ | 2. |
| 3. | $-\tau \iota$ | $-\tau \epsilon$ |
|  | 3. | $-\nu \tau \iota$ |

Between the stem and these personal endings was placed a variable vowel which before $\mu$ and $\nu$ was $o$ and before other letters $\epsilon$. But in the present active, at least in the singular, this scheme is not carried out, and the beginner is advised for the present simply to regard $-\omega,-\epsilon \tau s,-\epsilon l,-\infty \mu \epsilon \nu$, -ete, -oval as the endings which by their addition to the stem indicate the various persons and numbers.
21. In the present tense there is in Greek no distinction between $I$ loose, which simply represents the action as taking place in present time, and $I$ am loosing, which calls
${ }^{1}$ The primary tenses are the present, the future, and the perfect; the secondary tenses are the imperfect, the aorist, and the pluperfect.
attention to the continuance of the action. Both of these ideas, therefore, should be connected with the Greek form $\lambda j \omega$. The distinction between the two will become exceedingly important when we pass over to past time; for there Greek makes the distinction even more sharply than English.
22. The second person, you loose or you are loosing, in English may of course be either singular or plural, and may be translated by the student either by $\lambda$ úcis or by रúert except where the context makes plain which is meant. Where it is desired, in the exersises, to indicate whether singular or plural is meant, the archaic forms thou loosest, etc., and ye loose, etc., will be used.

## (All English-Greek exercises should be written.)

II. 1. We are knowing, we see, we are seeing. 2. They are loosing, they loose, he looses. 3. He is loosing, ye have, thou knowest. 4. I am taking, we know, they say. 5. He bas, we are writing, they see.
[The teacher should continue suck drill orally, until the student can recognize the Greek words rapidly both by sight and by sound, and translate the English sentences rapidly into Greek.]

## LESSON IV

The Second Declension. Order of Words. Movable $\nu$.
24. Vocabulary
d $\delta \in \lambda \phi \phi s, \delta, a b r o t h e r$.
ăv $\nu \rho \omega \pi \pi s$, ó, a man.
àmóato入os, $\delta$, an apostle.
סoûhos, $\delta$, a slave, a servant.
$\delta \bar{\omega} \rho \circ \nu, \tau b, a$ gift.
Aavaros, $\delta$, a death.

Lepòv, tó, a temple.
кai, conj., and.
入ó ơos, d, a word. ขбноs, í, a law.
otkos, $\dot{\mathbf{o}}$, a house.
viós, $\dot{d}, ~ a ~ s o n . ~$
25. There are three declensions in Greek. The second declension is given before the first for purposes of convenience, since it is easier, and has a larger number of common nouns.
26. There is no indefinite article in Greek, and so à $\delta \in \lambda$ фós means either brother or a brother (usually the latter). Greek has, however, a definite article, and where the Greek article: does not appear, the definite article should not be inserted in the English translation, Thus áde $\lambda \phi \dot{o}^{\prime}$ does not mean the brother. In the plural, English, like Greek, has no indefnite article. ávopaitou, therefore, means simply men. But it does not mean the men.
27. The noun in Greek has gender, number, and case.
28. There are three genders: masculine, feminine, and neuter.
The gender of nouns must often be learned by observation of the individual nouns. Butnearly all pouns of the secand declension ending in -os are masculine; and all nouns of the second declension in oov are neuter. The gender is indicated in the vocabulary by the article placed after the
noun. The masculine article, $\delta$, indicates masculine gender; the feminine article, $\eta$, feminine gender; and the neuter article, tó, neuter gender.
29. There are two numbers, singular and plural. Verbs agree with their subject in number.
30. There are five cases; nominative, genitive, dative, accusative, and vocative.
31. The declension of $a \nu \theta \rho \omega \pi o s, \delta, a \operatorname{man}$, is as follows:

## Singular

Nom. ä $\nu \theta \rho \omega \pi o s, a$ man. Gen. $\dot{\alpha} \nu \theta \rho \dot{\omega} \pi o v$, of a man.
N.V. ávepontol, men:
G. à $\nu \theta \rho \dot{u} \pi \omega \nu$, oj men.

Dat. à $\nu \rho \omega \dot{\omega} \pi \varphi$, to or for a man. D. \& $\nu \theta \rho \dot{\alpha} \pi$ ols, to or for men. Acc. ă $\nu \theta \rho \omega \pi \alpha \nu, a \operatorname{man}$. A. áv日pónous, men.
Voc. ä $\nu \theta \rho \omega t \epsilon$, man.
32. The student should observe carefully how the principles of accent apply to this noun and all the others. In oral practice and recitations the stress in pronunciation should be placed carefully on the syllables where the accent appears.
33. The stem of a noun is that part of the noun which remains constant when the various endings are added. The stem of a $\mu \theta p \omega \pi=s$ is $\dot{a} \nu \theta \rho \omega \pi o-$, and all other second-declension nouns, like $a \nu \theta \rho \omega \pi o s$, have stems ending in 0 . The second declension, therefore, is sometimes called the odeclension. But this final of the stem becomes so much disguised when the endings enter into combination with it, that it is more convenient to regard ávopur- as the stem and $-\infty,-o v$, etc., as the endings. It should at any rate be observed, however, that o (with the long of it, $\omega$ ) is the characteristic vowel in the last syllable of second-declension nouns.
34. The subject of a sentence is put in the nominative

The object of a transitive verb is placed in the accusative

35. The genitive case expresses possession. Thus 入óyou $\dot{\text { ánooród }} \omega \nu$ means words of apostles or apostles' words. But the genitive has many other important uses, which must be learned by observation. The functions of the Latin ablative are divided, in Greek, between the genitive and the dative.
36. The dative case is the case of the indirect object.
 But the dative has many other important uses which must be learned by observation.
37. The vocative case is the case of direct address. Thus $\dot{\alpha} \dot{\delta} \epsilon \lambda \phi \ell, \beta \lambda \epsilon \pi о \mu \varepsilon y$ means brother, we see. In the plural the vocative case in words of all declensions is in form like the nominative. The vocative plural may therefore be omitted in repeating paradigms.
38. Learn the declension of $\lambda$ ó $\gamma$ os, $\delta, a$ word, and of סov̂los, $\delta$, a servant, in $\$ 557$. These nouns differ from ä $2 \theta \rho \omega \pi o s$ only in that the accent is different in the nominative singular and therefore the application of the general rules of accent works out differently.
39. The declension of uibs, $\delta, a$ son, is as follows:

Sing.
N. viós
G. viou
D. vīu
A. víz
V. ule

Plur.
N. V. viol
G. vtâv
D. vioîs
A. vious
40. Here the rule of noun accent decrees that the accent must be on the ultima in all cases, because it was there in the nominative singular. But which accent shall it be? The general rules of accent answer this question where the ultima is short; for of course only an acute, not a circumflex, can stand on a short syllable. But where the ultima is long, the general rules of accent will permit either an acute or a circumflex. A special rule is therefore necessary. It is as follows:

In the second declension, when the ultima is accented at all, it has the circumflex in the genitive and dative of both numbers, elsewhere the acute.

Explanation: The "elsewhere" really refers only to the accusative plural, because in the nominative and vocative singular and plural and in the accusative singular the general rules of accent would forbid the circumflex, the ultima being short in these cases.
41. The declension of $\delta \hat{\omega} p o \nu, \tau \dot{0}, a$ gift, is as follows:

|  | Sing. |  | Plur. |
| :---: | :---: | :---: | :---: |
| N. V. | $\delta \hat{L}^{\text {pop }}$ | N. V. |  |
| G. | ס̇́pou | G. | \% $\omega$ Dow |
| D. | ठおрш | D. | ¢¢ $\rho$ ous |
| A. | ठิิpov | A. | $\delta \hat{\omega} \boldsymbol{a}$ |

42. It will be observed that $\delta \hat{\omega} \rho o \nu$ is a neuter noun. In all neuter nouns, of all declensions, the vocative and accusative of both numbers are like the nominative, and the nominative, vocative and accusative plural always end in short a.
43. 

Order of Words
The normal order of the sentence in Greek is tike that in English-subject, verb, object. There is no special
tendency, as in Latin, to put the verb at the end. But Greek can vary the order for purposes of emphasis or euphony much more freely than English. Thus the sentence, on apostle says a word, is in Greek normally $\dot{d} \pi \dot{\prime} \sigma \tau 0 \lambda o s ~ \lambda \epsilon \in \epsilon \epsilon$
 are both perfectly possible. The English transiation must be determined by observing the endings, not by observing the order.
44. Movable $\nu$
When the oval of the third person plural of the verb comes either before a vowel or at the end of a sentence, a $\nu$,
 Sometimes the movable $\nu$ is added even before a word that begins with a consonant. Thus either גjourl $\delta o i ́ h o u s ~ o r ~$ גúovaly doùdous is correct. It must not be supposed that this movable $\nu$ occurs at the end of every verb form ending in a vowel when the next word begins with a vowel. On the contrary, it occurs only in a very few forms, which must be learned as they appear.

## 45.

## Exercises

 viol otkovs. 7. doúhous kai oüкous $\lambda a \mu \beta a ́ v o v a l \nu$ áde $\lambda \phi o l$. 8.

II. 1. A servant is writing a law. 2. A son sees words. 3. Brothers are loosing servants. 4. Sons take gifts. 5. An apostle sees a servant and a gift. 6. Servants and sons are saying a word to a brother. 7. We see gifts and servants. 8. Men see words and gifts of a brother and houses of apostles and sons. 9. Words and laws we write to brethren; a word of death we say to a servant. 10. A son is seeing temples and houses. 11. Ye know death. 12. Thou takest an apostle's gift ( $=$ a gift of an apostle). 13. Thou art writing a brother's word to a servant. 14. I loose servants and say words to sons and brothers. 15. A son sees death. 16. They know laws and teach servants of an apostle.

## LESSON V

## The First Decletsion

46. 

Vocabulary

Baбı入eia，$\dot{\eta}$ ，a kingdom． रpaф́⿱㇒冋刂，$\dot{\eta}$ ，a writing，a Scripture．
$\delta \delta \xi a, \dot{\eta}$, glory．
єipinv，$\eta$ ，peace．
èкк入ך $\quad$ ia，$\dot{\eta}, a$ church． Ejvo入 $\dot{\eta}, \dot{\eta}$, a commandment．
$\zeta \omega \dot{\eta}, \dot{\eta}$, life．
$\dot{\eta} \mu \dot{\varepsilon} \rho a, \dot{\eta}, ~ a ~ d a y$.
карбía，$\dot{\eta}$, a heart．
$\pi a \rho a \beta o \lambda \dot{\eta}, \dot{\eta}$, a parable．
ф山иri，$\dot{\eta}, ~ a ~ v o i c e . ~$
$\psi \cup \chi \dot{\eta}, \dot{\eta}, a$ soul，a life．
むpa，$\dot{\eta}$ ，an hour．

47．All nouns of the first declension ending in a or $\eta$ are feminine．

48．The declension of $\ddot{\sharp} \rho a, \eta, a n$ hour，is as follows：

Sing．
N．V．${ }^{4} p a$
G．ひ̈pas
D．$\ddot{\omega} \rho \underset{\square}{q}$
A．äpay

Plur．
N．V．$\dot{\text { épat }}$
G．$\dot{\omega} \omega \bar{\omega}$
D．※̈paus
A．むoas

49．The stem of $\begin{gathered}\text { pa } \\ \text { is } \\ \text { epa－，and the first declension is }\end{gathered}$ sometimes called the a－declension，because its stems end in a．Since，however，the final vowel of the stem enters
into various combinations with the endings it is more convenient for the beginner to regard $\dot{\omega} \rho$ - as the stem and $-a,-a s$, etc., as the endings. It should be noticed that a is characteristic of this declension as o is of the second declension.
50. It should be observed that the $a$ in the nominative, genitive, and accusative singular, and in the accusative plural is long.
51. The genitive plural shows an exception to the rule of noun accent. The rule of noun accent would require the accent to remain on the same syllable as in the nominative singular. But nouns of the first declension have a circumflex on the ultima in the genitive plural no matter where the accent was in the nominative singular.
52. The declension of Baoideia, $\dot{\eta}$, a kingdom, is exactly like that of $\ddot{\omega} \rho a$, since here also there is a long accented penult in the nominative singular followed by a long $a$ in the ultima.
53. The declension of $\dot{\lambda} \lambda \dot{\eta} \theta \epsilon \epsilon a, \dot{\eta}$, truth, is as follows:

| Sing | Plur. |
| :---: | :---: |
|  |  |
|  | G. $\dot{1} \lambda \eta \theta \epsilon \epsilon \stackrel{\omega}{\nu}$ |
| D. àn $\begin{aligned} & \text { ecia }\end{aligned}$ | D. $\dot{d} \lambda \eta$ ¢fiaus |
| A. $\downarrow \lambda \dot{\lambda} \dot{\theta} \theta \epsilon L a \nu$ | A. $\dot{\alpha} \lambda \eta \theta \in i a s$ |

This noun has a short $a$ in the ultima in the nominative singular, and when in the first declension the $\alpha$ is short in the nominative singular it is also short in the accusative singular. In the accusative plural the $a$ is long in all firstdeclension nouns. The accent follows the noun rule everywhere except in the genitive plural (see \$51).
54. The declension of $\delta \delta \xi a, \dot{r}$, glory, is as follows:

| Sing. | Piur. |
| :---: | :---: |
| N. V. $\delta \delta \bar{\xi} a$ | N. V. $\delta 6 \xi$ at |
| G. $\delta 6 \xi 75$ | G. $\delta 0 \xi \bar{\nu}$ |
| D. $\delta \delta ¢ \xi \square$ | D. $\delta$ ógaus |
| A. $\delta$ otsal | A. $\delta \dot{0} \xi \times 5$ |

55. The $a$ in the nominative singular of first-declension nouns is changed to $\eta$ in the genitive and dative singular except after $\epsilon$, $\iota$, or $\rho$.
56. The declension of $\gamma p a \phi \dot{\eta}, \dot{\eta}, a$ writing, a Soripture, is as follows:

| Sing. | Plur. |
| :---: | :---: |
| N. V. $\gamma \rho \alpha \phi \bar{\prime}$ | N. V. ypaфai |
| G. $\gamma \rho a \phi \hat{\text { ¢ }}$ | G. $\gamma \rho a \phi \hat{\omega}$ |
| D. $\gamma \rho \sim \phi \hat{y}$ | D. $\gamma$ pa¢aîs |
| A. $\gamma \rho a \phi \eta^{\prime}$ | A. rpapás |

57. When a first-declension noun ends in $\eta$ in the nominative singular, the $\eta$ is retained throughout the singular. But the pluralls of all first-declension nouns are alike.
58. In the first declension (exactly as in the second, see §40), when the ultima is accented at all, it has the circumflex in the genitives and datives of both numbers, elsewhere the acute.
59. 

## Exercises

II. 1. A kingdom takes glory. 2. Churches are saying parables to hearts of men. 3. A heart of a man is teaching an apostle, and a voice of an apostle is teaching a servant. 4. We have writings of apostles. 5. Churches have peace and glory. 6. A day sees life and death. 7. Apostles take temples and kingdoms. 8. We see houses and temples and churches. 9. A servant says a parable to hearts of men. 10. We know voices of churches and words of truth. 11. A voice of an apostle says a parable to souls of men.

## LESSON VI

The Article. Adjectives of the First and Second Declension. Agreement. Use of the Article. Attributive and Predicate Positions of Adjectives. Substantive Use of Adjectives.
60.
áүaÓs, $\mathfrak{\eta}, \mathrm{b}, \mathrm{y}, \mathrm{adj} .$, good.
äd $\lambda o s, \eta, o$, adj., other.
Siкaws, $a, 0 \nu$, adj., righteous.
є́үеірш, I raise up.
épquos, $\dot{\eta}$, a desert. є́ $\sigma \chi a \tau o s, \eta, o \nu$, adj. , last. какós, $\mathfrak{y}, \dot{\text { on }}$, adj., bad.

It will be observed that epp $\quad$ uos and dobs are feminine, though nearly all nouns of the second declension ending in -os are masculine.
61. The declension of the adjective $\begin{aligned} & \text { a } \gamma a \theta \delta s, \text { good, } \text {, is as }\end{aligned}$ follows:

| asc. | Sing. | Neut. | Masc. | $\underset{\text { Plur. }}{\text { Fem. }}$ | Neut. |
| :---: | :---: | :---: | :---: | :---: | :---: |
| N.àrafós |  | dyatóv |  | a ${ }^{\text {rafai }}$ | à ${ }^{\text {räá }}$ |
|  |  |  | G. $\mathrm{a}^{\gamma} \mathrm{\gamma} \boldsymbol{\theta} \hat{\theta}$ |  |  |
| D. $\mathrm{i}^{\text {a }}$ a $\theta \hat{\varphi}$ |  |  | D. ajaboîs | a ${ }^{\text {ratais }}$ | àratois |
|  | dyatip | à ${ }^{\text {¢ }}$ aOóv | A. à yatoùs | àruAas | à a0d |
|  | di¢a $\theta$ ¢ | araód |  |  |  |

This declension, like all declensions of adjectives, and of the article, etc., is to be learned across and not in vertical columns-that is, the nominative singular is to be given in all three genders before the genitive is given, and the genitive singular is to be given in all three genders before the dative is given, and so on.

It will be observed that the masculine of the adjective a $\boldsymbol{\gamma} a 0$ obs is declined exactly like a masculine noun of the second declension, the feminine exactly like a feminine noun in $\eta$ of the first declension, and the neuter exactly like a neuter nown of the second declension.
62. Learn the declension of $\mu$ ккós, small, and of Sikalos, righteous (in $\S \S 569,570$ ). Note that long a not $\eta$ stands in the feminine of these adjectives when the preceding letter is $\rho$ or a vowel (compare §55). The accent in the genitive plural feminine of all adjectives of the second and first declension follows the regular noun rule and not the special rule for nouns of the first declension (\$51).
63. The declension of the article is as follows:

| Sing. |  |  | Plur. |  |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Masc. | Fem. | Neut. |  | Masc. | Fem. | Neut. |
| N. | $\dagger$ | T6 | N. | ol | ai | $\tau \underline{1}$ |
| G. $\tau 0 \hat{1}$ | Tîs | Tov̂ | G. |  | т ¢ิ | тิิ้ |
| D. $\tau \underline{\top}$ | $\tau \hat{0}$ | T¢̣̂ | D. | rois | taîs | roîs |
| A. $\tau \dot{\chi}$ | Thy | тó | A. | rous | tás | th |

64. The forms $d, \dot{\eta}$, oi, ai are proclitics. A proclitic is a word that goes so closely with the following word as to have no accent of its own.
65. Note thet except for (1) these irregular proclitic forms, (2) the form to in the nominative and accusative singular (instead of $\tau$ óv), and (3) the absence of the vocative, the article is declined like the adjective drados.

## Agreement

Adjectives, including the article, agroe with the nouns that they modify, in gender, number, and case.

 etc.

## 67.

## Use of the Article

The use of the article in Greek corresponds roughly to the use of the definite article in English. Thus dóros means a word; $\delta$ doyos means the word; $\lambda$ byou means words; oi $\lambda \delta$ yol means the words. The differences between the Greek and the English use of the article must be learned by observation, as they occur. For the present, the presence or absence of the Greek article should always be carefully indicated in the English translation.

## Attributive and Predicate Use of Adjectives

68. Adjectives are used in two distinct ways: (1) attributively, (2) predicatively.

In the phrase the good word, the adjective good is an attributive adjective; it tells what word we are mentioning. We are not mentioning all words or any word, but only the good word.

In the sentence, the word is good, the adjective good is a predicate adjective; with the verb is it makes an assertion about the subject, the word.
69. In Greek, the distinction between the attributive and the predicate adjective is of vastly more importance
than in English; indeed, as will be observed later, some of the most important and characteristic parts of Greek grammar are based upon this distinction.
70. The good word can be expressed in two common ways in Greek-either by dayaOds $\lambda$ dóyos or by ì $\lambda$ ofos $\delta$ dya0bs. It will be observed that what is characteristic about this attributive position of the Greek adjective is that the adjective comes immediately after the article. The
 English; it has the order (1) article, (2) attributive adjective, (3) noun, and is a literal translation of the good word. The latter of the two alternatives, $\delta \lambda \dot{d} \gamma o s \dot{\delta}$ a $\gamma a \theta \delta s$, means literally the word-namely the good one. But it is of course vastly commoner than this cumbersome usage is in English, and like ó ó $\mathbf{\gamma}$ adós $\lambda$ óyos should be translated simply the good word.
71. The word is good can be expressed in two ways in
 simple copula, meaning is, can be omitted). What is characteristic about this predicate position of the adjective in Greek is that the adjective does not come immediately after the article.
72. The matter can be summarized as follows:

73. The student should fix this distinction in his mind by thoughtful reading aloud of the above and similar phrases, untill à aOds ó dóyos, for example, comes to mean to
him，even without conscious translation，good（is）the word，and comes to be dissociated entirely from the idea the good word．If this advice be heeded，a solid foundation will have been laid for the mastery of a large part of Greek syntax．

74．It should be observed that the distinction between the attributive and the predicate position of the adjective can be made in Greek only when the noun has the article． á yatós $\lambda$ doyos or $\lambda$ dóvos dyatós（the noun here not having the article）may mean either a good word（attributive）or a word is good（predicate）．

## 75．Substantive Use of the Adjective

The adjective may be used as a noun，especially with the article．
 good woman；à $\gamma a \theta \delta \nu$, a good thing；ara日ol，good men；

 the good thing；oi ayafoi，the good men；ai ayatai，the good woman；táa á $\gamma \mathrm{a}$ 京，the good things．

Sometimes，in the plural masculine，the English language， like Greek，can use the adjective as a noun without adding the word men．Thus oi a y afoi may be translated the good meaning the good men or the good people；oi עeкooi，the dead， meaning ihe dead people，etc．
76.

## Exercises

[^0]

II. I. To the first church the Lord writes the first parabie. 2. The good woman sees the ways of the desert. 3. The good things are first and the bad things last. 4. Death is bad and life is good. 5. The Lord of the kingdom raises up the faithful men and the faithful women. 6. The good know the bad, and the bad the good. 7. The good words we say to the Church, and the bad words we write to the brethren. 8. Thou seest the good days of the Lord of life. 9. The roads are good and the men bad. 10. The first gift is last and the last (gift) first. 11. The good servants know the truth and the glory of the Lord. 12. The last day takes the bad servants. 13. The men are destroying the beautiful temples and the small houses. 14. The righteous have another house. 15. The church is taking the other house. 16. I know the other ways. 17. The Lord is seying the other parable to the first church.

[^1]
## LESSON VII

## Masculine Nouns of the First Declension Prepositions

77. 

Vocabulary

senger.
${ }^{\mathrm{a}} \gamma \omega$, I lead.
a áó, prep. with gen., from.
$\beta \dot{a} \lambda \lambda \omega, I$ throw, $I$ cast, I put. $\quad \mu \epsilon \tau$, prep. with gen., with;
ठlá, prep. with gen., through; with ace., after. with acc., on account of.
eis, prep. with acc., into. $\quad \pi \epsilon \mu \pi \omega, I$ send.
$\dot{\epsilon} \kappa$ ( $\begin{aligned} & \xi \\ & \xi \\ & \text { before } \\ & \text { vowels), prep. } \pi \rho o ́ s, ~ p r e p . ~ w i t h ~ a c c ., ~ t o . ~\end{aligned}$
with gen., out of.
ev, prep. with dat., in.
$\theta$ cós, $\delta$, a god, God (When it tótos, d, a place. means God, $\theta$ ebs may have the article).
$\lambda i$ oos, ó, a stone.
$\mu a \forall \eta \tau \dot{\eta} s, \dot{s}$, a disciple.
$\mu \dot{\epsilon} \nu \omega$, I remain.
oupadós, ó, heaven.

трофйт刀s, $\dot{\delta}$, a prophet.
тékvov, тó, a child.
$\phi \notin \rho \omega, I$ bear, I bring.
78. Nouns of the first declension ending in -ns are masculine.
79. The declension of $\pi \rho o \phi \dot{\eta} \pi \eta s, \dot{b}$, a prophet, is as follows:

Sing.
N. $\pi \rho \circ \phi \dot{\eta} \tau \eta \mathrm{g}$
G. $\pi \rho о ф$ ท̆тоע
D. $\pi \rho \circ \phi \dot{\eta} \tau \eta$
A. $\pi \rho о ф \dot{\eta} \tau \eta \nu$
V. $\pi р о ф \tilde{\eta} \tau \alpha$

It will be observed that although $\pi \rho \circ \phi \dot{\eta} \tau \eta s$ is masculine it is a true first-declension noun, being just like a feminine noun of the first declension except in the nominative, genitive, and vocative singular.
$\mu a \theta \eta \tau \boldsymbol{\eta} s$ is declined like $\pi \rho \circ \phi \dot{\eta} \tau \eta s$, except for the accent.

## Prepositions

80. Prepositions express relationship. Thus in the sentence, the book is in the desk, the preposition in expresses a certain relationship between the book and the desk. In the sentence, the book is on the desk, a different relationship is expressed (by the preposition on).
In English, nouns standing after prepositions are always in the same case (the "objective" case). But in Greek different prepositions take different cases.
81. The preposition $\epsilon y$, meaning in, always takes the dative case. Thus in the house is expressed by $\dot{\epsilon} \nu$ T $\hat{0}$ oik $\omega$; in the truth by $\dot{\epsilon} y ~ t \hat{\jmath} d \lambda \eta \theta \in i a$, etc. The preposition $\epsilon i s$, meaning into, on the other hand, always takes the accusative. Thus into the house is expressed by eis $\tau \delta \nu$ otkov. Finally, the preposition a $\pi$ d always takes the genitive. Thus from the house is expressed by $\dot{\mathrm{a}} \pi \mathrm{d}$ tov outkou.
82. These three prepositions illustrate the general principle that the genitive is the case of separation, the dative the case of rest in a place, and the accusative the case of motion toward a place. Prepositions expressing separation naturally take the genitive, prepositions expressing rest in a place naturally take the dative, and prepositions expressing motion toward a place naturally take the accusative.
83. But a very great number of usages of prepositions cannot be reduced to any such general rule. Thus many
prepositions that do not express any idea of separation take the genitive.
84. It should be observed that $\varepsilon \nu, \epsilon i s$, and $\varepsilon k$ are all proditics (see § 64).
85. $\dot{\epsilon} y$, eis, $\dot{\varepsilon} \kappa$, and $a \pi b$ each take only one cese, and $\pi \rho b s$ is not commonly used with any case except the accusative. But many other prepositions take several cases. Those that take several cases often have quite a different meaning when used with one case from their meaning when used with another case. Thus $\delta$ od with the genitive means through; $\delta$ dd with accusative, on account of: $\mu \in \tau \dot{\alpha}$ with the genitive means with; $\mu \varepsilon \tau$ á with the accusative, after.
86. In studying the vocabularies it is quite insufficient to learn how the prepositions are to be translated, but it is also necessary to learn with what case they are construed in any particular meaning. Thus it is quite insufficient to say that év means in. What should rather be said is that " $l y$-with-the-dative" means $i n$. The phrase " $t y$-with-thedative" should form in the student's mind one absolutely indivisible idea; $\boldsymbol{e} y$ should never be thought of apart from its case. In the same way, but still more obviously, it is insufficient to say that $\mu \epsilon \tau \dot{c}$ means with or after. What ahould rather be said is that " $\mu \epsilon \tau \dot{\alpha}$-with-the-genitive" means with, and that " $\mu \in T d$-with-the-accusative" means after. This same method of study should be applied to all prepositions.
87. A further important principle is that of precision in learning the meanings of prepositions. It is true that no one English word or phrase is capable of translatiug in all instances a single Greek preposition. Sometimes, for example, e $\nu$ with the dative cannot be translated by in in English. But the proper method is to learn first the usual meaning
before proceeding to the unusual. A reversal of this method will lead to hopeless confusion. Let the student, therefore, so far as prepositions are concerned, adhere for the present rigidly to the translations given in the vocabularies. In that way a feeling for the really fundamental meaning of the prepositions will be formed, and further on the derived meanings can be studied without confusion.
88. Finally, the importance of this subject should be noticed. Few things are more necessary for a correct understanding of the New Testament than a precise acquaintance with the common prepositions. The prepositions therefore should always be singled out from the vocabularies for special attention, and when new prepositions are learned the old ones should be reviewed.
89. 

## Exercises

 како́s $\dot{\delta}$ коб $\mu о$.
II. 1. In the world we have death, and in the Church life. 2. The prophets lead the righteous disciples of the Lord into the way of the desert. 3. The child is throwing a stone into the little house. 4. The man is saying a good word to the disciples and is leading the disciples to the Lord. ${ }^{2}$ 5. The disciples are remaining in the church and are saying a parable to the other prophets. 6. Through the voice of the prophet the Lord is teaching the disciples. 7. On account of the Church the disciples and the apostles write good words to the brethren. 8. On account of the children the prophet is sending the evil men into the desert. 9. After the Lord the apostle sees the disciple. 10. The prophets are teaching the disciples with the children. 11. They are bringing the disciples to the Lord. 12. The Lord is remaining with the prophet in another place. 13. The righteous are leading the disciples through the desert to the Lord. 14. We see the days of the Son of God in the evil world. 15. Evil are the days; good are the churches. 16. Through the word of the Lord God raises the dead.

[^2]
## LESSON VIII

Enclitıcs. Personal Pronouns. Present Indicative of $\varepsilon i \mu i$.

> 90.
> Vocabulary
> aitós, t̀, b, pron., he.
> ( $\boldsymbol{\epsilon} \boldsymbol{\gamma} \dot{\omega}$, pron., $I$.
> $\delta E$, conj., but, and.
> $\epsilon i \mu k, I \mathrm{am}$.
91. The conjunction $0 \in$ is postpositive-that is, it cannot stand first in its clause. Ordinarily it stands second.
 $\beta \lambda \epsilon \pi \epsilon l$ rò kúpoov, the servant knows the aposlle and the apostle sees the Lord.

## Enclitics

92. An enclitic is a word that goes so closely with the preceding word as to have normally no accent of its own.
Enclitics are thus to be distinguished from proclitics, which go so closely with the following words as to have no accent of their own (see §64). Proclitics give rise to no special rules of accent; they simply have no accent and produce no changes in the accenting of preceding or following words. But the case is very different with enclitics, which give rise to the following rules:
I. Accenting of the word before an enclitic:
(1) The word before an enclitic does not change an acute on the last syliable to a grave.

Example: $\dot{d} \delta \epsilon \lambda \phi \delta s \mu o v$ is incorrect; $\dot{d} \delta \epsilon \lambda \phi o ́ s ~ \mu o v$ is correct.
(2) If the word before an enclitic has an acute on the
antepenult, or a circumflex on the penult, it takes an additional accent (an acute) on the ultima.
 $\delta \widehat{\omega} \rho \delta \nu \in \sigma \tau L \nu$.
(3) If the word before an enclitic is itself a proclitic or an enclitic it has an acute on the ultima.

II. Cases in which an enclitic has an accent of its own:
(1) An enclitic of two syllables retains its own accent when it follows a word that has an acute on the penult.
Example: $\ddot{\omega}_{\boldsymbol{\omega}} \rho \boldsymbol{\epsilon} \sigma \boldsymbol{\epsilon} \boldsymbol{\tau} \nu \boldsymbol{\nu}$ is correct because $\dot{\epsilon} \sigma \tau i \nu$ is an enclitic of two syllables. むu $\rho a \mu 0 u$, on the other hand, is correct because $\mu o v$ is an enclitic of only one syllable.
(2) An enclitic retains its accent when there is emphasis on the enclitic or when the enclitic begins a clause.
93. It may help to fix these rules in the memory, if the enclitic in every case be regarded as forming one word with the word that precedes it and then the general rules of accent be applied. These enclitic rules may then be regarded as attempts to avoid violations of the general rules. Thus if a $\mu \theta \rho \omega \pi \sigma \sigma \epsilon \sigma \tau \iota \nu$ or ${ }^{2} \nu \theta \rho \omega \pi \sigma \sigma \mu o v$ or $a \nu \theta p \omega \pi \sigma \sigma \mu \epsilon$ be regarded as one word the accenting of that word violates the general rule that the accent cannot get further back than the antepenult; and $\delta \hat{\omega} \rho o \nu \mu o v$ violates the general rule that the circumflex cannot get further back than the penult. Something, therefore, needs to be done. And what is actually done is to put in an additional accent to break up the long series of unaccented syllables. Following out a similar principle, the accent of むpatotul would become њ̆áeariv. But two acutes were not desired in immediate juxtaposition in a single word. Therefore in this case an
alternative way out of the difficulty was adopted, and the enclitic was made to retain its own accent.

It should be observed, however, that this way of considering the matter will not quite work out in all cases; for Goauov, for example, would violate the general rule that the accent cannot stand on the antepenult if the ultima, is long.

## Personal Pronouns

94. The declension of the personal pronoun of the first person is as follows:

Sing.
N. è $\begin{gathered}\omega \\ , ~ I . ~\end{gathered}$
G. $\dot{\epsilon}_{\mu} \alpha \hat{v}$ or $\mu o v$, of me.
D. $\epsilon_{\mu} \mathrm{l}$ or $\mu \mathrm{ol}$, to or for me.
A. $\epsilon_{\mu} \dot{\epsilon}$ or $\mu \epsilon, m e$.

Plor.
N. $\dot{\eta} \mu \in \mathfrak{i s}, w e$.
G. $\dot{\eta} \mu \hat{\omega} \nu$, of $u s$.
D. $\dot{\eta} \mu \hat{\imath} \nu$, to or for us.
A. $\dot{\eta} \mu a \hat{s}, u s$.

The forms $\epsilon \mu 0 \hat{v}, \varepsilon \mu \alpha i, \varepsilon_{\mu} \dot{\epsilon}$ are the forms used when emphasis is desired. The unemphatic forms, $\mu \circ v, \mu \circ \iota, \mu \epsilon$, are enclitic.
95. The declension of the personal pronoun of the second person is as follows:

## Sing.

N. $\sigma \dot{v}$, thou.
G. $\sigma 0 \hat{0}$, of thee.
D. ool, to or for thee.
A. $\sigma \epsilon$, thee.

Plur.
N. üeis, ye.
G. $\dot{y} \mu \hat{\omega} \nu$, of you.
D. $\dot{\text { juiv, to or for you. }}$
A. Uuâs, you.

The forms $\sigma o \hat{v}, \sigma o i$, and $\sigma \in$ are enclitic except when they are emphatic. When they are emphatic, they have the accents given in the paradigm.
96. The declension of the personal pronoun of the third person is as follows:

Sing.

## M.

N. aùtós, he.
G. aivoû, of him.
D. à̀tê, to or for him.
A. aùtóv, him.

## M.

N. aviroi, they.
G. aù $\hat{\omega} \nu$, of them.
D. autois, to or for them.
A. airous, them.
F.
aivin, she.
abrins, of her. aúrŷ, to or for her. autinu, her.

Plur.
F.
adital, they.
aut $\bar{\omega}$, of them.
autais, to or for them.
aúras, them.
N.
aúrb, it. aútoû, of it. aút $\hat{,}$, to or for it. aútó, it.
aú $\frac{\mathrm{a}}{}$, they. aut $\hat{\omega} \nu$, of them. abrois, to or for them. aU゙白, them.

It will be observed that the declension of autos is like that of a yabos (omitting the vocative), except for the form aúró in the nominative and accusative singular neuter.
97.

The Use of Pronouns
(1) A pronoun is a word that stands instead of a noun.

Example: The sentence, I see the disciple and teach him, means the same thing as $I$ see the disciple and teach the disciple. The pronoun him stands instead of the second occurrence of the noun disciple.
(2) The noun for which a pronoun stends is called its antecedent.

Thus in the sentence, I see the disciple and teach him, the antecedent of him is disciple.
(3) A pronoun agrees with its antecedent in gender and number.

Examples:
(a) $\beta \lambda \epsilon \pi \omega$ то̀ $\mu a \dot{\eta} \tau \dot{\eta} \nu$ каl $\delta \iota \delta \dot{a} \sigma \kappa \omega$ aíтóv, $I$ see the disciple and teach him. Here $\mu a \theta \eta r \eta \dot{\nu}$ is the antecedent of aútóv, and since $\mu a 0 \eta \tau \dot{\eta} \nu$ is of masculine gender and singular number aútov also is masculine singular.
 house and know it. Here oincu is the antecedent of aútóv, and since oiru is of masculine gender and singular number aúróv also is mesculine singular. In English the neuter pronoun it is used, because the noun house, like all nouns denoting inanimate objects, is neuter in English. But in Greek the word for house is masculine, and therefore the masculine pronoun is used in referring to it. Hence the translations, he, she, etc., given in the paradigm above for the masculine and feminine of the Greek pronoun of the third person are correct only when the antecedents are nouns denoting persons. In other cases, the pronouns will be neuter in English even when they are masculine or feminine in Greek. It will be observed, further, that the pronoun does not agree with its antecedent in case, but only in gender and number. In the sentence just given the antecedent oike is dative after the preposition $\dot{\varepsilon} \nu$, whereas aúróv has its own construction, being the object of the verb $\gamma \iota \nu \omega \sigma \kappa \omega$.
 Church teaches me and I teach it.
(d) $\beta \lambda \epsilon \in \pi \omega$ тoùs $\mu a \theta_{\eta} \tau$ às каi $\delta \iota \delta \dot{\alpha} \sigma \kappa \circlearrowleft$ aútoús, $I$ see the disciples and teach them.
(e) $\beta \lambda \in \pi \omega$ тà $\tau \in \in \kappa v a$ кal $\delta \iota \delta a ́ \sigma \kappa \omega$ aútá, $I$ see the children and teach them. It will be observed that in English in the plural the personal pronoun is the same in form for all three genders, whereas in Greek it varies.
(4) The personal pronouns are not used in the nominative case unless there is emphasis upon them.
（a）The reason for this rule is that the ending of the verb indicates sufficiently whether the subject is first，second，or third person．Thus $\lambda \dot{\lambda} \gamma \omega$ means $I$ say．The ér $\dot{\omega}$ ，there－ fore，is not put in unless there is emphasis upon it．
（b）Emphasis is usually caused by contrast．Thus in the sentence $\dot{\epsilon} \gamma \dot{\omega}$ 入é $\gamma \omega$, ò̀ $\delta \dot{\epsilon}$ yodocis，$I$ say，but you write， é $\gamma \dot{\prime} \dot{\prime}$ and $\sigma \dot{1}$ are emphatic because they are contrasted with each other．And in the sentence $\dot{\varepsilon} \gamma \dot{\omega} \lambda \epsilon \gamma \omega$ ，＂$I$ say，＂the natural inference is that some one else does not say．The insertion of the emphatic $\mathfrak{\varepsilon} \gamma \dot{\omega}$ naturally suggests an implied （though here not an expressed）contrast．
（c）aúrós is almost never used as a personal pronoun in the nominative case．The place of it，in the nominative，is taken usually by certain other words，and it itself has in the nominative case a use distinct from its use as a personal pronoun．These matters will be reserved for future study．
（5）To express possession the unemphatic forms of the personal pronouns should be used，and the English phrases my word and the like should be turned around into the form， the word of me，before they are translated into Greek．

Examples：My word，ó $\lambda$ óyos $\mu o v ;$ thy word，à $\lambda$ óyos rov； his word，ò 入óros aùrô̂；her word，ó 入óyos autr̂̀s；its word，

If it is desired to emphasize the possessive idea－e．g．， ＂$m y$ word＂－a possessive adjective，which will be learned later，is ordinarily used instead of the genitive of the per－ sonal pronoun．
（6）After prepositions，the emphatic forms of the personal pronouns are ordinarily used．

 mon．

[^3]
## Present Indicative of $\epsilon i \mu i$

98. The present indicative of the verb $\epsilon i \mu i, I a m$, is as follows:

Sing. 1. $\epsilon \frac{\mu}{}{ }^{i}, \quad I \mathrm{am}$.
2. $\epsilon i$, thou art.
3. $\begin{gathered}\text { etil }(\nu) \text {, he is. }\end{gathered}$

Plur. 1. $\dot{\epsilon} \sigma \mu \hat{y}$, we are.
2. 宅 $\sigma \tau \dot{\epsilon}$, ye are.
3. єial( $\nu)$, they are.

All these forms except cI are enclitic. The accents given in the paradigm occur only when required by the rules given above in $\S 92$.

99. The verb cipi takes a predicate nominative, not an accusative, to complete its meaning.

In the sentence, the apostle says the word, it is asserted that the apostle does something to the word; the word is therefore the object of the action denoted by the verb, and stands in the accusative case. But in the sentence, the apostle is a man, it is not asserted that the apostle does anything to a man. A man, therefore, stands here not in the accusative case but in the predicate nominative.

$$
100 .
$$

## Exercises

II. 1. Your servants are in the house of the Lord. 2. My house is in the desert. 3. The prophet knows his disciples and brings them into his houses. 4. Through my word ye have, glory. 5. On account of our children ye see evil days. 6. In our days the world is evil. 7. God knows our souls and brings them out of death. 8. Ye are our sons and we are your disciples. 9. We are in the kingdom of God with Thy faithful disciples. 10. We say a parable to thee, but thou sayest another word to us. 11. The way is bad, but we lead the children in it. 12. My brother takes gifts from you, but ye write an evil word to him. 13. My house is bad, but your disciples bring the children out of it. 14. My disciples are leading their brethren to me. 15. I see and know my sons and lead them to my Lord. 16. God knows his Church and leads it out of death into his kingdom. 17. Thy commandments are good and righteous, and lead us into life. 18. Our Lord is sending His apostles to me. 19. We are sending our servants into your house, but ye are taking our gifts from us. 20. Ye are good, but your disciples are evil.

[^4]
## LESSON IX

Demonstrative Pronouns. Further Uses of aùzós.
101.
$\dot{a} \gamma a \pi \eta, \dot{\eta}$, love.
$\dot{\mathbf{a}} \mu a \rho \tau і a, \dot{\eta}, a \sin , \sin$.
$\beta a \pi \tau i \zeta \omega, I$ baptize.
ठьóá $\sigma$ калоs, $\delta$, a teacher.
ékeivos, $\eta, 0$, pron., that.
$\dot{\epsilon} \pi a \gamma \gamma \epsilon \lambda i a, \dot{\eta}, a$ promise.

коірш, I judge.

Vocabulary
$\nu$ v̂̀, adv., now.
oưtos, aüTท, toûto, pron., this.
oṽtcs, adv., thus, so.
$\pi 0 \nu \eta \rho o ́ s, ~ a, ~ d \nu, ~ a d j ., ~ e v i l$.
$\pi p o \sigma \omega \pi o \nu, ~ \tau d, ~ a ~ f a c e . ~$
xapá, r̀, joy.
102. The declension of out $\tau$ os, this, is as follows:

Sing.
M. F.
N. oưtos aŭtך tô̂to N. oủtol aủtal taûta
 D. тои́тч taútn тои́тب̣ D. тoútols taútals toútols A. тои̂toע та́́tŋy тои̂to A. tó́tous taútas raîta

The puzzling variations between ov and av in the first syllable of this word mny be fixed in the memory if it be observed that an o-vowel (in the diphthong ov) stands in the first syllable where an o-vowel (o or the long of it, $\omega$ ) stands in the second syllable, and an a-vowel (in the diphthong $a v$ ) stands in the first syllable where an a-vowel ( $a$ or the closely related vowel $\eta$ ) stands in the second syllable.
103. The declension of $\varepsilon$ кeivos, that, is like the declension of adjectives in $-\infty s,-\eta,-o \nu$, except that éneivo stands instead of ekeívov in the nominative and accusative singular neuter.

1．oṽtos and ékềvos are frequently used with nouns． When they are so used，the noun with which they are used has the article，and they themselves stand in the predicate， not in the attributive，position（see §§68－74）．

Examples：This word，oýtos ò dóvos or ó hóyos oûtos；that

 words，ovirol oi hóyol or oi tóyol oítoc；those words，éteivol oi入ó yol or oi $\lambda o ́ \gamma o l$ ékeîvol；this good word，ovitos d ка入ós $\lambda$ óyos or ò ка入ós 入óros oûtos．

2．ồtos and ékeĩpos are frequently used by themselves， without nouns．

Examples：outos，this man（or this person）；aürn，this woman；rô̂ro，this thing；oưrol，these men；aữal，these women；taû̃a，these things．

## 105.

## Further Uses of aitbs．

In addition to its use as a personal pronoun of the third person，autós is also used as follows：

1．It has an intensive use with nouns．When so used it stands in the predicate position．
 apostle himself；aùтो̀ $\dot{\eta} \dot{\epsilon} \kappa \kappa \lambda \eta \sigma^{\prime} a$ or $\eta \dot{\dagger} \dot{\epsilon} k \kappa \lambda \eta \sigma i a$ aúr $\eta$ ，the

2．It is often used with nouns to mean same．When so used it stands in the attributive position．
 same apositle；$\dot{\eta}$ avit $\dot{\eta} \kappa \kappa \lambda \lambda \eta \sigma i a$ or $\dot{\eta} \dot{\epsilon} \kappa \kappa \lambda \eta \sigma i a \dot{\eta}$ a $\dot{\tau} \tau \dot{\eta}$, the same church，etc．

3．In its intensive use it often goes with pronouns or with the unexpressed subject of a verb．

aúròs $\sigma \dot{\cup}$ 入éyets or aírds $\lambda e \hat{\gamma} \epsilon c$ ，thou thyself sayest；auròs $\lambda \epsilon \gamma \in i$ ，he himself says；aútウ̀ $\lambda \in \epsilon \in \iota$ ，she herself says；aùtò
 we ourselves say；aùtai ḋ $\mu \in i ́ s ~ \lambda \epsilon ́ \gamma \epsilon \tau \epsilon ~ o r ~ a u ́ t o l ~ \lambda e ́ ~ \gamma \epsilon \tau \epsilon, ~ y e ~ y o u r-~$ selves say；aúroi $\lambda \epsilon$＇$\gamma o v \sigma t \nu$ ，they themselves say．

106．The principal uses of adjectives and of the pro－ nouns studied thus far may be reviewed es follows：

The good word $=\left\{\begin{array}{l}\dot{o} \text { кa入ós } \lambda o ́ y o s . ~ \\ \text { or } \\ \delta \lambda b \gamma o s \text { ó кa入ós．}\end{array}\right.$

This word

That word

$$
=\left\{\begin{array}{c}
\dot{e} \kappa \in \grave{y} \nu o s \text { ò } \lambda o ́ \gamma o s . ~ \\
\text { or } \\
\dot{o} \lambda \delta \gamma o s \text { ékê̂yos. }
\end{array}\right.
$$

The same word $=\left\{\begin{array}{l}\text { d aírds } \lambda \dot{\text { óyos．}} \\ \text { or } \\ \dot{o} \text { dóros } \dot{o} \text { aútbs．}\end{array}\right.$
My word $\quad=$ d $\lambda o ́ \gamma o s \mu o v$.
His word $\quad=\delta \lambda o ́ \gamma o s a u ̀ t o u$.
$I$ see him $\quad=\beta \lambda e ́ \pi \omega$ aüróv．
I see this man $=\beta \lambda \epsilon \pi \omega$ тoûтov．
$I$ see these things $=\beta \lambda \epsilon \pi \omega \tau a \hat{\tau} a$.

## Exercises

 кака́s.
II. 1. These churches know the Lord Himself. 2. The same disciplea know Him and see His face. 3. Those teachers judge the same churches and lead them into the same joy. 4. We ourselves have this sin in our hearts. 5. This is the love of our God. 6. These are the faithful churches of our Lord. 7. The apostle himself baptizes his brothers and leads them to thee. 8. Through this gospel we have life. 9. On account of these teachers we see death. 10. He Himself knows us and from Him we receive this promise. 11. On account of the same gospel we ourselves send these apostles to you. 12. Into this world he sends the Lord him-
self. 13. I see this man and the brethren see him. 14. Now we are baptizing those disciples of our Lord and are sending the same disciples into the desert. 14. My disciples know my voice and bring these things to me. 15. Through these things we bring the same gospel into the aame world. 16. We are disciples of the Lord, but ye are disciples of the evil one. 17. This sin leads our children into death. 18. The sins of these churches are leading other men into the same sins. 19. His disciples have this sin in their hearts and are teaching men so. 20. I know the sins of the disciples and the disciples themselves.

## LESSON X

Present Middle and Passive Indicative. ind with the Genitive. The Dative of Means. Deponent Verbs. Compound Verbs. The Position of où. Various Cases with Verbs.
108.

## Vocabulary

à $\lambda \lambda a ́, ~ c o n j ., ~ b u t ~(s t r o n g e r ~ \epsilon i \sigma e ́ \rho \chi o \mu a l, ~ d e p ., ~ I ~ g o ~ i n, ~ I ~$ adversative than $\delta \bar{\epsilon}$ ).
àкove, I hear (may take the genitive, but also takes the accusative).

aтокрivoual, dep., I answer (takes the dative).
${ }_{\text {a }} \mathrm{a} \chi \omega$, I rule (takes the genitive); middle, I begin.
rivonal, dep., I become (takes
a predicate nominative, not an accusative).
סıépXoual, dep., I go through.
109. There are three voices in Greek: active, middle and passive.

The active and the passive voices are used as in English.
The middle voice represents the subject as acting in some way that concerns itself, or as acting upon something that belongs to itself.
(1) Rarely the middle has the force which a verb followed by a reflexive pronoun in the objective case has in English. Thus doive means I wash, and doioucu means I wash myself.

But usually the force of the middle is much more subtle. Sometimes, therefore, it is impossible to make any difference in an English translation between active and middle. In the case of some verbs, on the other hand, the difference in meaning is so great that in an English translation it is necessary to use one verb for the active and an entirely different verb for the middle. For example, ă $\rho \chi \omega$ means I rule, and ápxouac (middle) means I begin.
(2) The middle of $\lambda \Delta \omega$ does not occur in the New Testament. But it is very important to learn it, since it will enable the student to recognize the middle of other verbs. The translations given in the paradigms for the middle of $\lambda \dot{\omega} \omega$ serve to indicate, in a rough sort of way, the fundamental meaning of the middle voice, rather than the actual meaning of the middle voice of this particular verb.
(3) In the present tense the middle and passive voices are exactly alike in form, though in certain other tenses they are entirely distinct. In the exercises in this lesson, the forms which might be either middle or passive should be regarded as passive.
110. The Present Middle Indicative of $\lambda i v \omega$ is as follows:

Bing.

1. 入úoual, I loose (or am loosing) for myself.
2. 入ín, thou loosest (or art loosing) for thyself.
3. $\lambda$ detal, he looses (or is loosing) for himself.

Plur.

1. $\lambda v \dot{\rho} \mu \in \theta a$, we loose (or
are loosing)
for ourselves.
2. $\lambda \dot{\lambda} \epsilon \sigma \theta \epsilon$, ye loose (or
are loosing)
for yourselves.
3. $\lambda$ iovial, they loose (or
are loosing)
for themselves.
4. The personal endings in the middle and passive of the so-called primary tenses are $-\mu a \iota,-\sigma a L,-\tau a \iota,-\mu \epsilon \theta a,-\sigma \theta \epsilon$, $-\nu r a c$. Between the stem and the personal endings is placed, in the present tense, the variable vowel o/ $\epsilon$ (o standing before $\mu$ and $\nu, \epsilon$ before other letters). The second person singular, $\lambda i_{\square}$, is a shortened form instead of $\lambda \dot{u} \in \sigma a l .{ }^{1}$
5. The Present Passive Indicative of $\lambda \dot{v} \omega$ is as follows:

Sing.

1. 入úoual, I am being loosed.
2. $\lambda$ in, thou art being loosed.
3. $\lambda$ veral, he is being loosed.

Plur.

1. $\lambda \nu \delta \mu \epsilon \theta a$, we are being loosed.
2. $\lambda \dot{\mu} \epsilon \sigma \theta \epsilon$, ye are being loosed.
3. 入íovtal, they are being loosed.
4. The present active indicative, $\lambda i \omega$, it will be remembered, can be translated either $I$ loose or $I$ am loosing. The passive of $I$ loose, in English, is I am loosed; the passive of $I$ am loosing is $I$ am being loosed. Both $I$ am loosed and I am being loosed might, therefore, have been given in the translation of $\lambda$ íouac (passive). But I am loosed is so ambiguous that the student is advised, at least in the earlier lessons, to adopt the alternative translation. I am loosed may mean I am now in a loosed condition, in which case it indicates a present state resultant upon a past action and would be translated, not by the present tense, but by the perfect tense in Greek.

Example: $\sigma \dot{\jmath} \zeta o \mu a t$ means $I$ am being saved. It represents the action as taking place at the present time. It could also be translated $I$ am saved in such a sentence as every day I am saved from some new trouble. Here I am

[^5]saved is present because it indicates customary action. But in the majority of cases $I$ am saved means $I$ am in a saved condition resultant upon an action that took place in the past. And in these cases the English sentence I am saved would be translated by the perfect tense, not by the present tense, in Greek. It will be seen, therefore, that the translation I am loosed for $\lambda$ jopal, though it is not wrong (since $\lambda$ úoual may sometimes be transiated in this way), would be misleading.

## 114. <br> úró with the Genitive

The preposition $i \pi \delta$ with the genitive expresses the agent by which an action is performed. This usage occurs principally with the passive voice.

Example: $\delta$ àmóatohos $\lambda \in \epsilon t$ tò $\delta o \tilde{\lambda} \lambda o \nu$ means the apostle looses the servant. If the same thought be expressed by the passive voice, the object of the active verb becomes the subject of the passive and the subject of the active verb becomes $\dot{u} \pi \dot{\prime}$ with the genitive. Thus ó $\delta 0$ ûlos $\lambda \dot{\prime} \in \tau a l$ $\dot{u} \pi \dot{o}$ toû $\dot{\alpha} \pi \sigma \sigma$ ódou means the servant is being loosed by the apostle.

## 115.

## The Dative of Means

The simple dative without any preposition sometimes expresses means or instrument.

Examples:
 up by (by means of) the word of the Lord. Compare e' $\gamma \in i \rho o y \tau a l ~ \dot{u} \pi d$ rov̂ kupiou, they are being raised up by the Lord. The comparison will serve to distinguish ù $\pi \delta$ with the genitive (expressing the active personal agent) from the dative expressing means.

入ois, we are leading the servants with their sons with good words. This example will serve to distinguish the dative expressing means from $\mu \epsilon \tau \dot{a}$ with the genitive expressing accompaniment. The two ideas, though they are logically quite distinct, happen often to be expressed by the same preposition, with, in English. $\mu \in \tau$ á with the genitive means with in the sense of in company with; the dative means with in the sense of by means of.

## 116.

## Deponent Verbs

Many verbs have no active forms, but only middle or passive forms with active meaning. These verbs are called deponent.

Example: $\pi$ орєionar is passive in form, like $\lambda$ vo $\mu a$, , but it is active in meaning, like $\lambda i \omega$. It means simply $l$ go or Iamgoing.

## 117. Compound Verbs

Prepositions are frequently prefixed to verbs. The meaning of the verb is modified by the preposition in a way that is often easily understood from the common meaning of the preposition. Sometimes, however, the matter is not $s 0$ simple; sometimes the meaning of the compound verb cannot easily be determined from the separate meanings of its two component parts.

Example: ék means out of, and roociouac means 1 go. Hence èккорєioual means $I$ go out. But the meaning of à покрivoual, I answer, is not easily derived from the meanings of its component parts.

## 118. The Position of ot

The negative, ou, precedes the word which it negatives. And since in the great majority of cases the nega-
tive in a sentence negatives the verb, the normal place of od is immediately before the verb.

Examples: oú $\lambda \dot{u} \omega, I$ do not loose, or $I$ am not loosing; oú入ional, I am not being loosed.

## 119. Various Cases With Verbs

Many verbs take the genitive case and many the dative case to complete their meaning, where the corresponding verbs in English take a direct object.

Examples: ákoive $\tau \hat{\eta} s$ ф $\omega \boldsymbol{\nu} \hat{\eta} s$, I hear the voice (but dкoiv
 $I$ answer the apostle.
120.

## Exercises

${ }^{2}$ The final vowel of $\dot{a} \lambda \lambda \alpha$ is often elided before a word that begins with a vowel. The elision is marked by an apostrophe.
II. 1. These churches are being saved by God from death. 2. I am being saved by Him and am being taught by His word. 3. We are becoming disciples of the good apostle, but ye are not hearing his voice. 4. I am a sinner, but am being taught by the apostles of the Lord. 5. I am an evil servant, but thou art becoming a teacher of this church. 6. The evil men say to those churches that our brethren do not see the fece of the Lord. 7. The world is being destroyed by the word of our God. 8. We know the Lord because we receive good gifts from Him and are being taught by Him in parables. 9. Thou art writing these things to thy brethren and art being saved from thy sin. 10. He is teaching others and is himself being taught by this apostle. I1. That disciple is not answering this prophet, because he does not know his words. 12. Thou art saying to this church that thou art a bad servant. 13. You are abiding in that temple, because you are not servants of the Lord. 14. We do not see the faces of our Lord's disciples, ${ }^{1}$ because we are not in their houses. 15. In our Lord's house are joy and peace. 16. God rules this world by His word. 17. These sinners are not entering into the Lord's house, but are going out into the desert. 18. These words are being written by God to his faithful churches.
${ }^{1}$ The phrase should be turned around into the form, the disciples of our Lord, before it is translated into Greek. A simailar transposition should be made in other similar phrases.

## LESSON XI

Imperfect Active Indicative. Imperfect Indicative of eipi. Accent of $\tilde{\epsilon} \sigma \tau \iota(\nu)$.
121.

Vocabulary
ailpw, I take up, I take away. àvaßalvo, I goup (àva-means up).
 а̀токтєішш, I kill. a $\pi \sigma \sigma \tau \epsilon \lambda \lambda \omega, I$ send ( $\pi \epsilon \mu \pi \omega$ is the general word for send, while $\dot{a} \pi о \sigma \tau \dot{\epsilon} \lambda \lambda \omega$ means $I$ send with a commission).
äpros, $\delta$, a piece of bread, a loaf, bread.
Baivo, I go (the simple verb does not occur in the New Testament, but the compounds with various prepositions are exceedingly common).
Eodic, I eat.
катá,prep. withgen.,against; with acc., according to (катa, of which the original meaning was down, has tóte, adv., then.
many meanings in the New Testament). катаßаiva, I go down. $\mu \dot{\nu} . . . \delta \epsilon$, on the one hand... on the other (used in contrasts, the $\mu \dot{y} y$ often being best left untranslated and the $\delta \dot{\varepsilon}$ being then best translated by but). ouk $\epsilon \tau \iota$, adv., no longer. rapá, prep. with gen., from; with dat., beside, in the presence of; with acc., alongside of.
$\pi а \rho a \lambda а \mu \beta a \nu \omega, I$ receive, $I$ take along.
ouv, prep. with dat., with (a close synonym of $\mu \in \tau \dot{a}$ with gen.). ouvà $\omega$, I gather together.
122. In present time there is no special form of the verb in Greek to indicate continued action-there is no distinction in Greek between I loose and I am loosing. But in past time the distinction is made even more sharply than in English.

The tense which in the indieative is used as the simple past tense is called the aorist. It will be studied in Lesson XIV.

The tense which denotes continued action in past time is called the imperfect.

The aorist active indicative of $\lambda \dot{v} \omega$ means I loosed, etc., whereas the imperfect active indicative means $I$ was loosing, ete. This distinction should be carefully observed.
123. The imperfect active indicative of $\lambda t \omega$ is as follows:

## Sing.

1. Èvuov, I was loosing.
2. Einves, thou wast loosing.
3. $\operatorname{\epsilon } \lambda u \epsilon(v)$, he was loosing.

Plur.

1. É $\lambda$ র́o $\mu \in \nu$, we were loosing.
2. є $\lambda \dot{\cup} \epsilon \tau \epsilon$, ye were loosing.
3. Auov, they were loosing.
4. The imperfect indicative, like the indicative of the other secondary tenses (see $\S 20$, footnote), places an augment at the beginning of the stem of the verb.
5. In verbs that begin with a consonant the augmens sonsists in an prefixed to the stem.

6. In verbs that begin with a vowel, the augment consists in the lengthening of that vowel. But a lengthens not to long a but to $n$.

7. The personal endings in the active of the secondary tenses are as follows:

Sing.

1. $-\nu$
2. $-s$
3. none

Plur.

1. $-\mu \epsilon \nu$
2. $-\tau \epsilon$
3. $-\nu(O \Gamma-\sigma a \nu)$
4. The variable vowel (placed between the stem and the personal endings) is, in the imperfect as in the present, - before $\mu$ and $\nu$ and $\epsilon$ before other letters.
5. The third person singular, é $\lambda u \in(\nu)$, has the movable $\nu$ (under the conditions mentioned in §44).
6. It will be observed that the first person singular and the third person plural are alike in form. Only the context can determine whether einvov means $I$ was loosing or they were loosing.

## Augment of Compound Verbs

131. In compound verbs (see §I17), the augment comes after the preposition and before the stem. If the preposition ends with a vowel, that vowel is usually dropped both before a verb that begins with a vowel and before the augment.

132. It should be observed that the accent does not go back of the augment. Thus $\dot{a} \pi \hat{\eta} \gamma o v$ is correct, not $a ̈ \pi \eta \gamma o \nu$.
133. Imperfect Indicative of ei $\quad$ i i
The imperfect indicative of ci $\mu$ is is as follows:

Sing.

1. $\eta_{\mu} \mu \nu, I$ was.
2. 介s, thou wast.
3. $\eta \nu$, he was.

Plur.

1. गु $\mu \in \nu$, we were.
2. $\ddagger \tau \epsilon$, ye were.
3. गु $\sigma a y$, they were.

## 134.

 Accent of $\epsilon \sigma \tau \iota(\nu)$.After oik and certain other words the third person simgular present indicative of elpi is accented on the first syllable. This does not apply to the other forms of eipi.

## 135.

## Exercises

II. 1. The servent was saying these words against them. 2. According to the word of the apostle, they were going up into the temple. 3. The Lord was in His temple. 4. They were killing our children. 5. Ye were dying in those days on account of the kingdom of God. 6. Thou wast taking away the sins of Thy disciples. 7. The prophet
was sending the same servants into the small house. 8. We are no longer sinners, because we are being saved by the Lord from the sin of our hearts. 9. I was receiving this bread from the apostle's servants. 10. Then he was writing these things to his brethren. 11. In that hour we were in the desert with the Lord. 12. They are good, but they were evil. 13. Thou wast good, but we were sinners. 14. Then I was a servant, but now I am a son. 15. The sons of the prophets were gathering these things together into the temple. 16. Now I am being sent by the Lord to the children of the disciples, but then I was sending the righteous men into the desert.

## LESSON XII

# Imperfect Middle and Passive Indicative Singular Verb with Neuter Plural Subject <br> Uses of kat and oúdé 

а̀лє́рходаt, dep., I go away. oưó́, conj., and not, nor, not

 . . nor.
$\delta \epsilon \chi$ ходац, dep., I receive. е́кторєіодац, dep., I go out. Ép $\rho$ үov, $\boldsymbol{\tau 6}$, a work. ËтL, adv., still, yet.
8í入a
oïr $\omega$, adv., not yet.
$\pi \epsilon \rho l$, prep. with gen., concerning, about; with acc., around.

кal, conj., and, also, even; каi ovvé $\rho$ хоцat, dep., I come to. . kal, both . . and. gether.
in $\epsilon \rho$, prep. with gen., in behalf of; with acc., above.
катєिроцац, dep., I go down.
$\pi$ तoîon, $\tau \hat{c}$, a boat.
137. As in the present tense, so also in the imperfect, the middle and passive voices are alike in form.
138. The imperfect middie indicative of $\lambda i \omega$ is as follows:

Sing.

1. $\bar{\lambda} \nu \nu \delta \mu \eta \nu, I$ was loosing for myself.
2. Eגiou, thou wast loosing for thyself.
3. è̀̀́єтo, he was loosing for himself.

Plur.

1. Eגvó $\mu \in \theta a$, we were loosing
for outselves.
2. $\epsilon \lambda \dot{\lambda} \in \sigma \theta \epsilon$, ye wete loosing
for yourselves.
3. Eגjoyto, they were loosing
for themselves.
4. The personal endings in the middle of the secondary tenses are as follows:

| $\quad$ Sing. | Plur. |
| :--- | :--- |
| 1. $-\mu \eta \nu$ | 1. $-\mu \epsilon \theta a$ |
| 2. $-\sigma 0$ | 2. $-\sigma \theta \epsilon$ |
| 3. -70 | 3. $-\nu \tau 0$ |

140. The variable vowel, as in the active of the imperfect, and in all three voices of the present, is o before $\mu$ and $\nu$ and $\epsilon$ before other letters.
141. In the second person singular, einúv is a shortened form for an original è $\lambda \boldsymbol{v} \tau \sigma$.
142. Great care should be taken to pronounce clearly both the long vowel in the ultima of the form $\begin{gathered}\lambda v o \mu \eta y \\ \text { and }\end{gathered}$ the accent on the penult.
143. The imperfect passive indicative of $\lambda u ́ \omega$ is as follows:

| Sing. |  | Plur. |  |
| :---: | :---: | :---: | :---: |
| èvóspı | I was being |  | , we were being |
|  | loosed. |  | loosed. |
| 2. entou, | thou wast being loosed. | 2. $\lambda \lambda \dot{v} \epsilon \sigma \theta \epsilon$, | ye were being loosed. |
| 3. ®̇úeto, $^{\text {a }}$ | he was being | 3. Ė入ionto, | they were being |

144. Verbs which are deponent in the present are also deponent in the imperfect.

Example: The imperfect indicative of expoual, I come, is $\dot{\eta} \rho \chi$ о́ $\mu \not \eta, I$ was coming.

## 145. The Neuter Plural Subject

A neuter plural subject may have its verb in the singular.

This strange idiom, however, is by no means invariable in New Testament Greek; the neuter plural subject often has its verb in the plural like any other plural verb.

## Uses of kal and oưot

146. The simple connective use of $k a i$, where it means and, has already been studied. But kai has other uses. Frequently it means also or even. When it is thus used, it stands before the word with which it is logically connected. In the case of also, the English order is the reverse of the Greek order; in the case of even, it is the same as the Greek order.

 the law.
147. oùdé, like кai, is often simply connective and means and not or nor. But like kai it has other uses. It often means not even.
 a $2 \lambda \lambda o u$, but this $I$ do not say, nor do the others say it (simple
 $\mu a \theta \eta r a l$, not even the disciples see the glory of God.
148. Finally, kai . . . kal and oưbé . . . oúdé are used correlatively, and mean, respectively, both . . . and, and neither . . . nor.
 סoûhou, both the apostles and the servants say this; (2) roû̃o
 tles nor the servants say this.

## 149.

## Exercises

II. 1. Those words were being heard by the same apostle, but now they are no longer being heard. 2. These books were being written by him in behalf of his servants. 3. I was not yet being taught by this man, but I was leading the others to him. 4. Ye are not above me nor am I above you. 5. Thou wast sending others to him and wast being sent by him to others. 6. The demons were going out of the children. 7. Ye were coming in and going out in the church. 8. We were not yet going away to the sinners, but were still hearing the voice of the apostle and were being taught concerning the Lord out of the books of the prophets. 9. They were going down to the sea
and were going through it in boats. 10. Neither the evil nor the good were answering the Lord. 11. We were both seeing and hearing these disciples. 12. Thou wast being saved by the word of the Lord. 13. Not by your works but by the Lord were ye being saved from your sins. 14. Not even the good are saved by works. 15. Through the word of the Lord we were becoming good disciples. 16. Thou wast not dying in behalf of him, but he was dying in behalf of thee.

## LESSON XIII

Future Active and Middle Indicative
150.

## Vocabulary

look up, I receive $m y$ sight.
 of $\beta$ aiv $\omega$.
रevifoouat, I shall become. dep. fut. of $\gamma$ lvoual.
$\gamma \nu \dot{\omega} \sigma o \mu \alpha \iota, I$ shall know, dep.
fut. of $\gamma / \nu \dot{\omega} \sigma \kappa \omega$.
סidásu, I shall teach, fut. of $\delta \iota \dot{\delta} \epsilon \sigma \kappa \omega$.
$\delta \iota \omega \dot{\omega} \omega$, fut. $\delta \iota \dot{\omega} \xi \omega, I$ pursue, shall go, dep. fut. of ёрхонац.
${ }_{\epsilon} \xi \omega, I$ shall have, fut. of $\neq \chi \omega$ (note the breathing). кпри்ббш, fut. кпрй $\xi \omega$, I proclaim, I preach.
$\lambda \dot{\eta} \mu \psi с \mu a \iota, I$ shall take, dep. fut. of $\lambda a \mu \beta \alpha \nu \omega$.
тробєи́хонац, dep., fut. троaeigoual, I pray.
1 persecute.

151. The present and imperfect tenses, in all three voices, are formed on the present stem, to which the personal endings, being joined to the stem by the variable vowel o/ $\epsilon$, are added.

But the future active and middle are formed on the fulure stem, which is formed by adding the tense suffix $\sigma$ to the stem of the verb. Thus, while $\lambda v$ - is the stem of the verb (which in the case of $\lambda \dot{v} \omega$ is also the present stem), $\lambda \nu \sigma$-is the future stem.
152. The future, being a primary tense, has primary personal endings like the present tense. The variable vowel is also the same. Therefcre the future active and
middle indicative are conjugated exactly like the present active and middle, except that the future has $\lambda v \sigma-$ at the beginning instead of $\lambda \nu$.
153. It will be remembered that in the present and imperfect tenses the middle and passive are alike in form, But in the future the passive is quite different from the middle and will be reserved for a subsequent lesson. $\lambda$ úro$\mu a t$, therefore, means $I$ shall loose for myself, but it does not mean I shall be loosed.
154. The future active indicative of $\lambda \hat{j} \omega$ is as follows:

## Sing.

1. 入úow, I shall loose.
2. $\lambda \dot{U} \sigma \epsilon \mathrm{~s}^{\prime}$, thou will loose.
3. $\lambda \dot{\prime} \sigma \epsilon \iota$, he will loose.

Plur.

1. 入úvoutv, we shall loose.
2. $\lambda$ bбete, ye will loose.
3. $\lambda$ úoovol(y), they will loose.
4. The future middle indicative of $\lambda \dot{6} \omega$ is as follows:

## Bing.

1. $\lambda$ booual, I shall loose
for myself.
2. $\lambda$ ó $\eta \eta$, thou will loose for thyself.
3. $\lambda \dot{v} \sigma \in T a l$, he will loose for himself.

Plur.

1. $\lambda v \sigma \dot{o} \mu \epsilon$, $a$, we shall loose
for ourselves.
2. $\lambda \dot{u} \sigma \epsilon \sigma \theta \epsilon$, ye will loose
for yourselves.
3. Aúgoutal, they will loose
for themselves.
4. Future Active and Middle of Stems Ending in a Consonant

When the stem of a verb ends in a consonant, the addition of the tense suffix $\sigma$ brings two consonants together. The following results then occur:
(1) $\pi, \beta, \phi$ (called labial mutes because they are pro-
nounced by means of the lips) form with the following $\sigma$ the double consonant $\psi$ (ps).

Examples: The future of $\pi \hat{\xi} \mu \pi \omega$ is $\pi \xi \mu \psi \omega$, and of $\gamma \rho \dot{d} \phi \omega$, үра́ $\psi \omega$.
(2) $\kappa, \gamma, \chi$ (called palatal mutes because they are pronounced by means of the palate) form with the following $\sigma$ the double consonant $\xi$ (ks).

Examples: The future of $a \gamma \omega \omega$ is $a \xi \omega$, and of $\alpha \rho \chi \omega, a, a \xi \omega$.
(3) $\tau, \delta, \theta$ (called lingual mutes because they are formed by means of the tongue) drop out before the $\sigma$.

Example: The future of $\pi \epsilon \ell \theta$ is $\pi \epsilon i \sigma \omega$.

## Formation of the Future Stem and Other Tense Stems of Various Verbs

157. In the case of many verbs the verb stem is different from the present stem.

Examples: (1) The verb stem of кпрíб的 is not $\kappa \eta \rho v \sigma \sigma$ but кприк-. From кприк- the future кпрits $\omega$ is formed by the rule given in $\$ 156$. (2) The verb stem of $\beta a \pi r i \xi \omega$ is not $\beta$ antı\}-but $\beta a \pi \tau \iota \delta$-. From $\beta a \pi \tau \iota \delta$ - the future $\beta a \pi \tau i \sigma \omega$ is formed by the rule given in $\$ 156$.
158. In general, the future of a Greek verb cannot certainly be formed by any rules; it must be looked up in the lexicon for every individual verb, so numerous are the irregularities.
159. The Greek verb is for the most part exceedingly regular in deriving the individual forms indicating voice, mood, person and number from the basal tense stems. But the forration of those basal tense stems from the stem of the verb (and still more from the present stem) is often exceedingly irregular. The basal tense stems, from which all the rest of the verb is formed, are six in number. These six, given with the personal ending for the first person singu-
lar indicative, are called the principal parts. So far, only two of the six principal parts of $\lambda \dot{v} \omega$ have been learned. From the first of the principal parts, $\lambda i \omega$, all of the present and imperfect in all three voices is formed; from the second, $\lambda \dot{u} \sigma \omega$, all of the future active and middle. The present and imperfect together form the present system; the future active and middle form the future system.
160. The regularity of the Greek verb in making the individual forms within each tense system from the first form of the tense syatem, and the great irregularity in making the first forms themselves, may be illustrated by the very irregular verb é $\rho \chi о \mu a \iota$. The student would certainly never have expected that the future of $¢ \rho \chi o \mu a l$ would be ècícoual; but once he has learned from the lexicon that eגeifoual is the first person singular of the future, the third plural, èevooytal, for example, can be derived from it exactly as 入úgovtal is derived from $\lambda \dot{u} \sigma o \mu a l$, which in turn is derived from $\lambda \dot{\prime} \sigma \boldsymbol{\sigma} \omega$.
161. From this point on, it will be assumed that the student will use the general vocabularies at the back of the book. The method of using them may be illustrated as follows:
(1) Suppose it is desired to translate they will begin into Greek. The first step is to look up the word begin in the English-Greek vocabulary. It is there said that begin is expressed by the middle voice of $\alpha \rho \chi \omega$. The next step is to look up the word ${ }^{\circ} \rho \chi \omega$ in the GreekEnglish vocabulary. With it, in the Greek-English vocabulary, the principal parts are given. The second of the principal parts is the future $\mathfrak{a} \rho \xi \omega$. It is the future which is desired, because they will begin is future. But it is the middle voice of ajpx which means begin. Therefore we are looking for the future middle indicative

## 78

(third person plural). That can be derived from áp ${ }^{\xi} \omega$ after the analogy of $\lambda \dot{v} \omega$. If the paradigm of $\lambda \dot{v} \omega$ be consulted, it will be discovered that the future middle indicative, third person plural, is formed from the second of the principal parts by retaining the $\lambda v \sigma-$ of $\lambda \dot{v} \sigma \omega$ and putting on -oviat instead of $-\omega$. Treating $a p \xi \omega$ in the same way, we
 desired.
(2) If the form $\sigma \dot{\omega} \sigma \epsilon \iota$ is found in the Greek-English exercises, the student will naturally guess that the second $\sigma$ is the sign of the future just as the $\sigma$ is in $\lambda \dot{v} \sigma \epsilon$. He will therefore look up verbs beginning with $\sigma \omega-$. Without difficulty $\sigma \dot{\omega} \zeta \omega$ will be found, and its future (the second of the principal parts) is discovered to be $\sigma \dot{\omega} \sigma \omega$, of which, of course, $\sigma \dot{\omega} \sigma \epsilon t$ is simply the third person singular.
(3) Similarly, if the student sees a form a $\xi \omega$ he should at once surmise that the $\sigma$ concealed in the double consonant $\xi$ is the $\sigma$ of the future. The present, therefore, will naturally be ăku or $a \gamma \omega$ or $\mathfrak{a} \chi \omega$. It may be necessary to try all three of these in the vocabulary until it be discovered that ${ }^{2} \gamma \omega$ is correct.

Of course these processes will soon become second nature and will be performed without thought of the individual steps.
162. The more difficult forms will be listed separately in the vocabularies, with references to the verbs from which they come.
163. But the forms of compound verbs will not be thus listed. For example, if the student sees á $\pi \epsilon \lambda \epsilon \dot{\sigma} \sigma \epsilon \sigma \theta \in$ in the exercises, he should observe that $\dot{d} \pi$ - is evidently the preposition $\dot{\alpha} \pi b$ with its final vowel elided. The simple verb form, then, with the preposition removed, is $\ell \lambda \in \dot{\sigma} \sigma \epsilon \sigma \theta c$. The first person singular would be Aejoorac. This form
will be found in the Greek-English vocabulary and will be designated as the future of ${ }^{\prime \prime} \rho$ ро $\mu a l$. Therefore, since énci-
 ant $\rho$ Xoual, and that is the verb which the student must finally look up.

## 164. Deponent Future of Certain Verbs

Some verbs are deponent in one tense but not in another. Examples: $\beta$ aiv $\omega$ has a future of the middle form, $\beta \eta$ jooual. It is thus deponent in the future but not in the present.

## 165.

## Exercises

[^6]
 aúrós.
II. 1. The Church will send servants to me. 2. These women will become good. 3. These words I shall write in a book. 4. These things will come into the world in those days. 5. Now he is not yet teaching me, but in that hour he shall both teach me and know me. 6. They were pursuing these women in the evil days, and they will pursue them even into the other places. 7. Then will blind men pray to the Lord, but evil men will not pray. 8. The gifts were being taken by us from the children, but we shall take them no longer. 9. We shall pray for (in behalf of) the same children in the Church. 10. In this world we have death, but in the kingdom of God we shall have both love and glory. 11. Then we were being taught by the apostles, but in that day we also shall teach. 12. In those days I was persecuting you, but now ye shall persecute me. 13. Thou wilt not go down to the sea, but wilt pursue these women with their children into the desert. 14. They were preaching this gospel, but now they will no longer preach it. 15. These things are evil, but you will have good things in that day. 16. The Lord will come to His Church inglory.

## LESSON XIV

## First Aorist Active and Middle Indicative Constructions with $\pi \iota \sigma \tau \epsilon \dot{\omega} u$.

166. I release.
éкйpu弓a, I preached, I proclaimed, aor. of кпрv́arow.
 orpeqa, I turn, I return.
 $\sigma a, 1$ prepare. $\bar{\eta} \delta \eta$, adv., already.
$\theta a \nu \mu \hbar \zeta \omega, \theta a \nu \mu \delta \sigma \omega, \varepsilon \theta a \dot{\mu} \mu a \sigma a$,

## Vocabulary

 der at. тєuaa, I heal.
 suade.
$\pi เ \sigma \tau \epsilon \dot{j} \omega, \pi \iota \sigma \tau \epsilon \dot{j} \sigma \omega$ émiatevoa, I believe.
 oт $\rho \in \psi$ a, I return.
167. The first aorist is not a different tense from the second aorist, which will be studied in the next lesson, but first aorist and second aorist are merely two different ways of forming the same tense of a verb. Thus the English $I$ loved is not a different tense from I threw, but the verb love and the verb throw form the "preterit" (simple past tense) in two different ways.
168. The aorist is like the imperfect in that it refers to past time. But the imperfect refers to continuous action in past time, while the aorist is the simple past tense. Thus the imperfect $\lambda \lambda$ ooy means I was loosing, while the aorist êduaa means I loosed. It will be remembered that in present time this distinction between the simple assertion of the act and the assertion of continued (or repeated) action is not made in Greek ( $\lambda \dot{v} \omega$, therefore, means either I loose or I am loosing). But in past time the distinction
is very carefully made; the Greek language shows no tendency whatever to confuse the aorist with the imperfect.
169. It should be observed, however, that the aorist tense is often translated by the English perfect. Eגvoa, therefore, may mean I have loosed as well as I loosed. The Greek perfect, which will be studied in Lesson XXIX, though it is indeed often to be translated by I have loosed, has a very different range from that of this English tense. Where the English I have loosed merely asserts that the action has taken place in past time without any implications as to its present results, it is translated by the Greek aorist.
 voice. This sentence merely asserts that the action has taken place at some unspecified time in the past. But if a then were added, and thus the interval between the past action and the present time when the assertion is being made were clearly marked, the English would have
 would be translated then ye heard my voice.
170. The context will usually determine quite clearly whether a Greek aorist is to be translated in English by the simple past tense (e.g. I loosed) or by the perfect tense (e.g. I have loosed). The former translation should be adopted in the exercises unless it is perfectly certain that the other is intended. What the student needs to understand first is that the aorist is the simple past tense.
171. The first aorist active indicative of $\lambda \ell \omega$ is as follows:

## Sing.

1. Ềluara, I loosed.
2. ÉAvaas, thou loosedst.
3. $\epsilon \lambda \nu \sigma \epsilon(\nu)$, he loosed.

Plur.

1. è̀úvajev, we loosed.
2. è̉úaate, ye loosed.
3. Alduad, they loosed.
4. The aorist, being a secondary tense (like the imperfect), has the augment. The augment is the same for the aorist as it is for the imperfect (see $\$ \$ 124-126$ ).
5. The aorist, like the imperfect, has the secondary endings. It will be remembered (see §127) that these, in the active voice, are as follows:

Sing.

| 1. | $-\nu$ | 1. | $-\mu \epsilon \nu$ |
| :--- | :--- | :--- | :--- |
| 2. | -5 | 2. | $-\tau \epsilon$ |
| 3. none | 3. | $-\nu$ (or $-\sigma a \nu)$. |  |

174. It should be observed that in the first aorist the $y$ is dropped in the first person singular.
175. Before these personal endings, there stands, in the aorist, not a variable vowel, but the tense suffx, $\sigma a$, which is added to the stem of the verb. Thus, where the future has $\sigma 0 / \epsilon$, the first sorist has $\sigma a$.
176. In the third person singular this $\sigma a$ is changed to
 the imperfect.
177. The form $\dot{\lambda} \dot{u} \sigma a \mu \epsilon \nu-$ to take it as an example -may be divided as follows: $t / \lambda \dot{v} / \sigma a / \mu \in \nu$. $\boldsymbol{\epsilon}$ is the augment, $\lambda v$ is the stem of the verb, $\sigma a$ is the sign of the first sorist, and $\mu \in \nu$ is the secondary personal ending in the first person plural active.
178. The first aorist middle indicative of $\lambda \dot{v} \omega$ is as follows:

| Sing. |  | Plur |  |
| :---: | :---: | :---: | :---: |
|  | I loosed |  | , we loosed |
|  | for myself. |  | for ourselves. |
| 2. $\hat{\lambda} \lambda \dot{\nu} \sigma \omega$, | thou loosedst |  | ye loosed for |
|  | for thyself. |  | yourselves. |
| 3. ė\ı̇́ato, | he loosed for himself. | 3. enurauto; | they loosed for themselves. |

179. As in the future tense so in the aorist tense, the passive voice is entirely distinct in form from the middle. € $\lambda \nu \sigma a ́ \mu \eta \nu$, therefore, means I loosed for myself, but it does not mean I was loosed.
180. Like the aorist active, the aorist middle has the secondary personal endings. It will be remembered (see §139) that in the middle these secondary personal endings are as follows:

|  | Sing. |  | Plur. |
| :--- | :--- | :--- | :--- |
| 1. | $-\mu \eta \nu$ | 1. | $-\mu \epsilon \theta a$ |
| 2. | $-\sigma 0$ | 2. | $-\sigma \theta \epsilon$ |
| 3. | $-\tau 0$ | 3. | $-\nu \tau 0$ |

181. These are preceded, as in the active, by the tense suffix, $\sigma a$. No changes occur except in the second person singular, where $\dot{\epsilon} \lambda t \sigma \omega$ is a shortened form for an original èúgaro.
182. The form $\begin{gathered}\text {. } v \sigma \dot{d} \mu e \theta a \text { - to take it as an example }\end{gathered}$ -is made up as follows: $\varepsilon / \lambda v / \sigma \dot{d} / \mu \epsilon \theta a$. $\epsilon$ is the augment, $\lambda v$ is the stem of the verb, $\sigma a$ is the tense suffix, $\mu \epsilon \theta a$ is the secondary personal ending in the first person plural middle.
183. The changes caused by the joining of the $\sigma a$ of the first aorist tense suffix to the stems of various verbs are like those caused by the $\sigma 0 / \epsilon$ of the future. As in the case of the future, however, it cannot be predicted with certainty what the aorist of a Greek verb will be. Every verb must be looked up in the lexicon separately. For this purpose the student should use the general vocabulary at the end of the book in the manner described in §§161-163. Only, for the aorist active and middle, we shall be interested in the third of the principal parts, not in the second.
184. 

Constructions with $\pi / \sigma \tau \epsilon \dot{j} \omega$
The verb $\pi \iota \sigma \tau \epsilon \dot{\omega} \omega$ takes the dative. Thus $\pi / \sigma \tau \varepsilon \dot{j} \omega \tau \hat{̣}$ a $\quad \mathrm{\theta} \theta \mathrm{p} \dot{\omega} \pi \varphi$ means $I$ believe the man.
The verb $\pi L \sigma \tau \epsilon \delta \omega$ followed by els with the accusative is to be translated by $I$ believe in or on. Thus $\pi เ \sigma \tau \in \dot{d} \omega$ cis tò kípoo means I believe in the Lord or I believe on the Lord. It must not be supposed, however, that the preposition $\epsilon$ f with the accusative here really means in like $\begin{gathered} \\ y\end{gathered}$ Greek language merely looks at the act of believing in a different way from the English; Greek thinks of putting one's faith into some one.

## 185.

## Exercises

II. 1. We did not receive the gospel, because we did not hear the voice of the apostle. 2. In those days we were not believing in the Lord, but this disciple persuaded us. 3. The sinner turned unto the Lord, and already is being taught by Him. 4. The servants have prepared houses for you. 5. This blind man believed in the Lord. 6. The children wondered, and the disciples believed. 7. Thou didst not pray to the Lord, and on account of this He did not beal thee. 8. Those evil men pursued these women into the desert. 9. I have preached the gospel to them. 10. Ye persecuted me, but I did not persecute you. 11. These blind men glorified the Lord, because he had healed ${ }^{1}$ them. 12. Through His disciples He proclaimed His gospel to the world. 13. The promises are good, and we received them. 14. Ye have received the same promises and believed on the same Lord. 15. He has not preached the gospel nor does be preach it now. 16. That woman has neither glorified the Lord nor received the children.

IThe English pluperfect is often to be tranalated by the Greek aorist.

## LESSON XV

Second Aorist Active and Middle Indicative
186.

1In the New Testament，fifou has，in the indicative，almost exclu－ gively first aorist endings，instead of second sorist endings，and in other verbs also first norist endings are often placed on second aorist stems． See J．H．Moulton，A Grammar of New Testhment Greek，Vol．II，1920， ＂Accidence and Word Formation＂，edited by W．F．Howard，pp．208f，， note 1 ．It is therefore rather a concession to weakness when $\epsilon \hat{i} \delta 0 \nu$ etc．are here treated as second aorists throughout．But this procedure will probably be better until the nature of the second aorist becomes thoroughly familiar to the student．The first acrist endings can after－ wards easily be recognized when they occur．Compare $\$ 521$.
187. It has already been observed that the second aorist is not a different tense from the first norist, but only a different way of forming the same tense. Very few verbs, therefore, have both a first aorist and a second aorist, just as very few verbs in English form their preterit both by adding -ed and by making changes within the body of the word.

Thus the preterit of live is lived, and the preterit of rise is rose, but live has no preterit love, nor has rise a preterit rised. The uses of the tense lived are exactly the same as the uses of the tense rose. So also in Greek the uses of the second aorist are exactly the same as the uses of the first aorist.
188. It cannot be determined beforehand whether a verb is going to have a first aorist or a second aorist, nor if it has a second aorist what the form of that second aorist will be. These matters can be settled only by an examination of the lexicon for each individual verb.
189. The second aorist system (consisting of all moods of the second aorist ective and middle) differs from the present system (consisting of all moods of the present and imperfect active, middle and passive), not by adding - $\sigma a$ or any other tense suffix to the stem of the verb, but by differences, as over against the present, within the body of the word. Usually these differences mean that the second aorist has gotten back nearer to the real, fundamental verb stem than the present has.

Examples: (1) $\lambda a \mu \beta \alpha \nu \omega$ has a second aorist $\ell \lambda a \beta o \nu, \lambda a \beta-$ being the second aorist stem and $\lambda_{a \mu \beta a \nu-t h e ~ p r e s e n t ~ s t e m . ~}^{\text {a }}$ (2) $\beta \alpha \lambda \lambda \omega$ bas a second aorist $\notin \beta a \lambda o \nu, \beta a \lambda$ - being the second aorist stem and $\beta a \lambda \lambda$ - the present stem.
190. Upon the second aorist stem are formed the second aorist active and middle. The aorist passive of all verbs
is different from the aorist middle, whether the aorist middle is first aorist or second aorist. Eגı $\pi b \mu \eta \nu$, therefore, the aorist middle of $\lambda e i \pi \omega$, does not mean $I$ was left. In order to translate I was left, an entirely different form, the aorist passive, would be used.
191. The second aorist, being a secondary tense, has an augment, which is just like the augment of the imperfect. Thus a second aorist atem like $\lambda_{\iota \pi}$ - (of $\left.\lambda e i \pi \omega\right)$, which begins with a consonant, prefixes $\boldsymbol{\epsilon}$ to make the augment (the stem $\lambda \iota \pi$-, thus making ${ }^{\prime \prime} \lambda เ \pi \frac{1}{}$ ), while a second aorist stem like e $e \lambda \theta$-, which begins with a vowel, lengthens that vowel (the stem $\epsilon \lambda \theta$ - thus making $\eta \lambda \lambda \theta o \nu)$.
192. The second aorist, being a secondary tense, has secondary personal endings. Between these and the stem comes the variable vowel o/e exactly as in the present and imperfect. The second aorist indicative, therefore, is conjugated exactly like the imperfect, except that the imperfect is formed on the present stem, while the second aorist indicative is formed on the second aorist stem. Thus E $\lambda \epsilon l \pi o \mu \epsilon \nu$ means we were leaving (imperfect), whereas èi inouey means we left (second aorist). Sometimes a single letter serves to distinguish imperfect from second aorist. दُ $\beta \dot{\alpha} \lambda \lambda \lambda^{\prime} \mu \epsilon \nu$, for example, means we were throwing (imperfect), whereas $\dot{\beta} \beta \dot{\alpha} \lambda о \mu \epsilon y$ means we threw (second eorist).
193. The second aorist active indicative of $\lambda e i \pi \omega$, $I$ leave, is as follows:

Sing.

2. éncmes, thou leftst.
3. $\epsilon \lambda \iota \pi \epsilon(\nu)$, he left.

Plur.

1. $\begin{aligned} & \lambda i \pi \sigma \mu \in \nu, \text { we left. }\end{aligned}$
2. $\bar{\lambda} \backslash \tau \epsilon \tau \epsilon$, ye left.
3. Ë̀ıтov, they left.
4. The second aorist middle indicative of $\lambda \epsilon i \pi \omega$ is as follows:

| Sing. | Plur. |
| :---: | :---: |
| 1. $\lambda \lambda<\pi \delta \mu \pi \eta$ |  |
| 2. è $\lambda$ itou | 2. $\epsilon \lambda i \pi \epsilon \sigma \theta \epsilon$ |
| 3. Èíteto | 3. èimoyto |

195. 

## Exercises

II. 1. We did not see Him, for we were not yet disciples of Him. 2. The apostle brought the sinners to Him. 3. Ye did not hear me, but ye came to my disciples. 4. Ye eatered into this house, but the others went out of it. 5. The sinners were going into their houses, but the apostles saw the Lord. 6. In those days we shall see the Lord, but in the evil days we did not see Him. 7. Thy brothers were taking gifts from the children, but the apostles took the children from them. 8. You became a servant of the apostle, but the apostle became to you even a brother. 9. Ye have become a church of God, for ye have believed on His Son. 10. He has gathered together His disciples into His kingdom. 11. The faithful teacher said that the Lord is good. 12. They believed in the Lord and brought others also to Him. 13. They heard the children and came to them. 14. We received joy and peace from God, because we were already entering into His kingdom. 15. The disciples say that the apostles saw the Lord and received this from Him. 16. You went out into the desert, but the apostle said these things to his brethren.

## LESSON XVI

Aorist Passive Indicative. Future Passive Indicative
196.
à $\nu a \lambda a \mu \beta \dot{\alpha} \nu \omega$, I take up.
$\epsilon \beta \lambda \eta \theta \eta \nu, I$ was thrown, I was cast, aor. pass. of $\beta a \lambda \lambda \omega$.
'ं $\gamma \in \boldsymbol{\prime} \dot{\eta} \eta \eta \nu$, I became, aor., pass.
in form, of $\begin{aligned} \\ \text { ivouat. }\end{aligned}$
दौ $\gamma \nu \omega ̈ \sigma \theta \eta \nu, I$ was known, aor. pass. of $\gamma \check{\nu} \omega \sigma \kappa \omega$.
 pass. of $\delta \delta \delta \dot{a} \sigma K \omega$.
ėknó $\chi \theta \eta \nu, I$ was preached, $I$ was proclaimed, zor. pass. of кпри́ $\sigma \sigma \omega$.
ѐ $\lambda \dot{\eta} \mu \phi \theta \eta \nu, I$ was taken, aor. pess. of $\lambda \alpha \mu \beta a \nu \omega$.

Vocabulary
є́тореটӨ $\eta$, I went, aor., pass-
ive in form, of $\pi о р \in \dot{i}$ opal. $\dot{\eta} \gamma \varepsilon \rho \theta \eta \nu, I$ was raised, aor. pass. of é $\gamma \in$ lipw. $\grave{\eta} \kappa 0 \dot{u} \sigma \theta \eta \nu, I$ was heard, aor. pass. of àkolu.
$\dot{\eta} \nu \in \chi \theta \eta \nu, I$ was borne, $I$ was
brought, aor, pass of $\phi e ́ \rho \omega$.
$\eta ँ \chi \theta \eta \nu, I$ was led, aor. pass. of $a \gamma \omega$.
ॐфөך,$I$ was seen, aor. pass. of $\beta \lambda \lambda^{\prime} \pi \omega$ (may also be regarded as aor. pass. of d $\rho a ́ \omega)$.
197. The aorist passive indicative and the future passive indicative are formed on the aorist passive stem, which appears in the sixth place among the principal parts. The fourth and fifth of the principal parts will be studied in a subsequent lesson.
198. The aorist passive stem is formed by adding $\theta \epsilon$ to the verb stem. This $\theta \epsilon$ is lengthened throughout the indicative to $6 \eta$. Thus the aorist passive stem of $\lambda \hat{\omega} \mathrm{ap}-$ pears as $\lambda v \theta \eta$--
199. The arrist being a secondary tense, the augment, formed exactly as in the case of the imperfect (see $\S \S 124-$ 126), is prefixed to the tense stem, and the secondary per-
sonal endings are added．These personal endings are of the active form（see §127），and are like those which are used in the imperfect active indicative except that in the third person plural the alternative ending $-\sigma \alpha \nu$ is chosen instead of $-\nu$ ．In the aorist passive indicative；the personal end－ ings are added directly to the tense stem，without any vari－ able vowel intervening．

200．The future passive indicative is formed by adding $-\sigma 0 / \epsilon$ to the aorist passive stem（with its $\theta \epsilon$ lengthened to $\theta \eta$ ），which，however，since the future is a primary not a secondary tense，has in the future no augment．To this future passive stem，$\lambda_{\nu} \theta \eta \sigma o / \epsilon$ ，the middle primary end－ ings are added，and the future passive is conjugated exactly like the future middle except that the stem is $\lambda u 0 \eta \sigma o / \epsilon$ instead of $\lambda \nu \sigma 0 / \epsilon$ ．

201．The aorist passive indicative of $\lambda \dot{v} \omega$ is as follows：

Sing．
1．$\dot{e} \lambda i \not i \eta \eta, I$ was loosed．
2．Eौi íns，thou wast loosed．2．è $\lambda \theta \eta \tau \epsilon$ ，ye were loosed．
3．èivin ，he was loosed．

Plur．
1．$e \lambda \angle \theta \eta \mu \in \nu$ ，we were loosed．

3．AiA酒av，they were loosed．

202．The future passive indicative of $\lambda \hat{i} \omega$ is as follows：

Sing．
Plur．
1．$\lambda \nu \dot{\theta} \dot{\eta} \sigma o \mu a l, I$ shall be loosed．
 loosed．
3．$\lambda \cup \hat{\eta} \dot{\prime} \sigma \tau a \iota$ ，he will be loosed．

1．$\lambda \cup \theta \eta \sigma o ́ \mu \epsilon \theta a$ ，we shall be loosed．
2．$\lambda \nu \dot{\eta} \sigma \in \sigma \theta \epsilon$ ，ye will be loosed．
3．入u访боутal，they wrill be
loosed．

203．The uses of the parts of the verb which have been atudied so far may be summarized as follows：

| Present <br> Indicative | Active．$\lambda i \omega$ | $=\left\{\begin{array}{l} I \text { loose. } \\ \text { or } \\ I \text { am loosing. } \end{array}\right.$ |
| :---: | :---: | :---: |
|  |  | I loose for myself． |
|  | Middle．入ípua | $=\left\{\begin{array}{c} \text { or } \\ I \text { am loosing for myself. } \end{array}\right.$ |
|  | Passive．入jouaı | $=I$ am being loosed． |
| Imperfect Indicative | （Active．${ }^{\text {enduov }}$ | $=I$ was loosing． |
|  | $\left\{\begin{array}{l}\text { Middle．} \dot{e} \lambda \nu \dot{\prime} \mu \eta \eta \nu \\ \text { Passive．} \bar{\lambda} \lambda \nu \dot{\mu} \mu \eta \nu\end{array}\right.$ | $=I$ was loosing for myself $=I$ was being loosed． |
| Future Indicative | （Active．$\lambda$ 人̇́ow | I shall loose． |
|  | Middle．入úлоцаи | $=I$ shall loose for myself |
| Aorist Indicative | （Active．${ }^{\text {che }} \lambda \nu \sigma \sigma$ | $=I$ loosed． |
|  |  | $=I$ loosed for myself． |
|  | Passive．è $\lambda \dot{\prime} \dot{\theta} \eta \mathrm{L}$ | $=I$ was loosed． |

Formation of Aorist Passive Stems of Verbs Whose Verb Stems End in a Consonant
204．Before the $\theta$ of the aorist passive tense－suffix，a final $\pi$ or $\beta$ of the verb stem is changed to $\phi$ ，a final $\kappa$ or $\gamma$ is changed to $\chi$ ，and a final $\tau$ ，$\delta$ ，or $\theta$ is changed to $\sigma$ ．The changes in the case of $\pi, \beta, \kappa, \gamma$ can be re－ membered if it be observed that $\theta$ is equivalent to th and that what the changes amount to is adding on an $h$ to the preceding letters so as to make them conform to the $t h$ ． Thus before th，$p$ or $b$ becomes $p h$ ，and $k$ or $g$ becomes ch．

Examples：The aorist passive of $\pi \dot{\epsilon} \mu \pi \omega$ is $\dot{\epsilon} \pi \dot{\epsilon} \mu \phi \theta \eta \nu$ ，of ä $\gamma \omega$ ，グ $\chi \theta \eta \nu$ ，of $\pi \epsilon i \theta \omega$, è $\pi \epsilon i \sigma \theta \eta \nu$ ．
205．Like the other principal parts，however，the aorist
passive of a Greek verb cannot be formed with any certainty on the basis of general rules, but must be noted for each verb separately.

## 206.

## Second Aorist Passive

Some verbs have a second aorist passive instead of a first aorist passive. This second aorist passive is conjugated in the indicative exactly like a first aorist passive. But it has no $\theta$ in the tense stem.

Erample: The second aorist passive indicative of $\gamma \rho a ́ \alpha \phi \omega$
 фпбау.

## Aorist and Future of Deponent Verbs

207. Some deponent verbs have passive, not middle, forms.
Example: The aorist of aтокрivopal, I answer, is ame крit $\quad \eta \nu, I$ answered. ${ }^{1}$
208. Some deponent verbs bave both middie and passive forms.

Example: The aorist of rivoual, I become, is either
 ${ }^{6} \gamma \in \nu \dot{\eta} \theta \pi \eta$ mean exactly the same thing, both the middle and the passive forms having active meaning.

## 209.

## Exercises

II. 1. This is the Church of God, but the sinners were brought into it. 2. This man was cast out on account of the gospel. 3. I was sent to the sinners, but you were being sent to your brothers. 4. Thou didst not receive the gospel, but the others received it and were saved. 5. These words have been written by the apostles. 6. The servants will come into the house, but the sons were baptized in that hour. 7. Ye will see the Lord in heaven, but the apostles were taught by Him. 8. The disciples brought the blind men to the Lord, but the children were led by others. 9. The gifts were being received from the servants, but the law was proclaimed to the world. 10. A place was prepared for the brethren. 11. We went to the sea, but our sons will go into the temple. 12. After these things, they were taken up into glory. 13. The Son of Man was raised up from the dead ${ }^{2}$ and was glorified. 14. The promises of God were heard in the world.
The article is ofter omitted with $\kappa \delta \sigma \mu 0$. See 8311 .
2 From the dead, Eк vexpûv.

## LESSON XVII

## The Third Declension

210. 

## Vocabulary

aycos, a, ov, adj., holy; oi è $\lambda \pi i_{5}, \dot{e} \lambda \pi i \delta o s, \dot{\eta}$, a hope.
aryou, the saints.
aโ $\mu a, ~ a l \mu a \tau о s, ~ \tau \dot{c}$, blood.
aicùy, aî̀pos, $\delta$, an age; єis
tòv aî̀pa, for ever: eis roùs
aī̂vas $\tau \hat{\omega} \nu$ ald่ and ever.
¿ $\rho \chi \omega \nu$, ă $\rho \chi$ оитоs, ó, a ruler. үрадцда, үод́ддатоs, то́, а letter.
211. The declensions of (1) Ei $\lambda$ tis, $\lambda \lambda \pi l \delta o s$, t, a hope,
 ruler, are as follows:

212. The case endings in the third declension are as follows:

|  | Sing. |  | Plur. |
| :--- | :--- | ---: | :--- |
| N. | $-s$ or none. | N. V. | $-\epsilon 5$ |
| G. | $-o s$ | G. | $-\omega \nu$ |
| D. | $-\iota$ | D. | $-\sigma \iota$ |
| A. | $-a$ | A. | $-a s$ |
| V. Like nominative | - |  |  |
|  | or none. |  |  |

213. These case endings are added to the stem, and the stem can be discovered, not from the nominative, as is possible in the first and second declensions, but only by dropping off the os of the genitive singular. Thus the genitive singular must be known before any third declension noun can be declined.
214. It will be observed that both in the accusative singular ending and in the accusative plural ending the $a$ is short. The dative plural $-\sigma_{L}(\nu)$ may have the movable $\%$. (See 844.)
215. The nominative is formed in various ways, which it will probably be most convenient not to try to classify.
216. The vocative also is formed differently in different nouns. It is very often like the nominative.
217. In the dative plural the combination of consonante formed by the -ot of the case ending coming after the final consonant of the stem causes various changes, which are in general the same as those set forth in §I56. But where two consonants, as vr, are dropped before the following $\sigma$, the preceding vowel is lengthened, 0 , however, being lengthened not to $\omega$ but to ou. So in apxourb( $\nu)$, the dative plural of áp $\alpha \omega \nu$.
218. The gender of third declension nouns, except in the case of certain special classes like the nouns in $-\mu a$, - $\mu$ aros, cannot easily be reduced to rules, and so must be learned for each noun saparately.
219. Thus if the student is asked what the word for flesh is, it is quite insufficient for him to say that it is $\sigma \dot{d} \rho \xi$. What he must rather say is that it is $\sigma a j p \xi$, oapkós, feminine. Without the genitive singular, it would be impossible to determine the stem; and unless the stem is known, of course the noun cannot be declined. And without knowing the gender, one could not use the word correctly. One could not tell, for example, whether $\delta \sigma \alpha^{\circ} \rho \xi$ or $\eta$ t $\sigma a ́ \rho \xi$ or $\tau \delta \sigma d \rho \xi$ would be correct.
220. These two difficulties, coupled with the difficulty of the dative plural, make the third declension more diffcult than the first and second. Otherwise the declension is easy, when once the case endings have been thoroughly mastered and have been distinguished clearly from those of the other two declensions.

## 221. Monosyllables of the Third Declension

Monosyllabic nouns of the third declension have the accent on the ultima in the genitive and dative of both numbers. In the genitive plurel it is the circumfex.

This rule is an exception to the rule of noun accent. In accordance with the rule of noun accent, the accent would remain on the same syllable as in the nominative singular so nearly as the general rules of accent would permit.

## 222.

 Nouns in - $\mu a$An important class of nouns in $-\mu a$, with stems ending in - $\mu a t$, are declined like $\partial \nu o \mu a$. These nouns are all neuter. The declension of ăעона, bvбцатоs, $\tau \delta$, a name, is as follows:

Sing.
N. A. V. дуода
G. bvópatos
D. $3 \nu b \mu a \tau \downarrow$

Plur.
N. A. V. іудлата
G. д̀ дода́тшу
D. $\dot{\nu}^{\boldsymbol{\nu}} \mu \mu a \sigma \iota(\nu)$

Since or ơoua is a neuter noun, it has its accusative and vocative of both numbers like the nominative, and its nominative, accusative, and vocative plural ending in a. (See §42.)
223. The declensions of other third-declension nouns will be found in §§559-566, and can be referred to as they are needed.
224. Exercises

II. 1. By the will of God we believed on the name of the Lord. 2. The rulers did not receive this hope from the apostle, because they did not believe in the Lord. 3. We shall know the will of God for ever. 4. In this age we have death, but in that age hope and life. 5. In our flesh we remain in this age, but through the Spirit of God we have a good hope. 6. By the will of God we were saved from our sins through the blood of the Lord. 7. In those days ye saw the rulers. 8. This age is evil, but in it we have hope. 9. These words we wrote to the rulers. 10. We came to the good ruler and to the apostie of the Lord. 11. In our bodies we shall see death, but we shall be raised up according to the word of God. 12. Ye were persecuted by the ruler, but the blood of the Lord saves you from sin. 13. We wrote those good words to the evil ruler. 14. This night became to them an hour of death, but they believed on the name of the Lord. 15. The evil spirits were cast out by the word of the Lord.

IIn phrases such as $\dot{e} \nu \nu u k J$ and $\bar{v} \nu \dot{\eta} \mu E \in \rho a$, the article is often
omitted.

## LESSON XVIII

Present Participles．Use of Participles
225.

## Vocabulary

$\pi \rho o \sigma^{\prime} \rho \chi \circ \mu a$, dep．，I come to，$\measuredangle \nu$ ，oủfa，$\delta \nu$, being，present
I go to，with dative．participle of eipl（for de－ clension，see $\$ 580$ ）．

226．The declension of $\lambda \dot{\dot{v}} \omega \boldsymbol{\nu}, \lambda \dot{v} o u \sigma a, \lambda \hat{v} o v$, loosing，the present active participle of $\lambda \dot{u} \omega$ ，is as follows：

Sing．

|  | M． | F． | N． |
| :---: | :---: | :---: | :---: |
| N．V． | $\lambda \dot{d}$ | $\lambda$ jovora | $\lambda$ र̂ov |
| G． | 入voytos | 入uouots | $\lambda$ bouros |
| D． | $\lambda$ 入odtt | $\lambda$ vouog | $\lambda$ houz |
| A． | $\lambda$ ióota | 入toyas | $\lambda \hat{\text { vov }}$ |

Plur．

|  | M． | P． | N． |
| :---: | :---: | :---: | :---: |
| N．V． | 入iontes | 入úougal | 入vouta |
| G． | $\lambda$ גóvt\％ | 入̀ovồy | $\lambda \nu \dot{\sim}$ ¢ ${ }^{\text {d }}$ |
| D． |  | גuodeals | $\lambda$ douel（ $p$ ） |
| A． | 入ioutas | 入uoúas | $\lambda$ 入iouja |

227．This declension，like the declension of other adjec－ tives，should be learned across，and not down the columns． See §61．

228．It will be observed that the masculine and neuter are declined according to the third declension（the masculine exactly like a $\rho \chi \omega \nu$ ）and the feminine according to the first declension（like $\delta \delta \xi a$ ）．The accent in the genitive
plural feminine follows the noun rule for the first declen－ sion，not the adjective rule（see §§51，62）．

229．It will be remembered that in the accusative plural the $a$ in the ending is short in the third declension but long in the first declension．

230．The declension of $\lambda$ vópevos，$\eta$ ，ov，loosing for himself，the present middie participle，and of $\lambda$ vóuevos，$\eta$ ， ov，being loosed，the present passive participle of $\lambda \dot{v} \omega$ ，is as follows：

| N．V． | Sing． |  |  |
| :---: | :---: | :---: | :---: |
|  | M． | F． | N． |
|  | $\lambda \nu \delta \mu$ yos | 入ขоцй̀ ${ }^{\text {a }}$ |  |
| G． | $\lambda$ доouevov |  |  |
| D． | $\lambda \nu о \mu \dot{\nu} \varphi \underline{\varphi}$ |  | $\lambda \nu о \mu \dot{\text { év ¢ }}$ |
| A． | $\lambda$ 入о́цєуоу | $\lambda \nu \square \mu \epsilon \ell \nu \eta \nu$ |  |
| Plur． |  |  |  |
|  | M． | F． | N． |
| N．V． | $\lambda$ vóuevor | $\lambda$ 入óцеvar |  |
| G． |  |  | $\lambda \nu о \mu$ е้̇ш |
| D． |  | 入vouévaıs | 入vouévols |
| A． | $\lambda$ voutious | 入vouévas |  |

It will be observed that this declension is like that of adjectives of the second and first declension．

231．The present participles are formed on the present stem of the verb（see \＄151）．The present participles of any regular verb can be made by adding－$\omega \nu$ ，－ovaa，－ov，and

## Use of Participles

The participles are verbal adjectives．Being adjectives， they have gender，number，and case；and like other adjec－ tives they agree in gender，number，and case with the nouns
that they modify. On the other hand, since they partake of the nature of verbs, (a) they have tense and voice, (b) they receive, like other parts of a verb, adverbial modifiers, and (c) if they be participles of a transitive verb they can take a direct object.
 tò kúpoov, the aposile, saying these things in the iemple, sees the Lord. Here the participle $\lambda \in \hat{\gamma} \omega \nu$, which means saying, agrees with dróorodos, which is in the nominative case and singular number and is a masculine noun. The participle, therefore, must be nominative singular masculine. On the other hand, the participle is enough of a verb to have tense and voice. It is in the present tense because the action which it denotes is represented as going on at the same time as the action of the leading verb $\beta \lambda \dot{e} \pi t ⿺$; it is in the active voice because it represents the apostle as doing something, not as having something done to him. And it has the adverbial modifier $\epsilon \nu \tau \hat{\varphi} i \in \rho \hat{\psi}$ and the direct object rav̂ta. On the other hand, it has no subject, as a finite verb (e.g. an indicative) would have; for the noun $\dot{a} \pi \delta \sigma \tau 0 \lambda o s$, which denotes the person represented as performing the action denoted by the participle, is not the subject of the participle, but the noun with which the participle, like any other adjective, agrees.
 we see the apostle saying these things in the temple. Here the noun with which the participle agrees is accusative singular masculine. Therefore the participle must also be accusative singular masculine. But its direct object and its adverbial modifier are the same as in (1).
 we come to the apostle while he is saying these things in the temple. Here the participle $\lambda$ Eyourt agrees with a
masculine noun in the dative singular and must therefore itself be dative singular masculine. But in this example it is quite impossible to translate the participle literally. The tranalation, we come to the apostle saying these things in the temple, would not do at all, for in that English sentence the participle saying would be understood as agreeing not with the apostle but with the subject of the sentence, we. It is necessary, therefore, to give up all attempts at translating the participle "literally". Instead, we must express the idea which is expressed by the Greek participle in an entirely different way-by the use of a temporal clause. When such temporal clauses are used to translate a Greek present participle they are usually introduced by while. Such a free translation would have been better than the literal translation even in Example (1), although there the literal translation was not absolutely impossible. It would have been rather better to translate
 while the apostle is saying these things in the temple, he sees the Lord.
 סoülol, while he is being taught by the apostle, the servants are coming to him. Here $\delta \iota \delta a \sigma \kappa \sigma \mu t \nu \varphi$ agrees with aúT $\hat{\text { a }}$, which, like $\tau \hat{\varphi}$ a $\pi \sigma \sigma \tau \delta \lambda \mu$ in the preceding example, is
 ent passive participle of $\delta \iota \delta \alpha \sigma \kappa \omega$.

## 233.

## The Tense of the Participle

The tense of the participle is relative to the time of the leading verb.

The present participle, therefore, is used if the action denoted by the participle is represented as taking place at the same time as the action denoted by the leading verb,
no matter whether the action denoted by the leading verb is past, present or future.
 autê oi ôồरoc, while he was being taught by the apostle, the servants came to him. Here the action denoted by the participle $\delta \iota \delta a \sigma \kappa o \mu \dot{\epsilon} \nu \omega$, though it is past with reference to the time when the sentence is spoken or written, is present with reference to the time of the leading verb-that is, the teaching was going on at the same time as the coming of the servants. Hence the present participle is used.
 airod, while he was going in the way, his disciples came to him. It will be observed that the participles of the deponent verb $\pi$ opeioual, like other parts of that verb, are active in meaning though passive in form. Otherwise this example is like (1).
 going in the way, he saw a blind man. Here it will be observed that the participle frequently agrees with the unexpressed subject of a verb. Similaxly $\lambda \in \gamma \omega \nu \tau a \hat{\tau} \tau a \in i \delta \in \nu$ тuф入óv, means while he was saying these things, he saw a
 ye were saying these things, ye saw a blind man.

## 234. The Attributive Participle

The participle, like any other adjective, can stand in the attributive position.
Examples: (1) It will be remembered (see 870 ) that 8 $\dot{a} \gamma \mathrm{a} 0 \dot{\mathrm{O}} \mathrm{s}$ à $\pi \dot{\sigma} \sigma \tau 0 \lambda o s$ means the good apostle. In exactly the
 saying-these-things-in-the-temple apostle. The participle (with its modifiers) is here an adjective in the attributive position; it takes the exact place of the attributive ad-
 more usual, however, to place the attributive participle (with its modifiers) in the second of the two alternative positions in which the attributive adjective can stand. Thus the usual order would be $\dot{o}$ àrógronos ó $\lambda \in \dot{\varepsilon} \gamma \omega \nu$ raûta
 exact place of ára0ós in the phrase d a áórotohos d dayabos, which is one of the two ways in which the good apostle can be expressed.
Of course the "literal" translation, the saying-these-things-in-the-temple apostle, is not good English. The idiomatic English way of expressing the same idea is the apostle who is saying these things in the temple.

The difference between this attributive use of the participle and the use which appears in Example (1) in \$232 should be noticed very carefully. In the sentence $d$ a $\pi d-$
 ciple $\lambda \hat{\beta} \gamma \omega \nu$, being in the predicate, not in the attributive, position, goes only somewhat loosely with $\delta$ a ááatohos (though it agrees with it), and really modifies also the verb $\beta \lambda \epsilon$ ќєє-that is, it tells when the action denoted by $\beta \lambda e ́ \pi \epsilon L$ took place. But the addition of the one little word $\dot{o}$ before $\lambda \hat{\ell} \gamma \omega \nu$ makes an enormous difference in the meaning. When that word is added we have the sentence $\boldsymbol{\delta}$
 apostle who says these things in the temple sees the Lord. Here $\lambda e ́ \gamma \omega \nu$ stands in the attributive position, and does not in any way modify the verb $\beta \lambda \epsilon \pi \epsilon \epsilon$; but it tells what apostle is being spoken of. Suppose some one asks us what apostle we are talking about. We could reply, "Not the good apostle or the bad apostle, or the great apostle or the small apostle, but the saying-these-things-in-the-temple apostle." It will be seen that the attributive participle identifies the particular apostle that we are talking about.
 saw the apostles while they were saying these things or I sato the aposlles saying these things, with cifov rou's droatodous roìs $\lambda$ évouras taîta, I savo the apostles $\left\{\begin{array}{l}\text { that } \\ w h o\end{array}\right\}$ were saying these things. In the latter case the (attributive) participle tells what apostles we are talking about.

## 235. Substantive Use of the Participle

The participle, like any other adjective, can be used substantively with the article.

It will be remembered that $\delta$ d $\gamma$ a日bs means the good man; in dyath, the good woman; rd dyaOov, the good thing; oi dyabol, the good men, etc. In exactly the same way o
 temple man. The participle (with its modifiers), just like the adjective, tells what man we are talking about. But how shall the same idea be expressed in idiomatic English? There are various closely related ways-for example, the man who $\left\{\begin{array}{l}\text { says } \\ \text { is saying }\end{array}\right\}$ these things in the temple, or the one who $\left\{\begin{array}{l}\text { says } \\ \text { is saying }\end{array}\right\}$ these things in the temple, or he who $\left\{\begin{array}{l}\text { says } \\ \text { is saying }\end{array}\right\}$ these things in the temple. It should be observed, however, that none of these English phrases is a literal translation of the Greek. The Greek o does not mean the man or the one or he. It means the, and it is just as simple an article as the article in the phrase the cat or the dog or the house. But in English we do not use the article with the substantive participle. Therefore we have to reproduce the idea of the Greek ó $\lambda \in ́ \gamma \omega v$ by a phrase of which the individual parts have nothing whatever to do with the individual parts of the Greek phrase. It is only the total meaning of the English phrase which is the same as the total meaning of the Greek phrase.

The following examples should also be examined:
 who was saying these things in the temple. Here the Greek uses the present participle because the time of the action denoted by the participle is the same as that of the action denoted by the leading verb, even though the action denoted by the leading verb here happens to be in past time.
(2) єโ̇ov roùs 入érovtas tâ̂ta, I saw those who were saying these things.
 brother of the woman who is saying these things is a servant.
 he who believes on the One who raises the dead is being saved.
 the thing that saves (or that which saves) men is the will of God.
 are seen do not remain for ever.
236. The following summary may be found useful:

## Present Participles

Act. $\lambda \dot{U} \omega \bar{p}$
Mid. $\lambda u b \mu \in \nu=s$

$=$ loosing.
$=$ loosing for himself.
= being loosed.

Present Participles with Article
$\begin{aligned} & \text { Act. d } \lambda \text { buv, } \\ & \text { the loosing man }\end{aligned}=\left\{\begin{array}{l}\text { the man who looses. } \\ \text { the one who looses. } \\ \text { he who looses. }\end{array}\right.$
Mid. $\delta$ גvónevos, himself man
$=\left\{\begin{array}{l}\text { the man who looses for himself. } \\ \text { the one who looses for himself. } \\ \text { he who looses for himself. }\end{array}\right.$

> Pass. © $\lambda u b \mu e y o s$, the being-loosed man

$\begin{gathered}\text { Act. } \tau d \lambda \text { vov, } \\ \text { the loosing thing }\end{gathered}=\left\{\begin{array}{l}\text { the thing that looses. } \\ \text { that which looses. }\end{array}\right.$

Act. oil $\lambda$ viovtes, the loosing men
$=\left\{\begin{array}{l}\text { the man who is being loosed. } \\ \text { the one who is being loosed. } \\ \text { he who is being loosed. }\end{array}\right.$
$=\left\{\begin{array}{l}\text { the men who loose. } \\ \text { the ones who loose. } \\ \text { those who loose. }\end{array}\right.$
237. It should be noticed that the English word he in the phrase he who looses is not a real-certainly not an ordi-nary-personal pronoun, but merely the light antecedent of the relative pronoun who. He has no value of its own but goes in the closest possible way with who, so as to form the phrase he who. The Greek language, rather strangely as it may seem to us, possesses no such light antecedent of the relative. The ordinary Greek way, therefore, of expressing the ides he who looses is to use article with' participle and say the loosing man, $\delta \lambda \dot{\omega} \omega \nu$. Similarly, the English word that in the phrase that which looses, and the English word those in the phrase those who loose, are not really demonstrative adjectives or pronouns; they do not really "point out" anything. They are very different, for example, from the demonstratives in the phrases that house across the street or those trees over there on the campus. The that and the those in these sentences could be accompanied by a pointing finger; they are real demonstratives. But the that and the those in the phrases that which looses or those that loose are simply light antecedents of the relative, and for them the Greek has no equivalent. Such phrases, therefore, must be cast into an entirely different mould before they can be translated into Greek.
238. The English word that has a number of widely different uses. It is (1) a conjunction, (2) a demonstrative adjective or pronoun, (3) a light antecedent of the relative, and (4) a relative pronoun like which.

Example: I know that that which saves the men that receive that gospel is the will of God. Here the first that is a conjunction; the second, the light antecedent of the relative; the third, a relative pronoun; the fourth, a real demonstrative. The Greek language has a different way of expressing each of these uses of that. The sentence in Greek would be as

The two uses of the English word those may be illustrated by the sentence, those who believe will receive those good

239. The importance of this lesson and the two following lessons can hardly be overestimated. Uniess the student understands thoroughly the use of participles, it will be quite impossible for him ever to master the later lessone or to read the Greek Testament. The participle is quite the crucial matter in the study of Greek.

$$

$$

Exercises

II. 1. While he was atill in the ${ }^{1}$ flesh the Lord was saving those who were believing on Him. 2. While we were being taught in the temple we were being persecuted by the ruler. 3. Those who are being saved by the Lord know Him who saves them. 4. Those who were proclaiming these things received, themselves also, the things which were being proclaimed by them. 5, She who is receiving the Lord into her house sees the face of the One who saves her. 6. While He was still teaching in the temple we saw Him. 7. While we were teaching in the temple we saw the One who saves us. 8. The hope that is seen is not hope. 9. The Lord said to those who were believing on Him that God saves sinners. 10. The brothers of those who persecute the disciples have not hope. 11. Those who say these things do not know the One who saves the Church. 12. We were cast out by the ruler who persecutes the Church. 13. This is the voice which is being heard by those who believe in the Lord. 14. While I was remaining in the house, I saw the women who were taking gifts from the disciples. 15. Being preached by those who believe in the Lord, the gospel will lead men into the Church. 16. The faithful ones will see the Lord going up into heaven.

In such phrases, the article is often omitted in Greek.

## LESSON XIX

## Aorist Participles Active and Middle <br> Use of Participles（continued） <br> The Negatives ov and $\mu \mu^{\prime}$ ．

241. 

Vocabulary

act．part．of $\begin{gathered}\gamma \\ \gamma \omega \\ \text { ．}\end{gathered}$ part．of $\check{\epsilon} \rho \chi$ о $\mu a \iota$ ．

of $\dot{\alpha} \pi 0$ о $\nu \dot{\eta} \sigma \kappa \omega$ ．
à $\pi \in \kappa \rho i \theta \eta \nu, I$ answered，aor． indic．，pass．in form，of аттокріродаи．
eimiv，having said，2nd aor． act．part．of $\lambda \epsilon \gamma \omega$ ．
brought，2nd aor．act．part． of $\phi \in{ }^{\prime} \rho \omega$（the 1st aorist，
 indicative）．
ioùy，having seen，2nd aor． act．part．of $\beta \lambda \hat{\epsilon} \pi \omega$（or д д́á $\omega$ ）．

242．The declension of $\lambda \dot{u} \sigma a s, \lambda \dot{u} \sigma a \sigma a, \lambda \hat{v} \sigma a \nu$, having loosed，the aorist active participle of $\lambda \dot{v} \omega$ ，is as follows：

Sing．
M．
N．V．גígas
G．$\lambda \dot{u} \sigma a y \tau o s$
D．$\lambda \dot{\log a \nu \tau}$
A．入úgayтa

M．
N．V．入úcadtes
G．$\lambda \nu \sigma \alpha ́ \nu \tau \omega \nu$
D．$\lambda \dot{\mu} \sigma a \sigma \iota(\nu)$
A．入úgavtas
$\lambda \dot{\text { úaga }}$

$\lambda \nu \sigma a \sigma \eta \quad \lambda u ́ \sigma a \nu \tau \iota$

Plur．

|  | M． | F． | N． |
| :---: | :---: | :---: | :---: |
| N．V． | 入údaytes | 入u̇za\％at | 入ígavia |
| G． |  | $\lambda \cup \sigma a \sigma \hat{\nu}$ |  |
| D． | $\lambda \dot{\nu} \sigma a \sigma$（ $\left.{ }^{( }\right)$ | $\lambda$ vóáaus | $\lambda \ell \overline{\sigma a \sigma \iota}$（ $\nu$ ） |
| A． | 入úgaptas |  | $\lambda \dot{\text { úgapta }}$ |

243. Like the present active participle, the aorist active participle is declined according to the third declension in the masculine and neuter, and according to the first declension in the feminine.
244. The characteristic $\sigma a$, which, it will be remembered is the sign of the aorist system (the third of the principal parts), appears throughout. This $\sigma a$, as in the rest of the aorist system, is added to the verb stem.
245. The augment, however, appears only in the indicative mood. Thus, although the aorist active indicative of $\lambda i \omega$ is $\bar{\epsilon} \lambda \nu \sigma a$, the aorist active participle is not é $\lambda$ v́ads, but $\lambda$ voas, and although the aorist active indicative of
 but dxovías.
246. The declension of $\lambda v \sigma \dot{\alpha} \mu \in \nu 0 s, \eta$, ov, having loosed for himself, the arist middle participle of $\lambda \dot{\psi}$, is as follows:

Sing.

| N. V. | M. | F. | N. |
| :---: | :---: | :---: | :---: |
|  | $\lambda \nu \sigma d \mu \in \nu=s$ | $\lambda \nu \sigma a \mu \epsilon ̇ \nu \eta$ | $\lambda \nu \sigma a ́ \mu \epsilon \nu о \nu$ |
| G. | $\lambda v \sigma a \mu$ ¢́vou | $\lambda \nu \sigma a \mu t \nu \eta$ s | 入voauérov |
| D. | $\lambda \nu \sigma \alpha \mu \in ̇ \nu \varphi$ | $\lambda \nu \sigma a \mu e ̀ \nu \eta$ | $\lambda \cup \sigma a \mu t ̇ \nu \omega$ |
| A. | $\lambda v \sigma \alpha \mu \in \nu о \nu$ | $\lambda v \sigma a \mu \epsilon \nu \eta \nu$ | $\lambda \nu \sigma a \mu<\nu \geqslant \nu$ |
| N. V. | Plur. |  |  |
|  | M. | F. | N. |
|  |  | $\lambda u \sigma \dot{\alpha} \mu \in \nu a \sim$ | $\lambda \nu \sigma a ́ \mu e \nu a$ |
| G. | $\lambda$ 入vanév ${ }^{\text {d }}$ | $\lambda$ voauċvà |  |
| D. |  | $\lambda \nu \sigma a \mu$ ¢́vacs | $\lambda \nu \sigma a \mu$ vots |
| A. | $\lambda \nu \sigma a \mu$ évous | $\lambda u \sigma a \mu$ ¢́vas | $\lambda v \sigma$ ¢иeva |

247. Like the present middle and passive participle, the aorist middle participle (the aorist passive is quite differ-
ent）is declined like an ordinary adjective of the second sad first declension．

248．Like the aorist active participle and the reat of the aorist system，the aorist middle participle is formed on the aorist stem．The characteristic oa appears through． out．
 the second aorist active participle of $\beta \lambda \epsilon \pi \omega$（it may also be regarded as coming from dodes），is as follows：

Sing．

|  | M． | F． | N． |
| :---: | :---: | :---: | :---: |
| N．V． | 18¢ ${ }^{\text {d }}$ | Lֹoขิสa | Li8̇\％ |
| G． | Lónjtos | ¿ֹoúons | Liduros |
| D． | 18ठうтt |  | loóvtl |
| A． | iઠ́илта | iSov̂oay | ใ8by |

Plur．

|  | M． | F． | N． |
| :---: | :---: | :---: | :---: |
| N．V． | t8bures | Líov̂ona | lSbyja |
| G． | 18்̇ ${ }^{\text {den }}$ |  | l8byт山上 |
| D． | 1¢00ิढı（ $\nu$ ） | ¿Soívals | l¢ovĩı（ $\nu$ ） |
| A． | Lídutas | ijoúoas | bobuta |

250．It will be observed that the second aorist active participle is declined like the present active participle ex－ cept that it has an irregular accent．The accent on the first form does not follow the verb rule of recessive accent， but is on the ultima．Thereafter the noun rule is followed， the accent remaining on the same syllable throughout，except in the genitive plural feminine，where $\$ 51$ comes into play．

251．It will be remembered that the augment appears only in the indicative mood．It must therefore be dropped
from the third of the principal parts before the aorist participle can be formed. In irregular verbs like $\beta \lambda \xi \pi \omega$ (dpíw) the dropping of the augment in the second aorist sometimes gives difficulty. The third of the principal parts of $\beta \lambda \epsilon \pi \omega$ ( $\delta \rho \dot{\alpha} \omega$ ) is eijov. Without the augment the second zorist stem is $\ell \delta$-, for $\iota$ was here irregularly augmented to $\epsilon$. On the other hand, the second aorist participle of $\lambda \in \dot{\beta} \gamma \omega$ is $\epsilon i \pi \dot{\omega} \nu$ ( $\epsilon i \pi \pi \%$ being the second aorist indicative), because here $\epsilon i \pi$ - was the second aorist stem and being regarded as long enough already wes not changed at all for the augment.
252. Except in the case of a few such verbs, where the dropping of the augment from the third of the principal parts in order to get the aorist stem to which the - $\omega$ is added to form the participle, might give difficulty, the student is expected to perform the necessary processes for himself. Thus if a form $\dot{a} \pi 00$ avdy is found in the exercises, the student is expected to see that this form is the participle of a second aorist of which the indicative (with
 irregular, will be found in the general vocabulary.
253. The second aorist middle participle is declined exactly like the present middle participle, and difiers from the present middle participle only because it is formed on the second aorist stem instead of on the present stem. Thus $\lambda a \beta b \mu e \nu o s$ is the second aorist middle participle of $\lambda a \mu \beta a \nu \omega$, el $\lambda a \beta$ oy being the second norist active indicative (third of the principal parts).

## 254. Use of the Aorist Participle

In accordance with the principle formulated in §233, that the tense of the participle is relative to the time of the leading verb, the aorist participle denotes action prior to
the action denoted by the leading verb, whether the action denoted by the leading yerb is past, present or future.

Examples:
 the apostle having said these things in the temple is seeing the Lord. Here $\epsilon i \pi \dot{\omega} v$, the aorist participle, denotes action prior to the action denoted by $\beta \lambda \epsilon \pi \epsilon \epsilon$. Compare Example (1) in \$232.
(2) $\epsilon i \pi \dot{\omega} \nu$ тav̂ra $\dot{a} \pi \hat{\eta} \lambda \theta \epsilon \nu$, having said these things he went away. The literal translation of the perticiple is here perfectly possible. But it would be more idiomatic English to translate, when he had said these things he went away, or after he had said these things he went away. Compare $\lambda \in \gamma \omega \nu$ тaîta à $\pi \hat{j} \lambda \theta \epsilon \nu$, he went away saying these things or while he was saying these things he went away. Notice that when a Greek present participle is translated by a temporal clause in English, the English word that introduces the temporal clause is naturally while, and when it is an aorist participle that is to be translated into English, the English word introducing the temporal clause is naturally when or after. In the case of the aorist participle, the verb in the English temporal clause will often be perfect ("has seen", etc.) or pluperfect ("had seen", etc.)perfect when the leading verb is present or future, and pluperfect when the leading verb is past.
(3) єimùv тav̂ta à $\pi \dot{\epsilon} \rho \chi \in \tau a \iota$, having said these things he goes away, or after he has said these things he goes away.
 after he had said these things. Here the literal translation of the participle would be absolutely impossible in English, because in the English sentence they came to him having said these things, the having said would agree not with him but with the subject of the sentence, they, and the sentence would be a translation, not of $\pi \rho \circ \sigma \hat{\eta} \lambda \neq \frac{y}{}$
 Compare with $\pi \rho \circ \sigma \hat{\eta} \lambda \theta o \nu$ aúт $\hat{0}$ єimónti raūta the sentence
 him while he was saying these things.
 to the Lord we shall see Him, or when (or after) we have come to the Lord we shall see Him.
255. The aorist participle can of course be used attributiveiy or substantively with the article (see $\S 234,235$ ).

Examples:
(1) ó $\mu a \hat{\eta} \tau \grave{\eta} s$ ò ákoひ oikov, the having-heard-these-things-in-the-temple disciple went into the house, or the disciple who $\left\{\begin{array}{l}\text { heard } \\ \text { had heard }\}\end{array}\right\}$ these things in the temple went into the house. On the other hand,
 mean the disciple, when he had heard these things in the temple, went into the house.
 things man went away, or $\left\{\begin{array}{l}\text { he } \\ \text { the one } \\ \text { the man }\end{array}\right\}$ who $\left\{\begin{array}{l}\text { heard } \\ \text { had heard }\end{array}\right\}$ these things went away. On the other hand kкoúaas $\tau a v \tau a \dot{a} \pi \dot{\eta} \lambda \theta \in \nu$ would mean having heard these things he went away or when he had heard these things he went away. In the former sentence d drovoas tells what man we are talking about, while áoviras without the article merely adds a detail about a person who is designated in some other way or not designated at all.
(3) Eİov toùs cimóvtas $\tau a \hat{T} T a, I$ saw the having-said-thesethings men, or I savd $\left\{\begin{array}{l}\text { those } \\ \text { the ones } \\ \text { the men }\end{array}\right\}$ who had said these things.

The student should compare with these examples the corresponding examples given for the present participle.

## 256.

## The Negatives

of is the negative of the indicative, $\mu \dot{\eta}$ is the negative of the other moods, including the infinitive and the participle.

Example: $\delta \mu \bar{\eta} \pi เ \sigma \tau \epsilon \dot{v} \omega \bar{y}$ of $\sigma \dot{\Delta} \zeta \epsilon \tau a$, the not-believing one is not saved, or he who does not believe is not saved. Here $\mu \dot{\prime}$ negatives the participle $\pi เ \sigma \tau \epsilon^{j} \omega \nu$, and ov negatives the indicative $\sigma \dot{\omega} \zeta$ ктal.

## 257.

## Exercises

II. 1. Those who have not seen the apostle do not know him. 2. I did not see him who had believed on the Lord. 3. I saw him after he had believed on the Lord, but ye saw him while he was still in the kingdom of the Evil One. 4. Having heard these things we believed on Him who had died in behalf of us. 5 . We came to those who were going in the way. 6. We shall see the apostle after we heve gone into this house. 7. Those men said to those who had gone into the house that the Lord is good. 8. While we were saying these things we were going into our house. 9. When they had received these gifts from the ones who had brought them, they came together into the church. 10. These are the women who received the one who had taught them. 11. When these men had seen the Lord, they were brought to the rulers. 12. The disciples who had come into the church were baptized by the apostles who had seen the Lord. 13. The blind man who had received this man was with those who were persecuting him. 14. The demons that were being cast out, said this to him who was casting them out. 15 . As we were going through the desert, we taught those who were with us. 16. We saw the servant when he had believed on the Lord and was still in the house.

## LESSON XX

## Aorist Passive Participle

Genitive Absolute
258.

Vocabulary
roapeis，having been written，iرदtiov，tó，a garment．
2nd aor．pass．part．of olkia，$\dot{\eta}$, a house（a synonym
र $\rho \dot{a} \phi \omega$（declined like a lst
gor．pass．part．）． of otkos）．
$\pi a \iota \delta i o y, ~ \tau b$, a little child．
Exєî，adv．，there．
cidecos or cidis，adv．，imme－
diately．
बиvaүшүウ่，$\dot{\eta}$ ，a synagogue．
orpartútrjs，ov，$\delta, a$ soldier．

259．The declension of $\lambda u \theta \epsilon i s, \lambda u \theta \epsilon \hat{i} \sigma a, \lambda u \theta E \nu$ ，having been loosed，the aorist passive participle of $\lambda^{\prime} \dot{v} \boldsymbol{\omega}$ ，is as follows：

| M． | $\stackrel{\text { Sing. }}{\text { F. }}$ | N. |
| :---: | :---: | :---: |
| N，V．$\lambda$ Uetis | $\lambda \cup \theta \epsilon \hat{\sigma} \sigma a$ | $\lambda \cup \theta \in \nu$ |
| G．$\lambda v a$ evtos | $\lambda \nu \theta \epsilon \mathrm{lo} \mathrm{\eta s}$ | 入uӨévtos |
| D．$\lambda \nu \theta \in \nu \tau \tau$ | $\lambda u \theta$ ciog |  |
|  | $\lambda \nu \theta \epsilon \hat{\tau} \sigma \alpha \nu$ | $\lambda \cup \theta \in \nu$ |
| M． | Plur． <br> F． | N． |
| N．V．${ }^{\text {duelvées }}$ | $\lambda \nu \theta \epsilon i \sigma a l$ | $\lambda u \theta \dot{y}$ ¢a |
| G．$\lambda \cup \theta \in \dot{\prime} \nu \tau \omega \nu$ | $\lambda \cup \hat{\theta} \epsilon \tau \hat{\sigma} \boldsymbol{\nu}$ |  |
| D．$\lambda \cup \theta \epsilon i \sigma \iota(\nu)$ | גuөeíars | $\lambda \nu \theta \in \hat{\epsilon} \tau \iota(\nu)$ |
| A．$\lambda u \theta \in \nu \tau a s$ | 入uteioas | $\lambda \cup \theta$ èvia |

260. Like the present active participle and the aorist active participle, the aorist passive participle is declined according to the third declension in the masculine and neuter, and according to the first declension in the feminine.
261. The characteristic $-\theta \epsilon$, which it will be remembered is the sign of the aorist passive system (the sixth of the principal parts), appears throughout. This $-\theta \epsilon$, as in the rest of the aorist passive system, is added to the verb stem.
262. The augment, of course, must be dropped (from the sixth of the principal parts) before the aorist passive participle can be formed. Compare $\S \S 251,252$.
263. The aorist passive participle has an irregular accent, the accent in the nominative singular masculine not being recessive. In the other forms of the declension the rule of noun accent is followed, except of course in the genitive plural feminine, where $\$ \$ 51,228$ come into play.
264. Like the other aorist participles, the aorist passive participle denotes action prior to the time of the leading verb; and to it applies also all that hes been said about the attributive and substantive uses of the participle.

Examples:
 тो̀v $\theta \dot{\lambda} \lambda a \sigma \sigma a \nu$, the demons, having been cast out by the Lord, went away into the sen, or $\left\{\begin{array}{l}\text { when } \\ \text { ajter }\end{array}\right\}$ the demons had been cast out by the Lord, they went away into the sea.
(2) $\epsilon \gamma \epsilon \rho \theta \dot{\varepsilon} \nu \tau \iota \in \kappa \nu \epsilon \kappa \rho \hat{\nu} \nu \pi \rho o \sigma \hat{\eta} \lambda \theta o \nu$ à̀ $\tau \hat{\varphi}$, they came to Him after $H e$ had been raised from the dead.
 the having-been-taught-by-the-apostle men came into the house, or $\left\{\begin{array}{l}\text { the men } \\ \text { the ones } \\ \text { those }\end{array}\right\}$ who had been taught by the apostle came into the house.
265. The following summary will serve for the review of what has been learned thus far about the participles:
I. The Participles

| Present | $\int$ Act. $\lambda i \omega \omega \nu$ | $=$ loosing . |
| :---: | :---: | :---: |
|  | $\{$ Mid, 入vópevos | $=$ loosing for himself. |
|  | Pass. $\lambda$ vóuevos | $=$ being loosed. |
| Aorist | (Act. $\lambda$ úras | = having loosed. |
|  |  | = having loosed for himself. |
|  | Pass. $\lambda$ uelis | $=$ having been loosed. |

## II. Article with Participle

266. The Genitive Absolute

A noun or pronoun with a participle often stands out of connection with the rest of the sentence in the construction called the genitive absolute.

Examples:
 the apostles having said these things, the disciples went away. Here einóvt $\omega \nu$ and $\tau \hat{\omega} \nu \dot{a} \pi \sigma \sigma \tau \delta \lambda \omega \nu$ stand in the genitive absolute. a $\dot{\pi} \pi \sigma \sigma_{0} \lambda \omega \nu$ is not the subject of any werb, the subject of the only finite verb in the sentence being $\mu a \theta_{\eta} \tau a i$, nor has it any other connection with the framework of the sentence. It is therefore absolute (the word means "loosed" or "separated"). In the English translation, the apostles having said is in the absolute case, which in English grammar is called the nominative absolute. But this nominative absolute is very much less common in English than the genitive absolute is in Greek.

Usually, therefore, it is better to translate the Greeis genitive absolute by a eleuse, thus giving up any attempt at a "Titeral" translation. For example, instead of the "literal" translation of the sentence just given, it would have been better to translate, when (or ajter) the apostles had said these things, the disciples went away. Of course all that has already been said about the tense of the participle applies to the participle in the genitive absolute as well as in other constructions.

It should be noticed that the genitive absolute is normally used only when the noun or pronoun going with the participle is different from the subject of the finite verb. Thus
 apostles, having said these things, went away, or when the apostles had said these things they went away, the word a $\pi \sigma \sigma$ rohoc has a construction in the sentence; it is the subject of the leading verb $\dot{a} \pi \tilde{\eta} \lambda \theta o \nu$. Therefore it is not "absolute." But in the former example it is not the apostles but some one else that is represented as performing the action denoted by the leading verb. Hence, in that former example $\dot{a} \pi о \sigma \sigma \dot{d} \lambda \omega \nu$ is not the subject of the sentence but genitive absolute.
(2) $\lambda$ ह́रovtos aùrồ taîta ol $\mu a \theta \eta t a i ~ a ̇ \pi \tilde{\eta} \lambda \theta o y$, while he was saying these things, the disciples went away. Compare $\lambda \epsilon \hat{\gamma} \omega \nu \quad \tau a \hat{v} \tau a \dot{a} \pi \hat{\eta} \lambda \theta \epsilon \nu$, while he was saying these things he went away or he went away saying these things.
 тที่ the Lord, the servants went out into the desert. Compare
 when the disciples had been taught by the Lord, they went out into the desert.
267.

## Exercises

 $\dot{\text { É }} \boldsymbol{\mu} \mathbf{0}$.
II. 1. When the soldiers had taken the garmente from the children, the disciples were cast out of the house.

1 What nown or pronoun is naturally to be supplied as that with which єi $\sigma \in \lambda$ о́̀ $\boldsymbol{\tau}$ a яgrees?
2. When the disciples had been cast out of the synagogue, they came to us. 3. While we were coming into our house, the Lord said these things to the rulers. 4. The Lord said those things to you, both while ye were with Him in the way and after ye had come to the ruler. 5. Those who had heard the apostle saying these things saw the house which had been destroyed by the soldiers. 6. When the rulers had heard the things which were being said by the Lord, they persecuted the disciples. 7. While the disciples were being persecuted by the rulers, the apostles were going into another house. 8. Those who went into the house of the ruler were my brothers. 9. When our names have been written into the book of life, we shail see the Lord. 10. Having been brought to the Lord by these disciples we see Him for ever. 11. These are the rulers who have become disciples of Thee. 12. When the apostle had been cast into prison, the disciples who had heard these things went away into another place. 13. After those women had been cast into prison, we went away into the desert. 14. When those who had been cast into prison had seen the man who had been raised up, they marvelled and believed on the Lord. 15. When the disciples had led to the Lord those who had been persecuted on account of Him, those servants came to us bringing good gifts. 16. Those who have not received this hope from God will not enter into the kingdom of heaven.

## LESSON XXI

The Subjunctive Mood．
268.
$\dot{a} \mu a p \tau \dot{\alpha} \nu \omega, I \sin$.
סıкаLoбицך，$\dot{\eta}$ ，righteousness． táv，conditional particle， with subjunctive，if． $\epsilon i$ ，with indicative，if．
 middle forms，$I$ preach the gospel，I preach the gospel to（with acc．of the thing preached and either acc．or dat．of the person to whom it is preached）． iva，conj．，with subjunctive， in order that．

Vocabulary
入aós，d，a people．
$\lambda o \iota \pi b s, \dot{\eta}, b v$ ，adj．remaining；
of 入otroi，the rest（ $=$ the remaining persons）． нaкápios，a，ov，adj．，blessed． нартирia，$\dot{\eta}, a$ witnessing，a testimony，a witness． $\mu \eta \delta \dot{\epsilon}$ ，and not，not，not even （with moods other than the indicative）；$\mu \eta \delta \varepsilon . . .$.
$\mu \eta \hat{\delta} \varepsilon$, neither．．．．．．nor． $\mu \eta \kappa \epsilon \tau \iota$ ，no longer（with moods other than the indicative）． ö $\chi$ dos，$b, a$ crowd，$a$ multitude．

269．The subjunctive mood occurs only in the present and aorist tenses（except for very rare occurrences of the perfect）．It has primary personal endings throughout， even in the aorist（which，it will be remembered，is a secondary tense）．The peraonal endings are preceded throughout by a long variable vowel $\omega / \eta$ instead of the short variable vowel $o / \epsilon$ which occurs in the present indicative．

270．The present active subjunctive of $\lambda \dot{v} \omega$ is as follows：

Sing．1．$\lambda u ́ \omega$
2．$\lambda u ́ p s$
3．$\lambda i ́ n$

Plur．1．入íwhep
2．$\lambda \dot{\prime} \eta \mathrm{T} \epsilon$
3．$\lambda \dot{\nu} \omega \sigma\llcorner(\nu)$
271. The present middle and passive subjunctive of $\lambda \notin \omega$ is as follows:

Sing. 1. $\lambda \hat{i} \omega \mu a l$
2. $\lambda u ́ n$
3. $\lambda$ ímral

Plur. 1. $\lambda \nu \dot{\mu} \mu \epsilon \theta a$
2. $\lambda \dot{\mu} \eta \sigma \theta \epsilon$
3. $\lambda i \omega \nu \tau a \downarrow$
272. It will be observed that these present subjunctive forms are like the present indicative forms except that a long vowel comes immediately after the stem, while in the indicative there is a short vowel- $\omega$ of the subjunctive standing instead of the o of the indicative, and $\eta$ of the subjunctive standing instead of the $\epsilon$ of the indicative. The only exceptions are (1) in the present active, third person plural, where $\omega$ in the subjunctive stands instead of ov in the indicative, and (2) in the present middle and passive, second person singular, where the indicative already has $\eta$ (in $\lambda \mathrm{m} \mathrm{m}_{\text {) }}$.
273. The $-\omega \sigma \iota(\nu)$ of the third person plural active may have the movable $\nu$.
274. The qorist active subjunctive is as follows:
Sing. 1. $\lambda \dot{u} \sigma \omega$
2. $\lambda \dot{u} \sigma \eta \mathrm{~s}$
Plur. 1. 入ú $\sigma \omega \mu \in \nu$
3. $\lambda b \sigma \eta$
2. रlöte
3. $\lambda \operatorname{uj\sigma } \sigma \sigma(\nu)$
275. The aorist middle subjunctive is as follows:

Sing: 1. $\lambda \hat{\sigma} \sigma \omega \mu a \iota$
2. $\lambda \dot{v} \sigma \eta$
3. $\lambda \dot{u} \sigma \eta \tau a \iota$

Plur. 1. $\lambda v \sigma \dot{\omega} \mu \in \theta a$
2. $\lambda \dot{v} \sigma \eta \sigma \theta \epsilon$.
3. $\lambda$ ú $\sigma \omega \nu$ тal
276. It will be observed that the endings (with variable vowel) are exactly the same in the aorist active and middle
subjunctive as they are in the present active and middle subjunctive. But these endings (with variable vowel) are in the aorist added to the aorist stem, whereas in the present they are added to the present stem. The $\sigma$ makes all the difference.
277. There is in the aorist subjunctive of course no sugment (see §245).
278. The second aorist active and middle subjunctive is conjugated exactly like the first aorist subjunctive. Of course, however, it is formed on the second a.orist stem.
279. The aorist passive subjunctive is as follows:

> Sing. 1. $\lambda \mu \theta \hat{\omega}$
> 2. $\lambda \mu \theta \hat{s_{s}}$
> 3. $\lambda \mu \theta \hat{d}$

Plur. 1. $\lambda \nu \theta \hat{\omega ̂ \mu e v}$<br>2. $\lambda u \theta \hat{\eta} \tau \epsilon$<br>3. $\lambda v \theta \omega \sigma \iota(\nu)$

280. The aorist passive subjunctive, like the aorist passive indicative, has active personal endings. The endings (with the variable vowel) are exactly like those in the present active subjunctive. But the rule of verb accent seems to be violated-the accent does not seem to be recessive. This apparent irregularity is due to the fact that there has been contraction, the $-\theta \epsilon$ of the aorist passive stem having been contracted with the following vowels in accordance with the rules which will be given in $\$ 316$. But for present purposes the peculiarity of the accent may simpiy be learned without any further attention being given to the reason for it.
281. Before the aorist subjunctives can be formed from the principal parts given in the vocabulary, the augment must be dropped in the manner explained in $8 \$ 251,252$.
282. Present Subjunctive of ei $\mu \mathrm{l}$.

Learn the present subjunctive of $\epsilon i \mu i$ in $\$ 602$.

## 283. The Tenses in the Subjunctive

In the subjunctive mood there is absolutely no distinction of time between the tenses; the morist tense does not refer to past time and the present subjunctive does not necessarily refer to present time. The distinction between the present and the aorist concerns merely the manner in which the action is regarded. The sorist subjunctive refers to the action without saying anything about its continuance or repetition, while the present subjunctive refers to it as continuing or as being repeated. Thus lua $\lambda \dot{\sigma} \sigma \omega$ means simple in order that I may loose, while lva $\lambda \dot{\prime} \omega$ means in order that I may be loosing, or the like. But ordinarily it is quite impossible to bring out the diference in an English translation. The present and the aorist subjunctive will usually have to be translated exactly alike. The student should use the sorist in the exercises unless he sees some reason for using the present, since the aorist presents the action in a simpler way, without any added thought of its duration.

## 284. The Negative of the Subjunctive

The negative of the subjunctive is $\mu$ ' , in accordance with the rule given in 8256 .

## 285. The Hortatory Subjunctive

The first person plural of the subjunctive is used in exhortations.

Example: $\pi \iota \sigma \tau \in \dot{j} \sigma \omega \mu e \nu$ els $\tau \delta \nu$ кipoo, let us believe on the Lord.

## 286. The Subjunctive in Purpose Clauses

Purpose is expressed by $\ddot{\nu} a$ with the subjunctive.

 we came in order that we might see him.
287. "עa, in order that, with the subjunctive, must be distinguished sharply from ö $\tau$, that, with the indicative. The latter introduces indirect discourse.
 they say that they know the Lord, with roûto $\lambda \in$ yourıy ipa akoívotv ol $\mu a \theta \eta \tau a i$, , they say this in order that the disciples may hear.

## The Subjunctive in Future Conditions

288. Future conditions are expressed by tav with the subjunctive; other conditions by $\epsilon^{i}$ with the indicative. ${ }^{1}$

## Examples:

 we go into the house, we shall see the Lord. Here éà $\begin{gathered}\text { ti } \sigma \text { - }\end{gathered}$ eגA $\omega \mu \epsilon \nu$ clearly refers to the future. Compare el $\mu \mathrm{a} \theta \eta \tau \mathrm{ai}$ $\epsilon \in \rho \varepsilon \nu$ то仑̂ кขplov $\sigma \omega \theta \eta \sigma \dot{\partial} \mu \epsilon 6 a$, if we are disciples of the Lord,
${ }^{1}$ This simple rule does not cover all of the facts. For example, it takes no account of "present general" conditions, which are expregsed, like futare conditions, by tá $\mu$ with the subjunctive. But pregent general conditions are closely allied to future conditions. In the gentence, if any one does wrong he suffers, which is a present general condition, the contemplated possibility of one's daing wrong stretches out into the future; what is meant is that at any time when a man does wrong or shall do wrong he will suffer for it. It is perhaps unnecessary, therefore, to trouble the beginner with this additional category. In general, the simple rule given in the text will serve fairly pell for New Testament Greek. The exceptions can be noted as they occur. Conditions contrary to fact will be treated in 8551.
we shall be saved. Here the meaning is, if it is now a fact that we are disciples of the Lord, we shall be saved. Hence $\epsilon i$. . . . $\dot{\epsilon} \sigma \mu \epsilon \nu$ refers to present time.
 if you teach the brethren, you are faithful teachers. Here the meaning is, if at any time you shall be engaged in teaching the brethren, you are faithful teachers. $\dot{\text { èa }} \boldsymbol{\nu} \delta \iota \delta \dot{\alpha} \sigma \kappa \eta \tau \epsilon$ here refers to an indefnite future. Compare el di $\delta \dot{\alpha} \sigma \kappa \in \tau e ~ t o i ̀ s ~$
 brethren, you are faithful teachers. Here the meaning is, if the work in which you are now engaged is that of teuching the brethren, you are faithful teachers. It should be observed that in order to distinguish $\epsilon$ with the indicative from ${ }^{\ell} d \nu$ with the subjunctive, it is often advisable to choose the periphrastic present in English to translate the present indicative after $\epsilon$. Thus if you are teaching is a present condition, while if you teach is usually a future condition.
289. The above examples will show that the difference between the two kinds of conditions here treated concerns only the protasis (the if-clause). Various moods and tenses can stand in the apodosis (the conclusion) after either kind of protasis. A hortatory subjunctive, for example, can stand after a simple present condition. For example, $\epsilon i \mu a \theta \eta r a l$
 of the Lord [i. e., if that is now a fact], let us teach the brethren.
290. It should also be noticed that one cannot always tell from the mere form of the English sentence whether a condition is present or future. Thus in modern colloquial English we often use the present indicative to express a future condition. For example, in the sentence, if it rains
to-morrons, we shall not go to the picnic, if it rains clearly refers to the future and would be $\epsilon \dot{c} \nu$ with the subjunctive in Greek. It is the meaning of the English sentence, then, and not the mere form, which should be noticed in determining what the Greek shall be.
291.

## Exercises

II. 1. Let us receive the witness of these men, in order that we may be saved. 2. If we do not turn to the Lord, we shall not know Him. 3. If the Lord prepares a place for us, we shall eater into heaven. 4. If we received this commandment from the Lord, let us preach the gospel to the multitudes. 5. If these men are disciples of the Lord, they will not persecute the saints. 6. If these rulers persecute those who believed on the Lord, they will not come to the Lord in order that they may be saved. 7. If he sees the woman who received the saints, be will take the little children from her. 8. When the discipies had said these thinga to the saints, they were taught by the Lord in order that they might sin no longer. 9. If the Son of Man came in order that He might save sinners, let us receive His witness. 10. If we know the Lord, let us not persecute His saints nor cast them out of the synagogue. Il. If the crowds who have heard the Lord see Him in that synagogue, they will come to Him in order that He may say to them words of hope. 12. Unless ${ }^{1}$ He says these things to the multitudes, they will not be saved. 13. If thou seest in that night the one who saved thee, the ruler will parsecute thee, in order that thou mayest not preach the gospel to the others. 14. The Lord came to us, in order that we might preach the gospel to you. 15. The faithful servants came, in order that they might bring to us those garments.
${ }^{1}$ The English word unless is another way of saying if not. It is to be translated, therefore, by $\epsilon i \mu \dot{\eta}$ with the indicative or by $\epsilon \dot{\alpha} \nu \mu \dot{\eta}$ with the subjunctive. Which is correct here?

## LESSON XXII

The Present and Aorist Infnitives The Articular Infinitive, Indirect Discourse Proper Names

Vocabulary
$\delta \epsilon \hat{\imath}$, impersonal verb, used $\kappa \in \lambda \in \epsilon^{\prime} \omega, I$ command. only in third person, it is к $\mu \mu \eta, \dot{\eta}, a$ village.
 sative and infinitive). something), I am going $\ell \xi \in \sigma \pi \iota(\nu)$, impersonal verb, (to do something). used only in third person, bфei $\lambda \omega, I$ owe, $I$ ought.
it is lawful (with dative of $\pi \alpha \sigma \chi \omega, I$ suffer.
the person for whom "it is $\pi \rho \dot{\sigma}$, prep. with gen., before. lawful").
өe $\lambda \omega, I$ wish.
'Inooîs, 'I $\eta \sigma o \hat{0}$, d, Jesus.
'Iovóaíos, d, a Jew. бштnpia, $\boldsymbol{\eta}$, salvation.
Фapıraîos, d, a Pharisee. Xpıatbs, $\delta$, Christ; $\delta$ Xpıбtós, Christ, or the Messian.
293. The present and aorist infinitives of $\lambda \dot{v} \omega$ are as follows:

Present
Act. 入útly, to loose.
Mid. $\lambda \in \epsilon \sigma \theta a$, , to loose for Mid. $\lambda \dot{\sigma} \sigma a \sigma \theta a l$, to loose for one's self.
Pass. $\lambda \dot{\epsilon} \epsilon \sigma \theta a l$, to be loosed.

Aorist
Act. $\lambda \hat{v} \sigma a l$, to loose. one's self.
Pass. $\lambda u \theta \hat{\eta} \nu a l$, to be loosed.
294. It will be observed that the present infnitives are formed upon the present stem, the aorist active and middle infinitives upon the arrist stem (with the characteristic - $\sigma a$ ),
and the aorist passive infinitive upon the arrist passive stem (with the characteristic $-\theta \in$ lengthened to $-\theta \eta$ ).
295. The first aorist active infnitive is accented upon the penult, even where this involves an exception to the rule of verb accent. Thus $\pi \iota \sigma \tau \epsilon \hat{v} \sigma a r$, to believe, not $\pi i \sigma \tau \epsilon v \sigma a l$. The accent of the aorist passive infinitive is also irregular.
296. The second aorist active infinitive of $\lambda e l i m$ is $\lambda_{l \pi \epsilon \hat{\epsilon}}$, and the second aorist middle infinitive is $\lambda_{l \pi \in \sigma \theta a r}$. These are like the present infinitives in their endings except for the irregular accent. They are formed, of course, upon the second aorist stem.
297. The present infinitive of ci $\mu \mathrm{l}$ is eival.
298. The infinitive is a verbal noun. In many cases the use of the Greek infinitive is so much like that of the infinitive in English as to call for no comment. Thus $\theta e n \omega$ akoivelv tò $\lambda$ dofov means $I$ wish to hear the word. Here the English is a literal translation of the Greek.
299. There is ordinarily no distinction of time between the tenses in the infinitive, but the distinction is the same as that which prevails in the subjunctive. The present infinitive refers to the action in its continuance or as repeated; the aorist infinitive refers to it in no such special way. It is usually impossible to bring out the distinction in an English translation.
300. The negative of the infinitive is $\mu \dot{\eta}$.

## The Articular Infinitive

301. The Greek infinitive, being a verbal noun, can have the article, like any other noun. It is treated as an indeclinable neater noun and so has the neuter article.
302. The infinitive with the article can stand in most of the constructions in which eny other noun can stand. Thus
 act of dying in behalf of the brethren is good, or, less literally, it is good to die in behalf of the brethren. Here to àmotaveív is a noun in the nominative case, being the subject of the verb $\epsilon \sigma \tau \iota \nu$.
303. Of particular importance is the use of the articular infnitive after prepositions.

Examples: $\mu \in \tau \dot{a}$ тd $\lambda \bar{\delta} \sigma a$, after the act of loosing; $\epsilon \nu$
 on account of the fact of being loosed; $\mu \in \tau \dot{\alpha}$ roे $\lambda \cup \hat{\eta} \hat{p} p a$, after the fact of being loosed; $\pi \rho \delta$ rov̂ $\lambda \hat{u} a a c$, before the act of loosing; $\epsilon i s$ tò $\lambda \hat{v} \sigma a l$, into the act of loosing. This last preposition, eis, is very frequently used with the articular infinitive to express purpose. If one act is done so as to get into another act, it is done for the purpose of that other act. Thus els tò $\lambda \hat{v} \sigma a t$ means in order to loose.
304. So far, the infinitive has been viewed as a noun. But it is also part of 8 verb, and as part of a verb it can have not only, as the participle can, adverbial modifiers and a direct object, but also, unlike the participle, a subject. The subject of the infinitive is in the accusative case.

## Examples:

(1) $\frac{\epsilon}{\nu} \tau \hat{\varphi} \lambda \epsilon \hat{\gamma} \epsilon \iota \nu$ au̇roùs raûza, in (or during) the circumstance that they were saying these things $=$ while they were saying these things. Here aúroís is the subject of the infinitive $\lambda \in \gamma \in \epsilon \nu$ and $\tau \alpha \hat{u ̂} \tau a$ is the direct object of it.
 after the circumstance that the crowd was dismissed, the Lord went away, or after the crowd had been dismissed, the Lord
went away. The same thought might have been expressed

 inóotodos, and on account of the circumstance that this was being said by the crowds, the apostle went away, or because this was being said by the crowds, the apostle went away.
 rỳs ámaprias, and these things 1 said to you, with the tendency toward the result that you should not become servants of sin, or and these things I said to you in order that you might not become servants of sin.
305. It will be observed thet the articular infinitive with prepositions is usually to be translated into English by a clause introduced by a conjunction. But it must not be supposed that the details of such translation have anything to do with the details of the Greek original. It is rather the total idea expressed by the Greek phrase which is transferred into a totally different idiom.

## Indirect Discourse

306. Indirect discourse is sometimes expressed by the accusative and infinitive.
 the men were saying that he was the prophet.
307. But usually indirect discourse is expressed by ötı with the indicative. The usage is exactly like that in English except for the following important difference:
308. In indirect discourse in Greek, in part contrary to the English usage, the same mood and tense are retained as those which stood in the direct discourse lying back of the indirect.

Examples:
 sees the apostle. Here the direct discourse lying back of the indirect is I see the apostle, for such are the actual words of the speaker; such are the words which would have stood in the quotation if quotation mariss had been used. In this sentence there is no difference between the Greek and the English usage.
 saw the apostle. Here $\beta \lambda \dot{\epsilon} \pi \in \mathrm{L}$ is in the present tense because the direct discourse lying back of the indirect discourse is 1 see the apostle-those were the actual words of the speaker. The tense of the direct discourse, $I$ see, is retained in the indirect discourse (though of course the person is changed). English, on the other hand, changes the tense in the indirect discourse, when the leading verb is in past time. Thus, although a perfectly literal translation was possible in (1) it is impossible in (2).
 disciple said that he had seen the apostle. Here the direct discourse was I saw the apostle, or I have seen the apostle. English throws the tense in the indirect discourse a step further back (had seen instead of saw or has seen); Greek retains the same tense.
 see the apostle. The direct discourse was I shall see. English changes shall to would (or should with the first person); Greek retains the same tense.

## Proper Names

309. Proper names (spelled with a capital letter) often have the article. Of course the article must be omitted in an English translation.
310. The declension of 'I $\eta \sigma o u ̂ s, ~ d, ~ J e s u s, ~ i s ~ a s ~ f o l l o w s: ~$

$$
\begin{array}{ll}
\text { N. } & \text { 'I } \eta \sigma o u ̂ s \\
\text { G. } & \text { 'I } \eta \sigma o \hat{u} \\
\text { D. } & \text { I } \eta \sigma o \hat{u} \\
\text { A. } & \text { In } \overline{0} \hat{\nu} \\
\text { V. } & \text { 'I } \eta \sigma o \hat{v}
\end{array}
$$

311. Certain nouns, referring to persons or thinge which instead of being only one of a class are quite unique, are treated as proper nouns, the article being either inserted

 Law.

## Exercises

II. 1. While Jesus was preaching the gospel to the people, the Pharisees were commanding the soldiers to bring Him. 2. After Jesus had commanded the crowds to go away, His disciples came to Him. 3. If we wish to see Jesus, let us go into this village. 4. They said that it was lawful for them to take these garments. 5. They saw that it was necessary for the Son of Man to suffer these things. 6. After Jesus had said these things to the Pharisees, the multitudes went away. 7. On account of our not being disciples of Jesus, the ruler will command us to go away. 8. After salvation had been proclaimed to the people, Jesus taught His disciples. 9. We ought when we suffer these things to pray to the One who has saved us. 10. We shall be saved in that hour, because we have believed on the name of Jesus. 11. Those who had come into that village saw that Jesus was in the house. 12. Let us not sin, for God will not receive into His kingdom those who sin and do not turn to Him, 13. While these men were praying to God, the soldiers were persecuting the Church. 14. And when they had entered into this village, they said that they wished to see Jesus. 15. This woman came to see the works of the Christ. 16. The men were brought to Jesus Christ in order that He might heal them.

## LESSON XXIII

## Contract Verbs

## 313.

Vocabulary
a $\gamma a \pi k 山, I$ love（the most fre－$\lambda a \lambda \epsilon \epsilon, I$ speak．
quent and the loftiest word тарака入é $\omega$ ，I exhort，I com－ for I lowe in the New Testa－ ment）．
áко入ovө $\epsilon$ ，I follow（takes the dative）．
Ta入ılaía，$\dot{\text { й }}$ ，Galilee．
$\delta \eta \lambda \omega_{\omega}, I$ show，I make mani－ fest．

乡ทT $\dot{\omega} \omega$, I seek．
$\theta \in \omega \rho \dot{\epsilon} \omega, I$ behold．
一，$\ell k \lambda \dot{\xi} \theta \eta \eta, I$ call．
fort．
тєрıтатén，I walk．
$\pi o t \epsilon \omega$, I do，I make．
$\pi \rho о \sigma \kappa v \nu \epsilon \omega, ~ I$ worship（usu－ ally takes the dative）．

$\tau \eta \rho \epsilon \omega$, I keep．
тцдás，I honor．
$\phi \iota \lambda \epsilon \omega$ ，I love（denotes a love akin to friendship．The word is much less fre－ quent in the New Testa－ ment than á $\gamma a \pi \dot{a} \omega)$ ．

## Rules of Contraction ${ }^{1}$

314．Two vowels or a vowel and a diphthong are often united into a single long vowel or diphthong．The process by which they are united is called contraction．
${ }^{1}$ The following formulation of the rules of contraction is，in essentiais， that which is given in White，Beginner＇s Greek Book，1895，pp．75f．It has been used here by kind permission of Messers．Ginn and Company．
315. It must not be supposed, however, that contraction always takes place when two vowels or a vowel and a diphthong (even in the combinations set forth in the following rules) come together within a word.
316. The rules of contraction are as follows:
I. Vowel with Vowel

1. An open and a close vowel, when the open vowel comes first, are united in the diphthong which is composed of the two vowels in question.
Example: $\epsilon \iota$ makes $\epsilon$. It must be observed, however, that when the close vowel comes before the open vowel, a diphthong is never formed. Thus $t-\epsilon$ (for example, in Lepóv), is always two syllables, never a diphthong.
2. Two like vowels form the common long.

Examples: $a-a$ makes long $a ; \epsilon \eta$ makes $\eta$; $o-\omega$ makes $\omega$.
3. But $\epsilon \in$ makes $\epsilon$ and $0-0$ makes ou.

This rule forms an exception to rule 2.
4. An o- sound (o or $\omega$ ) overcomes $a, \epsilon$, or $\eta$ (whether the $o$ - sound comes frst or second), and forms $\omega$.

Examples: $a-a$ makes $\omega$; $\epsilon \omega$ makes $\omega$.
5. But $\in-0$ and $0-\epsilon$ make ov. This rule forms an exception to rule 4.
6. When $a$ and $\epsilon$ or $\eta$ come together, whichever one comes first overcomes the other, and forms its own long.
Examples: $a-\epsilon$ and $a-\eta$ make long $a ; \epsilon-a$ makes $\eta$.

## Ii. Vowel with Diphthong

1. A vowel disappears by absorption before a diphthong that begins with the same vowel.

Examples: $\in \in t$ makes $\in t$; oov makes ou.
2. When a vowel comes before a diphthong that does not begin with the same vowel, it is contracted with the diphthong's first vowel. The diphthong's second vowel disappears, unless it is $t$, in which case it becomes subscript.

Examples: $a-\epsilon$ makes $a$ ( $a$ is first contracted with $\epsilon$ in accordance with I 6 , and then the $\&$ becomes subscript); $a-o v$ makes $\omega$ ( $a$ is contracted with o by I 4, and the $u$ disappears); $\epsilon-0$ makes ou ( $\epsilon$ is contracted with o by I 5, and $v$ disappears).
3. But o-st and o-n make ob.

## III. Accent of Contract Syllables

1. If either of the contracted syllables had an accent, the resulting syllable receives an accent. If the resulting syllable is a penult or an antepenult, the general rules of accent (see §11) will always tell which kind of accent it has. If the resulting syllable is an ultima it has a circumflex.

Examples: (1) фi入forev makes фidou $\mu \in \nu$, in accordance with I 5. Since one of the two syllables that united to make ov had an accent, ov must have an accent. The general rules of accent declare that if the ultima is short, a long penult, if accented at all, must have the circumflex. Hence $\phi i \lambda o j \mu \epsilon \nu$ is correct. (2) $\tau \iota \mu a \delta \mu \epsilon \theta a$ makes $\tau \iota \mu \omega \mu \epsilon 6 a$ in accordance with I 4. Since one of the two syllables that united to make $\omega$ had an accent, $\omega$ must have an accent. But in accordance with the general rules of accent only an acute can stand on an antepenult. Therefore $\tau \iota \mu \dot{\alpha} \mu \epsilon \theta a$ is correct. (3) $\delta \eta \lambda$ dós makes $\delta \eta \lambda$ ous in accordance with II 3. Since one of the two syllables that united to make ou had an accent, of must have an accent. The general rules of accent will permit either an acute or a circumflex to stand on a long ultima. But the present rule gives special guidance. Therefore $\delta \eta \lambda$ ois is correct.

2．If neither of the contracted syllables had an accent， the resulting syllable receives none．

Example：$\in \phi i \lambda \epsilon \epsilon$ makes $\epsilon \phi \nu \epsilon \epsilon$ in accordance with I 3. Since neither of the two syllables that unite to make $\epsilon i$ is accented，$\epsilon$ receives no accent，and éqí $\epsilon \iota$ is correct．

## Present System of Contract Verbs

317．The student should write out in the uncontracted forms the present system（present tense in all moods studied thus far，and imperfect tense）of $\tau<\mu a \dot{\prime} \omega$, I honor，фl入é $\omega, I$ love，and $\delta \eta \lambda o w, I$ make manifest，and should then write the contract form opposite to each uncontracted form，applying the rules of contraction．The results can be tested by the conjugation of these verbs which is given in $\$ \S 590-592$ ．

318．It should be observed that there are two exceptions to the rules：（1）the present active infinitive of verbs in －a山 is contracted from－áciv to－ầ instead of to－ầ $y$ ，and（2） the present active infinitive of verbs in－ow is contracted from $0-\epsilon L \nu$ to $-0 \hat{\nu} \nu$ instead of to $-o i n$ ．

319．Contraction is carried out in all the forms of the declension of the participles．

320．In general，the uncontracted forms of these verbs in－á $\omega,-\hat{e}^{2} \omega$ and $-b \omega$ do not occur in the New Testament． The reason why the uncontracted forms，and not the con－ tract forms，of the present active indicative first person singular are given in the lexicons is that the uncontracted forms must be known before the verb can be conjugated， since it makes a great difference for the conjugation whether $\tau \iota \omega \hat{\omega}$ ，for example，is contracted from $\tau \iota \mu \dot{\alpha} \omega$ ，$\tau \iota \mu \epsilon \omega$ ，or тィцо́ш．

Principal Parts of Verbs in $-\hat{a} \omega,-\epsilon \omega$ and $-\dot{d} \omega$
321. Verbs whose stems end in a vowel regularly lengthen that vowel ( $a$ as well as $\epsilon$ being lengthened to $\eta$ ) before the tense suffixes (e.g. the $-\sigma 0 / \epsilon$ of the future system, the $-\sigma a$ of the first aorist system, and the $-\theta \epsilon$ of the aorist passive system). Thus the principal parts of $\tau \ell \mu a \omega$, so far as we have learned them, are $\tau \mu \dot{\alpha} \omega$, $\tau \iota \mu \dot{\eta} \sigma \omega, \dot{\epsilon} \tau i \mu \eta \sigma a$, 一, —, $\dot{\epsilon} \tau \iota \mu \eta \eta_{\eta \nu \nu}$ (not $\tau \iota \mu \dot{\alpha} \omega, \tau \iota \mu \dot{\alpha} \sigma \omega$, etc.); the principal parts of $\phi \iota \lambda \dot{\epsilon} \omega$ are $\phi \iota \lambda \dot{\epsilon} \omega, \phi \iota \lambda \hat{\eta} \sigma \omega$, etc.; and the principal parts of $\delta \eta \lambda o \omega$ are $\delta \eta \lambda o ́ \omega, \delta \eta \lambda \dot{\omega} \sigma \omega$, etc. It ehould be observed that this lengthening of the final vowel of the stem of these "contract" verbs has nothing to do with contraction. The contraction appears only in the present system.
322. It is very important that the student should learn to reverse the process involved in this rule. Thus, if a form $\phi a \nu \in \rho \omega \theta \theta$ is be found in the Greek-English exercises, the student should first say to himself that the $-\theta \in$ in $\phi a v \in \rho \omega \theta$ eis is evidently the sign of the zorist passive system. The verb stem without the tense suffix would be фapepar. But since the final vowel of the verb stem is lengthened before the tense suffix $-\theta \epsilon$, the verb stem was $\phi a \nu \in \rho-$ and the verb was $\phi a v \in p \delta \omega$. Or if a form $\eta \rho \omega \tau \tau \dot{\eta} \phi \eta$ be found, the student should first say to himself that the $-\theta \eta$ is evidently the ending of the aorist passive indicative, third person singular, like Eגídך. But the aorist passive indicative has the augment, which if the verb begins with a vowel consists in the lengthening of that vowel. Therefore, to get the verb, the $\eta$ at the beginning of $\dot{\eta} \rho \omega \tau \dot{\eta} \theta \eta$ must be shortened. But $\eta$ is the long of either $a$ or $\epsilon$. It cannot be determined, therefore, whether the verb began with a or $\varepsilon$. Again, the $\eta$ just before the $-\theta \eta$ in $\eta \rho \omega \tau \dot{\eta} \theta \eta$ was the lengthened form of the verb stem. The verb stem therefore ended in either a or $\epsilon$. Accordingly there are four possibilities as to the verb
from which $\dot{\eta} \rho \omega \tau \dot{\eta} \theta \eta$ may be found to have come; $\dot{\eta} \rho \omega \tau \dot{\eta} \theta \eta$ may be found to have come from dow $\rho \dot{\epsilon} \omega, \dot{\alpha} \rho \omega \tau \dot{\alpha} \omega, \dot{\epsilon} \rho \omega \tau \in \dot{t} \omega$, or $\dot{\epsilon} \rho \omega \tau a \dot{a} \omega$. Trying each of these in the lexicon we discover that the last is correct.
323. кa入é $\omega$ is an exception to the rule just given. It does not lengthen the final $\epsilon$ of the stem before the $\sigma$ of the future and aorist systems. The aorist passive, moreover, is irregularly formed.

## 324.

## Exercises

II. 1. Those things spake Jesus to those who were following Him out of Galilee. 2. I was beholding Him who had loved me and died in behalf of me. 3. Let us worship the One who does these things and bless His holy name. 4. Those who were beholding Him as He was walking in Galilee were soying that they did not wish to follow Him. 5. Having followed Jesus as He was walking in Galilee, they beheld Him also after He had been raised up from the dead. 6. Let us seek the One who has spoken to us words of hope. 7. Let us bless the narne of the One who walked with us in the world and was crucified in behalf of us. 8. If thou followest Him who does these things, thou wilt behold Him in His glory. 9. If we do not love those who bless us we will not love those who do evil things. 10. He loves us and makes manifest to us His glory, in order that we may bless God for ever. 11. While the multitudes were following Jesus and were hearing the things which were being spoken by Him, the rulers were saying that they did not love Him. 12. I will show to those who have followed me the things which have been shown to me by Jesus. 13. These are those who love Jesus and beheld His works and were called into His kingdom. 14. His brother exhorted him to follow Jesus in order that he might be with Him for ever. 15. This parable we speak to those who love God and keep His commendments. 16. This is the child that blesses God and loves Him.

## LESSON XXIV

Future and First Aorist Active and Middle of Liquid Verbs.
Future of cipi. Reflexive Pronouns
325.

Vocabulary
$\dot{\dot{a}} \lambda \lambda \bar{j} \lambda \omega \nu$, reciprocal pron., $\dot{e} \pi i$, prep. with gen., over, of each other, of one an- on, at the time of; with other.
àтo日avoû $\mu \mathrm{a}, ~ I$ shall die, dep. fut. of áтоӨ $\mu \dot{\prime} \sigma \kappa \omega$.
 and aor. of dं $\pi$ октeiv, $I$ kill.
 and aor. of a $\pi \sigma \sigma \tau \hat{\lambda} \lambda \lambda, I$ send.
d $\rho \hat{\omega}, \eta{ }_{\eta} \rho a$, fut. and aor. of aifo, I take up, I take away.
$\beta a \lambda \hat{\omega}, I$ shall throw, I shall cast, fut. of $\beta \dot{\alpha} \lambda \lambda \omega$.
himself.
 of é $\gamma \in i p \omega, I$ raise up.
द́navтồ, reflexive pron., of myself.
dat., on, on the basis of, at; with acc., on, to, against ( $\dot{E} \pi i$ is an exceedingly common, but a rather difficult, preposition. Its various uses must be learned by observation in reading).
ëбouas, I shall be, fut. of сi, $i$.
$\mu \epsilon \nu \hat{\omega}, \stackrel{\ddot{\epsilon}}{\mu \in L \nu a, ~ f u t . ~ a n d ~ a o r . ~}$ of $\mu \epsilon \in \omega$, I remain.
$\mu \in$ ªvoća I repent.
$\sigma \in a v \tau o \hat{v}$, reflexive pron., of thyself.
$\sigma \pi \epsilon i \rho \omega, \sigma \pi \epsilon \rho \hat{\omega}, \epsilon \epsilon \sigma \pi \epsilon i \rho a,-$, —, єのтáp $\downarrow$, $I$ sow. фоßéo $\alpha$ а, dep. with passive forms, I am afraid, I fear, I am afraid of. various presonit
326. Liquid verbs are verbs whose sterns end in $\lambda, \mu_{1} y$, or $\rho$, these consonants being celled liguids.

## 327．The Future of Liquid Verbs

The future active and middle of liquid verbs is formed， not by adding $-\sigma \sigma / \epsilon$ ，as is the case with other verbs，but by adding－$\epsilon 0 / \epsilon$ ，to the verb stem．The $\epsilon$ contracts with the following variable vowel，in accordance with the rules of contraction given in the preceding lesson．Thus the future active and middle of liquid verbs is conjugated exactly like the present of verbs in－E $\omega$ ．

328．The future active indicative of kpivw，$I$ judge， is as follows：

Sing．1．$k \rho \iota \nu \hat{\omega}$
Plur．1．крıvovipey
2．кplveîs
2．крเขєîtє
3．крเขย $\mathfrak{i}$
3．крเขои̂ $\sigma \iota(\nu)$
329．It will be observed that the only way in which the future active indicative in the three persons of the singular and in the third person plural is distinguished（in appear－ ance）from the present active indicative of koivo is by the accent．

330．The future middle indicative of kot $\nu \mathrm{d}$ is as follows：

Sing．1．косvov̂ $\mu a \iota$
2．$k \rho \iota \nu \hat{\eta}$
3．крıнеitat

Plur．1．крıдо⿱亠䒑 $\mu \in \theta a$
2．$\kappa \rho \iota \nu \in \check{\sigma} \sigma \theta$
3．крเขอยิขтaц

331．It will be remembered（see §157）that the verb stem is often disguised in the present system．Thus the future of a liquid verb is often distinguished from the present by something more than the addition of the $\epsilon$ ．

Example：The future of $\beta a \dot{\lambda} \lambda \omega$ is $\beta a \lambda \hat{\omega}, \beta a \lambda$－and not $\beta a \lambda \lambda$－being the verb stem．Even кpıv̂ really differs from the present kpipw in that the $\iota$ is short in the future and
long in the present. But even that distinction does not prevail in the case of $\mu$ év $\omega$.
332. Some verbs have liquid stems in the future but not in other tenses.

Example: The future of $\lambda \hat{\varepsilon} \gamma \omega$ is $\dot{\epsilon} \rho \hat{\omega}$.

## The First Aorist of Liquid Verbs

333. The first aorist active and middle of liquid verbs is formed not by adding -aa to the verb stem but by adding -a alone and making changes within the body of the word, the verb stem usually being lengthened ( $\epsilon$ Jengthened not to $\eta$ but to $\epsilon t$. The conjugation, in all the moods, is like the conjugation of other first aorists.

Examples: (1) The first aorist active of $\mu \dot{t} \nu \omega$, I remain, is ${ }^{\mu} \mu \epsilon i \nu a$ (indic.), $\mu e l \nu \omega$ (subj.), $\mu \epsilon i v a \imath$ (inin.) and $\mu \in i v a s$ (part.). (2) The first aorist active of a $\pi$ oor $\tau \lambda \lambda \omega, I$ send,
 and à aor $\tau \in \dot{i} \lambda a s$ (part.).
334. Of course liquid verbs may have second aorists or irregular aorists. Sc the aorist of $\beta \dot{\alpha} \lambda \lambda \omega$ is a second aorist द́ $\beta a \lambda$. $\nu$. Some verbs, moreover, may have a present stern ending in a liquid, and yet not be liquid verbs. Thus $\lambda a \mu \beta \dot{a} \nu \omega$ is not a liquid verb, the verb stern being $\lambda a \beta$-. The student is reminded again that one cannot always predict what the various tense systems of a Greek verb will be. The lexicon must be consulted.
335. Future Indicative of $\epsilon \dot{\epsilon} \mu i$.

The future indicative of $\varepsilon$ i $\mu i, I \mathrm{am}$, is as follows:
Sing. 1. ёодиаи

2. ยี $\sigma \square$
2. $\frac{\text { é }}{} \sigma \epsilon \sigma \theta \epsilon$
3. ย̈எтal
3. Évovtal

It will be observed that the conjugation is just like that of the future middle of $\lambda \dot{v} \omega$, except that in the third person singular the variable vowel is omitted, そ̈ $\sigma$ тal standing instead of è $\sigma \in \tau a l$.

## 336. The English Preparatory Use of "There"

The word there is sometimes put before the verb in an English sertence without any special force except as an indication that the subject is to follow the verb. This "preparatory" there is not translated at all in Greek.

 disciples in the house.

## Declension of Refiexive Pronouns

337. The declension of tuautô̂, ĥs, of myself, the reflexive pronoun of the first person, is as follows:

Sing.
Plur.

| Sing. |  | Plur. |  |
| :---: | :---: | :---: | :---: |
| M. | F. | M. | F. |
| G. $\frac{\text { haviov̀ }}{}$ | Ėдaviñs | G. Ėavtêy | $\dot{\text { ¢̇autûp }}$ |
| D. $\dot{\epsilon}^{\prime} \mu \nu \tau \bar{\varphi}$ | $\dot{\epsilon} \mu$ 人vin | D. éautois | ėqutaís |
|  |  | A. ėavtoús | ċavtá |

338. The declension of $\sigma \epsilon a v \tau o \hat{v}$, $\bar{\eta} s$, of thyself, the reflexive pronoun of the second person, is as follows:

| Sing. |  | - Plur. |  |
| :---: | :---: | :---: | :---: |
| M. | F. | M. | F. |
| G. $\sigma \in a v t \hat{v}$ | $\sigma \epsilon a \nu \tau \hat{\eta} s$ | G. ${ }^{\text {áavtāy }}$ | ่̇̇avtêv |
| D. $\sigma \epsilon \alpha \cup \tau \hat{\varphi}$ | $\sigma \epsilon \alpha u \tau \hat{n}$ | D. Éavtois | éautaîs |
| A. $\sigma \in a v \tau \delta \nu$ | бeautin | A. Eavtoús | éautás |

339．The declension of $\dot{\text { enaurồ，}} \hat{\eta} \mathrm{s}$ ，ov，of himself，of herself，of itself，the reflexive pronoun of the third person，is as follows：

| M． | $\underset{\sim}{\text { Sing. }}$ | N． | M． | Plur． F． | N． |
| :---: | :---: | :---: | :---: | :---: | :---: |
| G．Eavtou | 京avtins | ėautov̂ | G．$\frac{1}{} \alpha \nu \tau \bar{\omega} \nu$ | ่̇autû̀ |  |
| D．$\frac{\varepsilon}{\text { ever }} \hat{\underline{\omega}}$ | ċavtî | ¢̨̇ū¢ิ | D．ėavtois | ėautaîs | cautois |
| A．éautóy | Ėaut立 | ċavtó | A．Ėautoús | èqutás | ċautá |

340．It will be observed that the declension of the reflex－ ive pronouns is like that of aúrós，except that there is no nominative case and in the reflexive pronouns of the first and second persons no neuter gender．

341．In the plural，éaur $\hat{\omega} y$ ，which originally belonged only to the pronoun eavodo of the third person，is made to do duty for all three persons．

## 342．Use of Reflexive Pronouns

Reflexive pronouns are pronouns that refer back to the subject of the clause．

Examples：（1）ov่ $\lambda a \lambda \hat{\omega} \pi \in \rho i$ é $\mu a u \tau o \hat{v}, I$ do not speak concerning myself；（2）oú סo弓á\} $\operatorname{cis} \sigma \in a v \tau o ́ v$ ，thou dost not
 himself；（4）do弓àjert $\mathfrak{\text { equivoús，ye glorify yourselves．}}$

## 343.

Reciprocal Pronoun
The reciprocal pronoun is $\dot{\alpha} \lambda \lambda \hat{\eta} \lambda \omega \nu$ ，of one another，of each other．It occurs in the New Testament only in the forms $\dot{a} \lambda \lambda \dot{\eta} \lambda \omega \nu$ ，of one another，$\dot{a} \lambda \lambda \dot{\eta} \lambda o w s$ to or for one another，and
 another）．

## 344.

## Exercises

II. 1. When Jesus has taken away our sins we shall be holy for ever. 2. Let us not begin to sayl in ourselves that

[^7]we do not know Him. 3. We shall not fear the ruler who killed the prophets, for God will send His angels to us. 4. When the soldiers had killed Jesus our Lord, we were afraid and went away from Him. 5. He said that it was not necessary for us to see each other. 6. If ye persecute and kill those who are being sent to you, ye shall no longer be the people of God. 7. The multitudes went away, but those who remained said that He had the words of life. 8. When Jesus had spoken these things and had sent His disciples into the villages of Galilee, the Pharisees were afraid of the people. 9. Having killed Jesus they will cast out of their synagogues those who have believed on Him. 10. The apostle himself did not save himself, but God was the One who saved him. 11. When the Lord had spoken this parable, those rulers said that they would kill those who had been sent by Him. 12. Unless Jesus himself sends us we shall not be disciples of Him. 13. Unless ye repent ye will remain in $\sin$ forever. 14. He who said this word to the One who sent the apostles will say the same word also to those who have been sent by Him. 15. Those good disciples, having loved those who were following Jesus, will love also those who follow His apostles. 16. Those who saw Him as He was walking in Galilee will behold Him in heaven for ever.

## LESSON XXV

More Nouns of the Third Declension Adjectives of the Third Declension in - $\eta s$, - $s$
345.
à $\lambda \eta \theta \dot{\eta} s, \dot{\epsilon}^{\prime}$, adj., true. à $\nu \eta \dot{\eta} \rho$, àvôpós, $\delta$, a man (à $\nu \eta \dot{\rho}$ is a man as distinguished from women and children; a $u \theta \rho \omega \pi o s$ is a human being as distinguished from other beings).
 chief priest.
 रèvos, yèvous, tó, a race, a kind.

Vocabulary
 a scribe.
étpos, Éqvous, tó, a nation; plur., tà ${ }^{\text {e }} \theta \nu \eta$, the nations, the Gentiles.
$i \epsilon \rho \epsilon \dot{\varepsilon}, ~ i \in p \in ̇ \omega s, \dot{\Delta}$, a priest. $\mu \dot{\eta} \tau \eta \rho, \mu \eta \tau \rho o \dot{s}, \dot{\eta}, a$ mother. öpos, öpous, тb, a mountain. татй, тarpós, $\dot{o}$, a father. $\pi i \sigma \tau i s, \pi i \sigma \tau \epsilon \omega s, \dot{\eta}$, faith.
$\pi \lambda \dot{\eta} \rho \eta \mathrm{s}, ~ \epsilon \mathrm{~s}$, adj., full.
$\pi o ̈ \lambda \iota s, \pi \dot{\partial} \lambda \epsilon \omega \bar{\prime} \dot{\eta}, a$ city.
$\chi$ ápıs, $\chi$ ápıtos, $\dot{\eta}$, grace.
346. Before studying the present lesson, the student should review the paradigms in Lesson XVII.
347. The declension of $\chi \dot{\alpha} \rho \iota s, \chi$ ápıтos, $\eta$, grace, is as follows:

| Sing. | Plur. |
| :---: | :---: |
| N. V. $\chi^{\prime}$ pls | N. V. $\chi$ ג́pltes |
| G. $\chi^{\text {daptros }}$ | G. $\chi$ ¢ ${ }^{\text {apitay }}$ |
|  | D. रápıot $(\nu)$ |
| A. $\chi^{\text {ajp }}$ ¢ | A. xápıtas |

348. This noun differs from those in $\delta 211$, in that the accusative singular ending is $-\nu$ instead of $-a$. The final $\tau$ of the stem (харıт-) drops out before the $-\nu$. If $\chi$ thpis were declined like $\hat{\epsilon} \lambda \pi$ is the accusative singular would be $\chi \dot{\alpha} \rho \iota \tau a$.
349. The declension of $\pi \dot{0} \lambda(s, \pi \dot{b} \lambda \epsilon \omega 5$ (stem $\pi 0 \lambda L$ ), $\dot{n}, a$ city, is as follows:

## Sing.

N. $\pi b \lambda_{l s}$
G. $\pi \hat{o} \lambda \epsilon \omega s$
D. $\pi \delta \lambda_{\mathrm{E}}$
A. $\pi \dot{o} \lambda เ \nu$
V. $\pi o ́ \lambda \iota$

Plur.
N. V: $\pi \delta \lambda \in L 5$
G. $\pi \delta \lambda \epsilon \omega \nu$
D. $\pi \dot{o} \lambda \epsilon \sigma t(\nu)$
A. $\pi \dot{\partial} \lambda \epsilon \epsilon s$
350. The final $\llcorner$ of the stem is changed to $\epsilon$ except in the nominative, accusative and vocative singular.
 and $\pi o ́ \lambda e l s$ in the nominative plural from $\pi o d \in \epsilon s$, in accordance with the rules of contraction given in Lesson XXIII. The accusative plural has eels, instead of - 6 as or (as the rules of contraction would require) - $\eta s$. The accusative singular has instead of $-a$ the $\nu$ - ending which appears in certain other third declension nouns such as xapıs. The genitive singular ending is -ws instead of -os. The accent in the genitive singular and plural of this class of nouns is the only exception to the rule that if the ultima is long the antepenult cannot be accented (see §11).
351. These third-declension nouns in -is with genitives in - $\epsilon$ os, of which ródes is an example, form a very important class of nouns in the New Testrment. The nouns of this class are declined alike and are all of feminine gender.
352. The declension of $\gamma \in \nu 0 s, \gamma \in \nu o u s$, (stem $\gamma \in \nu \in \sigma-$ ), $\tau b$, a race, is as follows:

Sing.
N. A. V. 子éyos
G. रévous
D. $\gamma \dot{y} \nu \in \iota$

Plur.
N. A. V. $\gamma \in \nu \eta$
G. $\gamma \in \nu \omega \bar{\omega}$
D. $\gamma \dot{\varphi} \nu \in \sigma \iota(\nu)$
353. The final $\sigma$ of the stem ( $\gamma \epsilon \nu \in \sigma_{-}$) is dropped except in the nominative singular. The $\epsilon$ which is then left at the end of the stem is contracted with the vowels of the regular third-declension endings, in accordance with the rules of contraction given in Lesson XXIII.
354. These third-declension nouns in -os, ovs, are declined alike, and are all of neuter gender.
355. The declension of $\beta a \sigma \iota \lambda \epsilon$ ís, Baбı入éws (stem $\beta a \sigma L-$ $\lambda \in u-), \delta$, is as follows:

## Sing.

N. Ba. $\sigma i \lambda \in \dot{s}$
G. $\beta a \sigma \iota \lambda \in ́ \omega s$
D. $\beta a \sigma \iota \lambda \in \hat{\imath}$

V. $\beta a \sigma \iota \lambda \epsilon \hat{1}$

Plur.
N. V. Bacideis
G. $\beta a \sigma L \lambda \epsilon \in \nu$
D. $\beta a \sigma \iota \lambda \epsilon \bar{u} \sigma \iota(\nu)$
A. Baбl $1 \in i \hat{s}$
356. The final $v$ of the stem is dropped before those endings which begin with a vowel. Contraction takes place in the dative singular and nominative plural. The genitive singular has -ws instead of os (compare modis.). But the accusative singular has the $a$-ending, not the $\nu$-ending.
357. These nouns in -єv5, - $\epsilon \omega s$ are masculine.
358. Observe the declension of $\pi a \tau \eta \dot{n} p$ and of aun in $\$ 565$.
359. The declension of other third-declension nouns will give little difficulty when once the genitive singular and the gender are known. Only the dative plural is sometimes troublesome, but the forms can at least be easily recognized when they occur.
360. The declension of $\dot{a} \lambda \eta 6$ ins, és (stem $\dot{a} \lambda \eta \theta \in \sigma$-), true, is as follows:

Sing.
M. F.
N.
M.F.
N.
N. $\dot{a} \lambda \eta \theta \dot{\eta} s \quad \dot{a} \lambda \eta \beta \dot{\epsilon} \dot{s} \quad$ N. V. $\dot{\alpha} \lambda \eta \theta \in \dot{\imath} \dot{s} \quad \dot{\alpha} \lambda \eta \theta \hat{\eta}$
G. à $\lambda \eta \theta_{0} \hat{v} s \quad \dot{a} \lambda \eta \theta_{0} \hat{s}$
G. $\dot{\alpha} \lambda \eta \theta \hat{\omega} \nu$
$\dot{\alpha} \lambda \eta \theta \hat{\omega} v$
D. $\dot{a} \lambda \eta \theta \in \hat{\imath}$
$\dot{a} \lambda \eta \theta \in \hat{\imath}$
D. $\dot{a} \lambda \eta \theta \in \dot{\epsilon} \sigma l(\nu)$
$\dot{a} \lambda \eta \theta \dot{\epsilon} \sigma\llcorner(\nu)$
A. $\dot{\alpha} \lambda \eta \theta \hat{\eta} \quad \dot{a} \lambda \eta \theta \epsilon \in$
A. $\dot{d} \lambda \eta \theta \in i s$
$a \lambda \eta \theta \hat{\eta}$
V. á $\lambda \eta \theta^{\prime} \dot{s}$
$\dot{a} \lambda \eta \theta \dot{e} s$
361. The final $\sigma$ of the stem is dropped in most of the forms, and contraction then takes place. Compare $\pi \dot{d} \lambda t s$, خévos, and Baбilés.s.
362. This is the first adjective studied thus far which is declined according to the third declension in the feminine as well as in the masculine and neuter.
363.

## Exercises

入єis rov̀s a a

 עєì. 13. oi Baбu入eîs oi mov

II. 1. This is the race that killed those who believe on Jesus. 2. When the scribes had entered into that city, the disciples went away to the mountains. 3. We saw that the word which was being spoken by the man was true. 4 . When the Lord had said this to the chief priests, the ruler marvelled. 5. The father of him who killed the men will kill also the children. 6. God will raise up from the dead those who have been saved by His grace. 7. Ye shall be saved by God through faith. 8. On account of the faith of the fathers and of the mothers the children will die in the evil city. 9. The city being itself full of sin has also a wicked king. 10. If we enter into those cities having our hearts full of grane and faith and hope, those who repent at our word will
see the King in His glory. 11. Jesus said to the scribes who were following that He was going into the holy city. 12. If we love the brethren we shall bless also the One who sent them into the nations. 13. The king said to my father that the chief priests and Pharisees wished to kill those who were following Jesus. 14. While Jesus was speaking these things in that wicked city, the chief priests were gathering together the soldiers in order that they might kill Him. I5. Those who have not the grace of God in their hearts have neither life nor hope. 16. If ye go into those cities and villages, ye shall see the king who killed your fathers and your mothers.

## LESSON XXVI

Declengion of râs，ro入ús，uèras，and Numerals．Attribu－ tive and Substantive Uses of Prepositional Phrases and of the Genitive．Accusative of Extent of Time and Space

## 364.

Sion，two．
eis，$\mu i a, ~ e ̨ y$, one．
E $\xi$ ，indecl．，six．
द́tos，द̌tous，tó，a year．
ท，conj．，or．
йөє ${ }^{\prime}$ ov，imperfect indic．of
$\theta \in \lambda \omega$（with an apparently
irregular augment，but an－
other form of the verb was e $\theta \in \lambda \lambda \omega$ ）．
＇Iakwßos，í，James． кaßapós，í，b̀v，adj．，clean， pure．
$\mu \dot{\epsilon} \gamma a s, \mu \in \gamma \dot{a} \lambda \eta, \mu \hat{c} \gamma a$, adj．， great．
$\mu \eta \delta \epsilon i s, \mu \eta \delta \in \mu i a, \mu \eta \delta \varepsilon \nu, n o$ one， nothing（with moods other than the indicative）．
b入iros，$\eta$ ，ov，adj．，little，few．

## Vocabulary

 nothing（with the indica－ tive）．
$\pi \hat{a} s, \pi \hat{a} \sigma a, \pi \bar{a} \nu$, adj．，all，every．
теутакıгхi入ıol，ab，a，five thousand．
$\pi \dot{\epsilon} \nu \tau \epsilon$ ，indecl．，five．
 titude．
$\pi 0 \lambda u ́ s, \pi o \lambda \lambda \eta \dot{\eta}, \pi o \lambda u ́, ~ a d j .$, much，many．
$\pi o u ́ s$, rodos，$\dot{\mathbf{j}}$, a foot．
 but also masc．oi $\sigma \tau \hbar \delta(01)$ ， a stadium，a furlong．
тéoбapes，a，four．
трєís，тpia，three．
$\dot{\omega}$ s，adv．，as ；with numerals， about．

365．The declension of $\pi \hat{a ̂ s}, \pi \hat{a} \sigma a, \pi \hat{a} \nu$ ，adj．，all，evety， is as follows：

| Sing. |  |  | Plur. |  |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| M. | F. | N. | M. | F. | N. |
| N. $\pi$ âs | $\pi \hat{a} \sigma a$ | тầ | N. ${ }^{\text {áàjves }}$ | тâбat | $\pi$ ávia |
| G. mavtós | пáaךs | тavtós | G. $\pi \dot{\alpha} \nu \boldsymbol{\nu} \omega \nu$ | тaouv | тávt山上 |
| D. Tavti | $\pi \dot{\sim}$ | Tavií | D. $\pi \hat{\alpha} \sigma_{l}(\nu)$ | Thoals | $\pi \hat{a} \sigma \downarrow(\nu)$ |
| A. Távta | $\pi \hat{a} \sigma a \nu$ | กâ้ | A. тávtas | máoas | $\pi a ́ \nu \tau a$ |

366. The masculine and neuter stem is ravr- and the word is' deolined nearly like the first aorist active participle of $\lambda \dot{v} \omega$. But the accent is slightly irregular in the masculine and neuter, since it follows the rule for monosyllables of the third declension (see §221) in the singular but not in the plural.

## The Use of $\pi$ âs

367. $\pi \hat{a} s$ can stand in the predicate position with a noun that has the article. This usage corresponds so exactly with English as to call for little explanation.

Example: $\pi a \tilde{\sigma} \sigma a \dot{\eta} \pi \delta \lambda c s$, all the city.
368. But $\pi$ âs can also stand in the attributive position.

Example: $\dot{\eta} \pi \hat{a ̂} \sigma a \pi d\langle\lambda s$, the whole city; oi $\pi \alpha \nu \tau \epsilon s \mu a 0 \eta \tau a l$, the whole body of disciples, all the disciples.
369. With a singular noun, $\pi$ âs often means every.

Example: $\pi a ̂ \nu$ bopos, every mountain.
$\pi \hat{a} s$ is frequentily used with article and participle.
Examples: $\pi$ âs $\dot{o}$ otaréjuv, everyone who believes; $\pi$ áaves oi twoteloutes, all those who believe; tavta tà buta èteí, all the things that are there.
370. Deciension of $\pi 0 \lambda \psi s$ and of $\mu e \hat{\gamma} a s$

Learn the declension of $\pi 0 \lambda u{ }^{\prime} s, \pi 0 \lambda \lambda \dot{\eta}, \pi 0 \lambda t$, much, many, great, and of $\mu \hat{\gamma} \gamma a s, \mu \epsilon \gamma \hat{a} \lambda \eta$, $\mu \hat{\epsilon} \gamma a$, great, in $§ § 574,575$. It will be observed that except for the short forms in the
nominative, vocative and accusative, masculine and neuter singular, these two adjectives are declined like ordinary adjectives of the second and first declension.

## Numerals

371. The declension of $\epsilon i s, \mu i a$, $\begin{aligned} & \nu \\ & \text {, one, is as follows: }\end{aligned}$

| M. | F. | N. |
| :---: | :---: | :---: |
| N. els | $\mu \mathrm{ma}$ | E |
| G. $\mathrm{E}^{\text {d }}$ S | mâas | tybs |
| D. $\dot{e} \nu \dot{\prime}$ | $\mu ц \underline{a}$ | evi |
| A. Ėva | $\mu \mathrm{i}$, | \% |

The slight irregularities should be noticed.
372. The declension of oúdeis, oú $\delta \in \mu i a$, oú $\delta \dot{e} y$, no one, and $\mu \eta \delta \varepsilon i s, \mu \eta \delta \epsilon \mu i a, \mu \eta \delta \epsilon \nu, n o$ one, is like that of eis.
373. Sío, two, is indeclinable (the same for all cases and genders) except that it has a dative form $\delta$ ofi $(\nu)$.
374. The declension of tpeis, toia, three, and of rtooapes, TEjoapa, four, may be found in $\$ 588$.
375. The other cardinal numerals up to $\delta$ oaxofolol, two hundred, are indeclinable.

## Attributive and Substantive Uses of Prepositional Phrases and of the Genitive

376. Prepositional phrases are frequently treated as attributive adjectives, being placed after the article.

 translation) the disciples who are (or, if the leading verb is past, were] in that city. Here the prepositional phrase takes the exact place of an attributive adjective. It will be remembered that ol àa日oi ma日خrai or oi $\mu a \theta \eta \tau a i$ of
a $\gamma a 0$ oi means the good disciples (see §70). If in these two Greek phrases $\epsilon \nu \tau \hat{\eta} \pi \dot{d} \lambda \epsilon \iota$ be substituted for the attributive adjective a a afoí we have the idiom now under discussion.
377. Like other attributive adjectives, these prepositional phreses can be used substantively.
Example: As oi drafoi means the good men, so ol हो $\tau \hat{y}$ $\pi \delta \lambda \epsilon$ means the in-the-city men, or the men who are (or were) in the city.
378. A noun in the genitive case can be used in this same way.
Example: As oi aratoi means the good men, so oi tov 'Inoov means the of-Jesus men, the belonging-to-Jesus men, $\left\{\begin{array}{l}\text { the ones } \\ \text { the men } \\ \text { those }\end{array}\right\}$ who belong to Jesus.
379. The genitive in this usage may indicate various relationships. Sometimes it indicates sonship. Thus $\delta$ tov $Z_{\epsilon} \in \epsilon \delta \alpha i o v$ may mean the son of Zebedee. The context must determine. All that is certainly implied in the Greek is that the person spoken of is connected in some way with Zebedee. The literal meaning of the phrase is the belonging-to-Zebedee man.
380. Notice that the disciples who are in the city may be
 in-the-city disciples. But the bures is not needed. So also those who are in the city might be oi övtes $\boldsymbol{\epsilon} y$ ry $\pi \dot{d} \lambda \epsilon t$, the being-in-the-city people. But again the $\partial \nu \tau \epsilon s$ is not needed. The prepositional pbrase can be used as an attributive adjective just as well as the participle (with its modifiers) can.
381. All three of the idioms just discussed (oi $\dot{\text { e }} \boldsymbol{\tau} \hat{\eta}$ $\pi o ́ \lambda \epsilon \iota ~ \mu a \theta \eta \tau a i$, oi $\ell \nu \tau \hat{\eta} \pi \dot{\delta} \lambda \epsilon \iota$, and oi rov̂ 'I $\eta \sigma o \hat{v})$ are im-
portant. It should now be increasingly evident how much of Greek syntax is dependent on the distinction between the attributive and the predicate position. See $\S \S 68.74$.
382. Accusative of Extent of Space and Time

The accusative is used to express extent of space or time, answering the question how far? or how long?

## 383.

## Exercises

 ty $\tau \hat{\eta} \mu \nu \kappa \rho \underline{q} .{ }^{1}$ 3. .

[^8]

 ö४оขтal.
II. 1. The chief priests saw that all the things which were being spoken by Jeaus were true. 2. In that place there were about five thousand men with many gifts and many garments. 3. Many are those that go down into the evil way, but few are those who walk in the ways of life. 4. If ye become disciples of me I will show you all things. 5. By the grace of God all we have become disciples of Jesus. 6. Through faith we have become children of our Fether who is in heaven, for Jesus has saved us. 7. Let us do all the things that are in the law, according to the things that are being said to us by the prophets. 8. In that great city we saw three disciples of the Lord praying to their Father in heaven. ${ }^{2}$ 9. When Jesus had called one of the three men who were in the boat, he spake to him all the things concerning the Kingdom of God. 10. We were in the same city one year, but Jesus sent us into all the villages which are in Galiee. 11. When Jesus had done all these great things, the Pharisees said that a demon was in Him. 12. When Jesus had spoken all these things to the multitudes who were in the cities and villages, He sent the disci-

: With what is in heaven to be construed? If it is to be construed with Father, it ahould be put in the ettributive position. The meaning then is our in-heaven Father, our Father who is in heaven.
ples in order that they might preach in the other cities also. 13. All the churches shall see the One who saved them through His grace and sent to them the apostles. 14. Meny kings and priests shall say that all the things which have been spoiken by Jesus are true. 15. We saw no one in that great city except one disciple and a few children. 16. Those who belonged to Jesus died on account of their faith.

## LESSON XXVII

## Interrogative, Indefinite, and Relative Pronouns <br> Deliberative Questions <br> Conditional Relative Clauses

384. 

Vocabulary
airt $\omega, I$ ask, I request.
ci, whether (in indirect questions); the common meaning, if, has already been given.
 I question.
ย $\rho \omega \tau$ tá $\omega, I$ ask a question, $I$ ask a question of, $I$ question, $I$ ask <Originally $\dot{\varepsilon} \rho \omega \tau \dot{\alpha} \omega$ meant to ask in the sense of to question, and aitet $\omega$ meant to ask in the sense of to request. But in New Testament Greek t $\rho \omega \tau$ óa $\omega$ is frequently used in the latter sense as well as in the former).
карті́s, $\dot{\delta}$, a fruit.
крícus, крiбєшs, $\dot{\eta}, ~ a ~ j u d g m e n t . ~$ ötov, adv., where (relative).
ös, 苟, ot, rel. pron., who, which. ăта⿱ for äтє ă $\nu$, whenever (with subjunctive). öт , adv., when (relative). ouv, conj., accordingly, therefore, then (postpositive,
 тiva, mional (very irregular future), ह̆тiov, I dinink. mov̂, adv., where f (interrogative).
$\pi \omega \hat{s}$, adv., how? (interrogative).
tis, ti, interrogative pron., whot which what
Tls, $\tau \iota$, indefinite pron., someone, something, a certain one, a certain thing. фàүoнal, fut. (very irregular), '̇фауov, 2nd aor., of $\dot{e} \sigma \theta^{\prime}(\omega)$, $I$ eat.

## Interrogative and Indefinite Pronouns

385. The declension of the interrogative pronoun, its, ti, whot whicht what?, is as follows:

Sing.
Plur.

|  | M. F. | N. | M. F. | N. |
| :---: | :---: | :---: | :---: | :---: |
| N. | tis | ti | tives | tiva |
| G. | tivos | tivos | Tiv ${ }^{\text {d }}$ | tivas |
| D. | tivh | tivi | Tiol ${ }^{\text {d }}$ ) | Tiot( $)^{\text {( }}$ |
| A. | tiva | $r i$ | tivas | tiva |

386. The declension is according to the third declension in all three genders, the masculine and feminine being alike throughout, and the neuter differing from the masculine and feminine only in the nominative and accusative.
387. The acute accent in the interrogative pronoun is never changed to the grave.

Example: tí $\lambda e ́ \gamma e l$; what does he say?
388. The declension of the indefinite pronoun, $\tau \tau 5, \tau$, some one, something, a certain one, a certain thing, is as follows:

| Sing. |  |  | Plur. |  |
| :---: | :---: | :---: | :---: | :---: |
|  | M. F. | N. | M. F. | N. |
| N. | TLs | 76 | TLDES | тıà |
| G. | tıvós | TLDbs | TLL ${ }^{\nu}$ | Tเขへิ̀ |
| D. | TıLi | TLvl | TıJl( $\nu$ ) | $\tau L \sigma \mathfrak{l}(\nu)$ |
| A. | $\tau<\nu$ á | $\tau$ | tubls | тıעá |

389. The indefinite pronoun is declined like the interrogative pronoun except that all the forms of the indefinite pronoun are enclitic and receive an accent only when the rules in 892 so prescribe.
390. Both the interrogative and the indefinite pronouns can be used either with a noun or separately.

Examples: (1) riva картঠ̀v ёモєтє; what fruit have ye?
 tain man; (4) EiTध̇v $\tau \leftarrow s, a$ certain man said.
391. The accusative singular neuter, $\tau i$, of the interrogative pronoun is often used adverbially to mean why.

Example: $\tau i$ toleite $\tau a \hat{u} \tau a$; why do ye do these things?

## Indirect Questions

392. Indirect questions, like the ordinary form of indirect discourse (see §308), retain the same mood and tense as those which would have been found in the direct discourse lying back of the indirect.
393. The same interrogative words are commonly used in indirect questions as those which are used in direct questions.
 he was. The direct question lying back of the indirect was, tis $\epsilon \mathfrak{l}$; who art thouf (2) eímev aùroîs $\pi 0 \hat{1} \mu \dot{\epsilon} \nu \in t$, he told them where he was abiding. The direct question which he was answering was $\pi o \hat{v} \mu \dot{v} \dot{v}$ es ; where art thou abiding?

## 394. Deliberative Questions

The subjunctive is used in deliberative questions. A deliberative question is a question that expects an answer in the imperative mood.
 we do this or shall we not do itf The answer expected is in the imperative - do it or do not do it. (2) $\tau i \operatorname{\pi ot} \dot{\eta} \sigma \omega \mu \in \nu$; what shall we do The natural answer is do this or do that, or the like.

## The Relative Pronoun

395. The declension of the relative pronoun, obs, $\bar{\eta}, 8$, who, which, is as follows:

| Sing. |  |  |  | Plur. |  |
| :---: | :---: | :---: | :---: | :---: | :---: |
| M. |  | N. | M. |  | N. |
| N. ${ }^{\text {a }}$ | \# | 8 | $\mathrm{O}_{4}$ | al | a |
| G. 0 | ins | -iv | $\pm \nu$ | $\hat{\omega}^{\nu}$ | $\stackrel{\text { ¢ }}{ }$ |
| D. $\dot{\oplus}$ | $\dot{\square}$ | * | ois | ais | ois |
| A. ${ }^{\text {a }}$ | $\eta$ | 8 | ouls | as | a |

396. It will be observed that except for 8 instead of $\delta v$ in the nominative and accusative singular neuter (compare autos and éceivos) the declension of the relative pronoun is like that of a regular adjective of the second and first declension. The nominative singular feminine and the nominative plural masculine and feminine are like the corresponding forms of the article except that the article in those forms is proclitic.
397. Like other pronouns, the relative pronoun agrees with its antecedent in gender and number but has its own case in its own clause.

Example: (1) $\dot{o}$ à $\pi \dot{d} \sigma \tau 0 \lambda o s ~ o ̂ \nu ~ \epsilon i \delta e s ~ \dot{a} \pi \hat{\eta} \lambda \theta \in \nu$, the apostle
 'I $\eta \sigma o$ ês, all things which Jesus said were true; (3) $\delta \mu \mathrm{a} \mathrm{O}_{\mathrm{\eta}} \mathrm{~T}$ is
 Jesus loved was in the house.
398. But where the antecedent of the relative pronoun is in the genitive or dative case and the relative prozoun itself would naturally be in the accusative case as the object of the verb in the relative clause, it is regularly attracted to the case of its antecedent.
 єitev rpds roùs päqràs aùroû...., but when all were
wondering at all the things which He was doing, He said to his disciples..... Here ois would have been accusative if it had retained the case which it would have had in its own clause. But it is attracted to the case of $\pi \hat{a} \sigma \nu \nu$.
399. The antecedent of the relative pronoun is frequently left unexpressed. Thus ös can mean he who; in, she who; ö, that which, what; ol, the men who, or they who; all, the women who; ä, the things which.

Examples: (1) auk $\bar{\epsilon} \xi \in \sigma \tau i \nu \mu o L \delta \partial \hat{\epsilon} \lambda \omega$ notîбal, it is not. lawful for me to do that which $I$ wish (or to do what I
 for he who is not against you is jor you. In such a case essentially the same thought is expressed as by the article
 in many cases only the article with participle could be used. For example in the one who has could hardly be expressed in
 what I wish. Here the English word what is a short way of saying the thing which or that which and so is correctly translated by ö. Compare $\lambda \epsilon \epsilon \gamma \omega$ aúrệ $\tau_{i}^{\prime}$ é $\chi \omega, I$ tell him what I have. Here the English word what is an interrogative word in an indirect question, and so is correctly translated by ri.

## Conditional Relative Clauses

400. The indefinite relative clauses which in English are marked by the suffix -ever added to the relative word (e.g., whoever, whichever, whatever, wherever, whenever), have in Greek ordinarily the subjunctive with the particle äl or $t\langle\nu$. This is one of the commonest uses of the subjunctive.
 oid $\sigma \dot{\alpha} \sigma \epsilon \mathrm{ai}$ ajh, for whoever wishes to save his life shall not save it; (2) òs ầ $\pi เ \sigma \tau \epsilon \dot{\sigma} \eta \eta \quad \sigma \omega \theta \dot{\eta} \sigma \epsilon \tau \alpha L$, whoever believes [or
 $\Delta \psi \in \sigma \theta \in E \nu a \dot{u} \tau \hat{\eta} \mu a \partial \eta r d s$, and into whatever city ye enter [or shall enter] ye shall see disciples in it; (4) Brov tà ŷ̀ o
 wherever the teacher is there will be also those who are being taught by him.
401. It will be observed that the verb in the English translation of these conditional relative clauses can be either future indicative or present indicative. It often makes little difference which is used. In such clauses the present indicative in English frequently refers to future time.
402. 

## Exercises

${ }^{1}$ A noun or pronoun in the genitive case may stand in the predicate
 lotiv $\dot{\eta}$ Baotheia means the kingdom is God's or the kingdom belongs to God.

 $\mu \epsilon$; о̀ $\gamma \dot{\alpha} \rho$ 日e

II. 1. We did what those who were in the same city asked. 2. The priests whom we saw while they were still there asked us who those disciples were. 3. Whoever does not do what I say shall not receive from me what he asks. 4. A certain scribe went into the city in order that he might take the books which the prophets bad written. 5. Into whatever nation we go, let us seak the disciples who are in it. 6. What shall we say concerning all these things? 7. They asked us what they should say concerning those in the city. 8. A certain man having come to Jesus ssid that he wished to be healed. 9. Whoever shall asir anything shall receive what he asks. 10. They asked Jesus what the will of God was. 11. Whoever kills his brother will come into the judgment. 12. Why then do you eat what it is not lawful to eat? 13. Whoever is not taught by the Lord will not know Him. 14. When the chief priests bad seen what Jesus was doing they sent a certain messenger to the Pharisees. 15. Where shall we abide? For the night is coming and no one has said to us what we shall do.
${ }^{1}$ The Greek language frequently uses a double negative where it is not allowable in English. Thus of $\lambda$ é $\gamma \omega$ oúdév mesns $I$ do not say anything, or I say nothing.

## LESSON XXVIII

## The Imperative Mood

403. 

Vocabulary
d̀yıáju，I hallow，I sanctify．övtis，グTts，ötc，（plural d́ $\gamma \rho o ́ s, ~ \delta, ~ a ~ f i e l d . ~ o i ̈ \tau \nu \epsilon s)$ ，indef．rel．pron．， $\gamma \hat{\eta}, \dot{\eta}$ ，earth，land（ $\gamma \hat{\eta}$ has the whoever，whichever，what－ circumflex accent through－ out，because there has been contraction）．
éy $\gamma$＇̀s，adv．，near．
ticéc，I have mercy on，I pity． ever（scarcely used except in the nominative case； sometimes used almost like the simple relative pro－ noun ós）．
 $6 \phi \theta a \lambda \mu \dot{s}$ ，$\dot{\delta}$ ，an eye．
ठбos，$\eta$ ，оу，rel．adj．，as great oкбтоs，бко́тоия，тó，darkness． as，as much as，as many as．Vidop，v̈datos，$\tau b$ ，water． $\phi \omega ̂ s, \phi 山 \tau o ́ s, ~ \tau o ́, ~ l i g h t . ~$

404．The imperative mood occurs in the New Testa－ ment almost exclusively in the present and aorist tenses．

405．The present imperative，active，middle，and pas－ sive，is formed on the present stem；the aorist imperative， active and middle，on the aorist stem；and the aorist passive imperative，on the aorist passive stem．There is of course no zugment．See §245．

406．The imperative mood has no first person，but only second and third．
407. The present active imperative of $\lambda t \omega$ is as follows:

3. $\lambda v e ́ t \omega$, let him loose. 3. 入vétwaay, let them loose. •
408. The present middle imperative of $\lambda \dot{v} \omega$ is as follows: Sing. 2. $\lambda$ bov, loose (thou) Plur. 2. גiecote, loose (ye) for for thyself. yourselves.
3. $\lambda v e ́ \sigma \theta \omega$, let him loose for himself.
3. 入vé $\sigma \theta \omega \sigma a \nu$, let them loose for themselves.
409. The present passive imperative of $\lambda \dot{v} \omega$ is as follows: Sing. 2. $\lambda$ vóv, be (thou) Plur. 2, $\lambda \dot{\in} \in \sigma \theta e$, be (ye) loosed. loosed.
3. $\lambda v e ́ \sigma \theta \omega$, let him be loosed.
3. $\lambda \nu \in \sigma \theta \omega \sigma a \nu$, let them be loosed.
410. It will be observed that the present active and the present middle and passive imperative have the variable vowel o/E.
411. The aorist active imperative of $\lambda \dot{u} \omega$ is as follows: Sing. 2. $\lambda$ v̂oov, loose (thou). Plur. 2. $\lambda$ bбate, loose (ye).
3. $\lambda \nu \sigma \dot{\alpha} \tau \omega$, let him 3. $\lambda \nu \sigma a ́ \sigma \omega \sigma a \nu$, lel them loose. loose.
412. The aorist middle imperative of $\lambda \in \boldsymbol{u}$ is as follows: Sing, 2. $\lambda \hat{\sigma} \sigma a \downarrow$, loose (thou) Plur. 2, $\lambda j \sigma a \sigma \theta \epsilon$, loose (ye) for thyself. for yourselves.
3. $\lambda \cup \sigma \dot{d} \sigma \theta \omega$, let him loose for himself.
3. $\lambda v \sigma a \sigma \theta \omega \sigma a v$, let them loose jor themselves.
413. It will be observed that the aorist active and the aorist middle imperative have the characteristic $-\sigma a$ of the
aorist stem. This $-\sigma a$ is disguised only in $\lambda \hat{v} \sigma o \nu$, the second aorist active imperative, second person singular.
414. The aorist passive imperative of $\lambda \dot{i} \omega$ is as follows: Sing. 2. $\lambda \dot{1} \theta \eta \tau i$, be (thou) Plur. 2. $\lambda \dot{1} \theta \eta \tau \epsilon$, be (ye)
loosed.
> 3. $\lambda \nu \theta \dot{\eta} \tau \omega$, let him be loosed.
loosed.
3. $\lambda \nu \notin \dot{\eta} \tau \omega \sigma a v$, let them be loosed.
415. It will be observed that the aorist passive imperative has the characteristic $-\theta \in$ of the aorist passive stem. This $-\theta \epsilon$ is lengthened to $-\theta \eta$.
416. The second aorist active imperative of $\lambda \in i \pi \omega, I$ leave, is as follows:

Sing. 2. $\lambda_{i \pi \epsilon}$, leave (thou). Plur. 2. $\lambda_{i \pi \epsilon \tau \epsilon \text {, leave (ye). }}$

417. The second aorist middle imperative of $\lambda \epsilon i \pi \omega$ is as follows:

Sing. 2. $\lambda_{\iota \pi o u ̂}$
3. $\lambda \iota \pi \in \sigma \theta \omega$

Plur. 2. $\lambda_{i \pi \epsilon \sigma \theta \epsilon}$
3. $\lambda \iota \pi \in \subset \theta \omega \sigma a \nu$
418. It will be observed that the second aorist active and the second aorist middle imperative are formed on the second aorist stem. They have the same endings as the present imperative.
419. The second aorist middle imperative second person singular (e. g. $\lambda_{\iota \pi 00}$ ) always has an irregular accent, instead of following the rule of recessive accent.
 have an irregular accent.
420. The Tenses in the Imperative Mood

There is no distinction of time between the tenses in the imperative mood. The eorist imperative refers to the action without saying anything about its duration or repetition, while the present imperative refers to it as continuing or as being repeated. Thus $\lambda \hat{v}$ oov means simply loose, while $\lambda \dot{\nu} \epsilon$ means continue loosing, or the like. Ordinarily it is impossible to bring out the diference in an English transiation. Compare $\$ 283$.

## 421. The Use of the Imperative

The imperative mood is used in commands.
Examples: áxoüate roùs doyous mov, hear my woords;
 observed that the English language has, properly speaking, no imperative of the third person. Hence in translating the Greek imperative of the third person we have to use the helping verb let, so that the noun or pronoun that is the subject of the imperative in Greek becomes the object of the helping verb in English.
422.

## Prohibition

Prohibition (the negative of a command) is expressed by the present imperative with $\mu$ ' or by the aorist subjunctive with $\mu \dot{\eta}$.

Examples: (1) $\mu \dot{\eta} \lambda \hat{v} \in$ or $\mu \dot{\eta} \lambda \dot{u} \sigma \eta s$, do not loose ( $\mu \dot{\eta} \lambda$ iups or $\mu \eta \lambda \hat{\lambda} \hat{\sigma} \sigma \nu$ would be wrong); (2) $\mu \eta\rangle \lambda \nu \epsilon \epsilon \tau \omega$ or $\mu \dot{\eta} \lambda i \sigma \eta$, let him not loose; (3) $\mu \grave{\eta} \lambda u ́ \epsilon \tau \epsilon$ or $\mu \grave{\eta} \lambda \dot{j} \sigma \eta \tau \epsilon$, do not loose; (4) $\mu \dot{\eta} \lambda \nu \epsilon \in \tau \omega \sigma a \nu$ or $\mu \grave{\eta} \lambda \dot{\prime} \sigma \omega \sigma \iota \nu$, let them not loose.
423. Present Imperative of $\epsilon l \mu i$

The present imperative of $\epsilon i \mu l, \mathrm{I}$ am, is as follows:
Sing. 2. Latl, be (ihou). Plur. 2.
3. $\check{\epsilon} \sigma \tau \omega$, let him be. 3. É $\sigma \tau \omega \sigma a v$, let them be.

## Exercises

'A first aorist ending is here placed on a second aorist stem, as very frequently in New Testament Greek. See $\$ 186$, footnote, and $\$ 521$.
"The arrist passive of $\gamma$ ivouas is the game in meaning as the aorist middie, the verb being deponent throughout. The meaning of the verb here is to talse place, to be done.
${ }^{1}$ The passive of é $\gamma$ cipw is frequently used as a deponent meaning $I$ arise, $\bar{I}$ rise.
II. 1. Speak ye to all the Gentiles the things which I have spoken to you. 2. Do not say in your heart that ye do not wish to do the things which the king commands. 3. Let no one fear those evil priests, for whoever does the will of God shall go out with joy. 4. Let Him who has saved us through His blood have mercy on us in these evil days. 5. Whosoever loves God shall come to the light, but he who does not love Him sheil walk in the darkness. 6. As manysoever things as ye do, do in the light, in order that the name of God may be hallowed. 7. Let these men be baptized, for Christ has saved them through Fis word. 8. Pray to thy Father in heaven, for He will do whatsoever things thou askest. 9. Let not the king say this, for we are all faithful men. 10. Let us not do the things which the evil men said to us. 11. Have mercy on all men, for the Lord has had mercy on you. 12. As many things as are good, do; but as many things as are evil, do not even speak concerning these. 13. The disciples asked the apostle what they should eat, and the apostle said to them, "Go into the villages and eat the bread which is in them." 14. Do not begin to say in yourselves that you do not know the truth. 15. Let those who are in the fields not return into their houses. 16. Lord, save me, for I have broken thy commandments.

## LESSON XXIX

## The Perfect Tense．Review of $\lambda t \omega$ ．

425. 

Vocabulary
акэјкоа，perf．act．indic．of ${ }^{\prime} \gamma \nu \omega \kappa \alpha$ ，perf．act．indic．of
áкoì，I heat．
$\beta_{\epsilon} \beta \dot{\alpha} \pi \tau \downarrow \sigma \mu a l$ ，perf．pass．
indic．of $\beta a \pi \tau i \zeta \omega, I$ bap－ tize．
үérova，perf．indic．of үіронаи，I become（rivetal， it comes to pass，it hap－ pens）．
रغ́үрафа，$\gamma \in \gamma \rho а \mu \mu a$, perf． act．and perf．pass．indic． of $\boldsymbol{\gamma} \rho \dot{c} \phi \omega, I$ write．
үєи⿱亠䒑⿱山夕，I beget．
eyri\} 1 ， 1 come near．

third pers．sing．，of $\epsilon \gamma \in i \rho \omega$,
I raise up．

үıעむ́бкш，I know．
è $\lambda \lambda \lambda \otimes \theta a$ ，perf．indic．of ёрходає，I соте，I go． é $\rho \in \epsilon \neq \eta$ ，aor．pass．indic．（aor． pass．part．$\dot{\eta} \eta \epsilon \in i s)$ of $\lambda \epsilon \gamma \omega$ ， I say．
t由рака，perf．act．indic．of $\beta \lambda \hat{\epsilon} \pi \omega$（ $\dot{\rho} \alpha \dot{\alpha} \omega), I$ see． $\theta v \dot{\prime} \sigma \kappa \omega, I$ die（used only in the perfect，T $\epsilon \theta \mu \eta \kappa a, I$ am dead，and in the pluper－ fect．In other tenses a a do－ $\theta \nu \dot{\eta} \sigma \kappa \omega$ is used）． $\mu$ арти宅 $\omega$ ，I bear witness． $\Pi$ птроs，do Peter． $\pi \lambda \eta \rho b \omega, I$ fulfil．

426．The perfect active indicative of $\lambda i \omega$ is as follows：

Sing．1．入èvva
2．$\lambda$ èveras
3．$\lambda \in \bar{\lambda} \mathrm{vk} \mathrm{\epsilon}(\nu)$

Plur．1．$\lambda \in \lambda \dot{\kappa} \kappa а \mu \varepsilon \nu$
2．$\lambda \in \lambda u ̛ к a \tau \epsilon$

427．The perfect active infinitive of $\lambda \dot{v} \omega$ is $\lambda \epsilon \lambda \cup \kappa \in \nu a l$ ． The irregular accent should be noticed．

428．The perfect active participle of $\lambda \dot{u} \omega$ is $\lambda e \lambda u \kappa \dot{\prime} s$ ， $\lambda \in \lambda \nu \kappa \nu i ̃ a, \lambda_{e} \lambda_{\text {uós．}}$

The irregular accent should be noticed．
429．The forms given above constitute the perfect system，which is formed from the fourth of the principal parts，$\lambda$ е $\lambda$ uкa．

430．The perfect system is formed by adding $k$（in the indicative кa）to the verb stem，and by prefixing the redu－ plication．The reduplication consists in the first consonant of the verb stem followed by $\epsilon$ ．

431．The perfect，being a primary tense，might be ex－ pected to have primary personal endings．But in the indica－ tive the endings are exactly like the（secondary）endings of the first aorist，except in the third person plural，and even in the third person plural $\lambda$ é $\lambda v k a \nu$ sometimes stands instead of $\lambda \in \lambda$ ús $^{\prime} \sigma \iota(\nu)$ ．

432．The perfect active subjunctive is so rare that it need not be learned．

433．The declension of the perfect active participle is as follows：

| M． | Sing． F． | N． |
| :---: | :---: | :---: |
| N．$\lambda \in \lambda$ vkés | $\lambda \in \lambda u \ldots \sim i ́ a ~$ | $\lambda \in \lambda u m b s$ |
| G．$\lambda \in \lambda$ uкótos | 入e入umitas | $\lambda \in \lambda$ икотоs |
| D．$\lambda$ ¢ $\lambda$ ико́ть | 入edukuia | $\lambda \in \lambda \cup \kappa \delta т ь$ |

434. It will be observed that the perfect active participle, like the other active participles and like the aorist passive participle, is declined according to the third declension in the masculine and neuter and according to the first, declension in the feminine.

## Formation of the Perfect Stem in Various Verbs

435. If the verb stem begins with a vowel or diphthong, the reduplication consists in the lengthening of that vowel or diphthong. In this case the reduplication is like the augment.

Examples: The perfect active of $\begin{aligned} & \lambda \pi \\ & \pi \\ & \zeta\end{aligned}$ is $\dot{\eta} \lambda \pi \iota \kappa a$, and of airt $\omega, \ddot{\eta}_{\tau \eta} \boldsymbol{\eta} \alpha$.
436. If the verb stem begins with two consonants the reduplication in certain cases (by no means always) consists in the prefixing of an $\dot{\xi}$ (like the augment) instead of the repetition of the first consonant with $\epsilon$.
 is the perfect of $\gamma \rho \mathrm{p} \phi \boldsymbol{\phi} \omega$.
437. Verb stems beginning with $\phi, \theta$ or $\chi$, are reduplicated with $\pi, \tau$ and $\kappa$, respectively.

Examples: $\pi \epsilon ф \dot{\lambda} \lambda \eta \kappa a$ is the perfect of $\phi \lambda \lambda \lambda^{\prime} \omega$; $\tau \epsilon \theta \nu \eta \pi a$, I am dead, is the perfect of $\theta \nu \eta{ }^{\prime} \sigma \kappa \omega$ (the present does not occur in the New Testament).
438. If the verb stem ends with a vowel that vowel is regularly lengthened before the $\kappa$ of the perfect active, just as it is before the $o$ of the future and first aorist.

439. If the verb stem ends with $\tau, \delta$ or $\theta$, the $\tau, \delta$ or $\theta$ is dropped before the $\kappa$ of the perfect.

Example: $\ddot{\eta} \lambda \pi \iota \kappa a$ from $\epsilon \lambda \pi i \zeta \omega$ (stem $\dot{e} \lambda \pi(\delta-)$ ):
440. Some verbs have a second perfect, which is conjugated like the first perfect except that there is no $\kappa$.

441. In general, the student should remember what was said in $\$ 159$ about the variety in the formation of the tense systems of the Greek verb.

## Perfect Middle and Passive

442. The perfect middle and passive indicative of $\lambda u ́ \omega$ is as follows:

Sing. 1. $\lambda \in \lambda \cup \mu a \downarrow$
2. $\lambda \in \lambda \cup \sigma a l$
3. $\lambda e \lambda u t a l$

Plur. 1. $\lambda \in \lambda \forall \mu \in \theta a$
2. $\lambda \epsilon \lambda v \sigma \theta \epsilon$
3. $\lambda e \lambda y p t a l$
443. The perfect middle and passive infinitive of $\lambda i \omega$ is $\lambda \in \lambda \dot{v} \sigma \theta a l$.

The irregular accent should be noticed.
444. The perfect middle and passive participle of $\lambda \dot{v} \omega$ is $\lambda e \lambda v \mu$ évor, 7 , ov, (declined like a regular adjective of the second and first declension).

The irregular accent should be noticed.
445. The forms given above constitute the perfect middle system, which is formed from the fifth of the principal parts, $\lambda \in \lambda u \mu a t$.
446. The reduplication is the same as in the perfect active.
447. In the indicative, the primary middle endings (aee 8111) are added directly to the stem, without intervening variable vowel. They are not modified at all. So in the infinitive and participle - $\sigma \theta a \iota$ and - $\mu$ evos are added directly to the stem.
448. If the verb stem ends with a vowel, that vowel is regularly lengthened before the endings in the perfect middle and passive, as before the tense suffixes in the future, first aorist, perfect active, and aorist passive.

449. If the verb stem ends with a consonant, various changes occur when the endings of the perfect middle and passive are put on. These changes are best learned by observation in the individual verbs.
 from $\gamma \rho$ á $\phi \omega$.
450. Pluperfect Tense
The pluperfect tense is so rare that its forms need not be learned. It is a secondary tense. The pluperfect active forms a part of the periect system; and the pluperfect middle and passive, of the perfect middle system.

## Use of the Perfect Tense

451. There is no English tense corresponding to the Greek perfect. The trayslations I have loosed for $\lambda$ èveкa, I have loosed for myself for $\lambda e \lambda v \mu a \iota$ (middle), and I have been loosed for $\lambda$ envuat (passive) may often serve in the exercises. But they are makeshifts at the best. It has already been observed (see §169) that these same English expressions may often translate the aorist tense rather than the perfect.
452. The Greek perfect tense denotes the present state resultant upon a past action.

Examples:
(1) Suppose someone asks an official, "What is your relation to that prisoner?", and he replies, "I have released
him," the verb in this answer of the official would be $\lambda e ́ \lambda u k a$. The perfect would express the present state of the official (with reference to the prisoner) resultant upon his past action of releasing. But if, on the other hand, someone should ask an official, "What is the history of your dealinge with that prisoner?" and he should answer, "I have released the prisoner tbree times and imprisoned him again three times," the first verb of this answer of the official would be éluva, not $\lambda e \bar{\lambda} u k a$, because there is here no thought of the present state resultant upon the past action. Indeed the act of releasing had no result continuing into the present. But even if it had a permanent result the verb referring to it would be aorist, not perfect, unless the present result rather than merely the past action were specially in view. Thus even if, after the question, "What have you done?" the official said merely, "I have released the prisoner," and even if as a matter of fact the releasing had a permanent result, still the aorist tense ều $\lambda a$ might very well be used; for the point under consideration might be the history of the official's dealings with the prisoner and not the official's present relation to him. The distinction is often a fine one. But the perfect should not be used in the exercises unless we can see some clear reason for deserting the aorist.
(2) The perfect passive is often much easier to translate into English than the perfect active. Thus $\gamma \dot{\epsilon} \gamma \mathrm{\gamma} a \pi \tau \mathrm{a}$ means it is written (in the Scriptures). Here the English it is written is not a present tense at all, but reproduces the Greek perfect very well; the meaning is it stands written. Both English and Greek here refer to a present state resultant upon an act of writing which took place long ago.
(3) The perfect passive participle can often be translated neatly by the simple English passive participle. Thus do yos
 beloved, etc. But the Greek perfect active participle is very
hard to translate. The student should carefully avoid thinking that having loosed is specially connected with the perfect. On the contrary, in the overwhelming majority of cases, having loosed is the literal translation of the a.orist, not of the perfect-the participle having merely indicating that the action has taken place prior to the action of the main verb in the sentence. In general, it should be observed that the Greek aorist is vastly commoner than the perfect.
(4) $\lambda \lambda \dot{\eta} \lambda u \theta a$, the perfect of $\epsilon \rho \chi \circ \mu a t$, means $I$ am come, and y'yova means I am become. It so happens that because of the peculiar nature of the verbs to come and to become in English we have a neat way of translating the Greek perfect

Of course the student should not think that I am come has anything to do with the passive voice. It is not at all like $I$ am loosed.
453. The conjugation of $\lambda 6 \omega$ has now been completed. The student should review it thoroughly as a whole, using the paradigm given in §589. The verb should be learned in columns, strictly in the order given. Thus "present-active" should form one idea in the student's mind, and under it should be subsumed the various moods. It should be noticed particularly how the various parts of the verb are connected with the several principal parts.

## 454.

## Exercises

II. 1. Where is the priest? He is already come. 2. All the baptized disciples are in the small city. 3. The priests having been baptized came together into the same house. 4. Where is the multitude? It has already come near. 5. What is in thy heart? I have believed on the Lord. 6. Art thou faithful? I have kept the faith. 7. It is

+ yivoual here means to take place, to come to pass, to happen.
2 The relative pronoun agrees with its antecedent in person as well as in gender and number. In this sentence, the antecedent of 8 s is a $\nu \theta \rho \omega \pi \sigma$, which is first person because it is in appasition with the personal pronoun of the first person, $\mu \epsilon$.
written through the prophet that the Messiah is coming in these days, and we know that His kingdom is come near. 8. Children beloved by your Father, enter ye into the joy kept in heaven for those who have believed on Christ. 9. Who is this man? He is a child begotten by God. 10. Having been crucified by the soldiers the Lord died, but now He is risen. 11. Brethren beloved by all the disciples, why do ye not pity the little ones? 12. Those who are come out of the darkness into the light know that God will do all the things written in the Law and the prophets. 13. All the things written or spoken through this prophet are true. 14. This is come to pass in order that that which was aaid by the Lord through the prophet might be fulfilled. 15. If thou art already loosed, give thanks to Him who loosed you. 16. Where is the prophet whom the soldiers persecuted? He is become king of many cities.

## LESSON XXX

Comparison of Adjectives. Declension of $\mu \in i\} \omega \nu$. Genitive of Comparison and Use of $\bar{\eta}$. Adverbs. Genitive with Adverbs of Place. Genitive of Time. Genitive of the Articular Infinitive Expressing Purpose. Dative of Respect. Accusative of Specification. Dative of Time. Possessive Adjectives. $\mu \dot{\eta}$ Used as a Conjunction. iva with the Subjunctive in Various Uses. $\mu$ ' with the Indicative in Questions Expecting a Negative Answer.
455.

## Vocabulary

éдо́s, й, óv, poss. adj., belonging to me, my. ${ }^{\prime}{ }^{\prime} \mu \pi \rho \sigma \sigma \theta \epsilon \nu$, adv., in front, in the presence of (with gen.). '̇vámtov, adv., before, in the sight of, in the presence of (with gen.).
$\xi \xi \omega$, adv., outside, outside of (with gen.).
ex $\chi$ pos, $\delta$, an enemy.
in, conj., than (the meaning or has already been given). $\dot{\eta}_{\boldsymbol{\eta}}^{\boldsymbol{\mu}} \boldsymbol{\epsilon} \tau \in \rho o s, ~ a, ~ o \nu, ~ p o s s . ~ a d j ., ~$
belonging to us, our.
"iotos, a, ov, belonging to one's self, one's own. iкavós, $\dot{\eta}, \quad b \nu$, suffcient, worthy: considerable.
i $\sigma \chi$ ขoót $\epsilon \rho o s, a$, ay, stronget, comparative of ioxvoos, a, ov, strong.
ка入जิs, adv., well.
крєi $\sigma \sigma \omega \nu$, ov, better, comparative of à $\gamma \mathrm{aO}$ ós.
$\mu \bar{\alpha} \lambda \lambda \frac{\nu}{, ~ a d v ., ~ m o r e, ~ \tau a t h e r . ~}$
$\mu \in\{\zeta \omega \nu, o \nu$, greater, comparative of $\mu \dot{\epsilon} \gamma a s$.
$\mu \dot{\eta}$, conj., lest, in order that not (the adverbial use of $\mu \dot{\prime}=$ not has already been given).
$\mu \dot{\eta} \pi 0 \tau \epsilon$, lest perchance.
ä $\pi \omega \mathrm{s}$, in order that (takes the subjunctive. Used very much as lya is used).
$\pi \dot{\pi} \iota \nu$, adv., again.
$\pi \lambda \epsilon i \omega \nu, o v$, more, comparative of mo入ús.

бAßßaтov, тb, sabbath (the plural $\tau$ i $\sigma d \beta \beta a \tau a$, with irregular dative roîs $\sigma \mathrm{d} \beta$ -
$\beta a \sigma \iota(\nu)$, is often used in the singular sense). oós, ク', $\delta \nu$, poss. adj., belonging to thee, thy.
$\dot{v} \mu \epsilon \tau \in \rho o s, a, ~ a v, ~ p o s s . ~ a d j .$, belonging to you, your.

## Comparison of Adjectives

456. The comparative degree of adjectives ends sometimes in - $\boldsymbol{\tau} \epsilon \rho \circ \mathrm{s}, a, o \nu$, (declined like a regular adjective of the second and first declension) and sometimes in $-\iota \omega \nu$, - $\omega \omega \nu$, -tov (declined according to the third declension in all three genders).
457. The superlative degree ends in - tatos, $\eta$, $o \nu$, or -latos, $\eta$, ov, But in the New Testament the superlative is rather rare.
458. A number of adjectives have irregular comparative and superlative forms. These can be learned from the lexicon as they occur.

459. The declension of $\mu \epsilon i \zeta \omega \nu$, o , greater, the comparative of $\mu e^{\prime} \gamma a s$, is as follows:

Sing.

460. $\sigma \omega \phi \rho \omega \nu$, wise, $\ddot{\alpha} \phi \rho \omega \nu$, foolish, $\epsilon \lambda a \sigma \sigma \omega \nu$, less, $\pi \lambda e^{i} \omega \nu$, more, крєi $\sigma \sigma \omega \nu$, better, etc., are similarly declined.

461．The shortened form，$\mu e i 5 \omega$ ，can stand for $\mu \mathrm{il}$ 位a in the accusative singular masculine and feminine and neuter plural nominative and accusative，and the shortened form， peifous，in the nominative and accusative plural masculine and feminine．

## 462．Genitive of Comparison and Jse of y，than

Where English uses than after a comparative word，Greek uses either（1）the genitive of comparison or（2）$\ddot{\eta}$ iollowed by the same case as that which stands in the other member of the comparison．
Examples：（1）$\mu \mathrm{el}$ Yova roúruy $\pi$ aıñ $\sigma \epsilon$ ，greater things
 тò $\sigma$ кótos ${ }_{\eta}^{n}$ tò $\phi \omega \bar{s}$, men loved darkness more than light．Here $\phi \hat{s}$ is accusative．The meaning is men loved darkness more than they loved light．

## Adverbs

463．Many adverbs are formed from adjectives by sub－ stituting $s$ for $\nu$ at the end of the genitive plural masculine and neuter．

Example：кa入bs，good；genitive plural，ка $\lambda \bar{\omega} \nu$ ；adverb， ка入⿳亠二口今，well．

464．The comparative degree of adverbs is like the accusative singular neuter of the comparative degree of the corresponding adjective；and the superlative degree of the adverb is like the accusative plural neuter of the superlative degree of the corresponding adjective．
465．Many adverbs，however，are of diverse forms which must be learned by observation．

466．The Genitive with Adverbs of Place
Adverbs of place take the genitive．
 city；${ }^{\text {＇}} \gamma \gamma \dot{\nu} \mathrm{s} \tau \hat{\mathrm{y}} \mathrm{s} \pi \delta \lambda \epsilon \omega \mathrm{s}$ ，near the city．

## 467. Genitive of Time Within Which

The genitive is occasionally used to express time within which.
 puktos, he took the young child and His mother by night.

## 468. Genitive of the Articular Infinitive Expressing Purpose

The genitive of the articular infinitive, without any preposition, is sometimes used to express purpose.

Example: $\begin{aligned} & \eta \\ & \lambda\end{aligned} \epsilon \nu$ roos $\tau \delta \nu \quad \pi \rho \circ \phi \dot{\eta} \tau \eta \nu$ tô $\beta a \pi \tau \iota \sigma \theta \hat{\eta} \nu a \iota$ in'au'rô, he came to the prophet in order to be baptized by him. It will be remembered that for the most part the articular infinitive is used in the same constructions as those in which an ordinary noun with the article can be used. This use of the genitive to express purpose, however, would not be possible for an ordinary noun.

## 469.

The Dative of Respect
The dative is used to indioate the respect in which anything exists or is true.
 (i. e. being known so far as the face is concerned); katapos rи̂ кapdia, pure in heart (i.e. pure so far as the heart is
 (i. e. a man who is James so far as the name is concerned).
470. Accusative of Specification

The accusative of specification is very much the same in meaning as the dative of respect, but is less frequently used.
 thousand in number.

## The Dative of Time

471. The dative is sometimes used to express time when.

Example: Єөєрáлєибє $\tau \hat{\varphi} \sigma а \beta \beta a ́ \tau \varphi$, , he healed on the sabbath.
472. Usually, however, time when is expressed by prepositional phrases. So on the sabbath could be $\hat{\nu} \tau \hat{\omega}$ $\boldsymbol{\sigma а \beta \beta} \boldsymbol{\tau} \boldsymbol{\varphi}$.

## Possessive Adjectives

473. The possessive adjectives $\epsilon \mu \dot{\prime} \dot{s}$, $m y$, oós, thy, $\dot{\eta}_{\boldsymbol{\mu} \dot{\epsilon} \tau \epsilon \rho o s, ~ o u r, ~ \dot{v} \mu \dot{\epsilon} \tau \epsilon \rho o s, ~ y o u r, ~ a r e ~ s o m e t i m e s ~ u s e d ~ i n s t e a d ~}^{\text {, }}$ of the genitive case of the personal pronouns when emphasis is desired. These possessive adjectives are declined like regular adjectives of the second and first declension. They can stand in the attributive position with the article.

 d і $\mu \mathrm{k} \tau \epsilon \mathrm{\rho}$ os $\lambda$ dyos, your word.
474. This usage is comparatively infrequent. The com-
 $\varepsilon \mu b s$, but $\delta \lambda$ doos $\mu$ ou (the word of me).

## $\mu \dot{\eta}$ Used as a Conjunction

475. Words denoting fear are followed by $\mu \dot{\eta}$, lest, with the subjunctive. $\mu \boldsymbol{\eta}$ is here not an adverb, as is the case when it means not, but a conjunction.

476. Negative clauses of purpose may also be introduced by the simple $\mu \dot{\eta}$ instead of by ${ }^{i v a} \mu \dot{\eta}$.
 lest you come into judgment.

## 477. Iya with the Subjunctive in Various Uses

In addition to the use by which it expresses purpose, iva with the subjunctive is very frequently used after words of exhorting, wishing, striving, and in various ways that are not easily classified.
 say to this stone that it become bread. (2) aür力 eariv in
 ment, that you should love one another.

## Questions Expecting a Negative Answer

478. Questions expecting a negative answer are expressed by $\mu \dot{\eta}$ with the indicative.
479. This rule constitutes an important exception to the general rule for the use of oil and $\mu \dot{\eta}$ (see §256). Questions expecting a positive answer have oi with the indicative.

Example: $\mu \lambda$ l $\sigma \chi \cup \rho \dot{\tau} \tau \epsilon \rho \circ$ aúrồ $\dot{\epsilon} \sigma \mu \epsilon \nu$; are we stronger than he? The answer expected is "No, of course not." Compare oúk loxvpótepoi è $\sigma \mu \epsilon \nu$ aüroû; are we not stronger than hef Here the answer expected is "Yes, certainly we are."

## 480.

Exercises

 тทрク่боขбเข.
II. 1. Those who have done one work well will do also greater things. 2. He who rules his own house well does a greater thing than he who takes many cities. 3. Why do ye do these things? Are ye kings and priests? Are ye not servants? 4. Those who were in the darkness besought us that we should pity them and not cast them out. 5. Those who belong to me are in the city and those who belong to thee are outside of it, but we shall all be in the presence of God. 6. Art thou stronger than the One who made the earth and the sea and all the things that are in them? 7. Do not fear him who kills the body, but fear rather Him who has made all things. 8. When se have seen your own brethren ye shall go also to the Gentiles. 9. We have more servants than you, but ours are not sufficient to evangelize ${ }^{1}$ all the

[^9]Gentiles. 10. Those who worship the Lord by day and by night shall be stronger than those who persecute them. 11. More are those who are with us than those who are with them. 12. Being with you in heart, not in countenance, we exhorted you that ye should do well all the things which we had commanded you. 13. The priests went out of the city, lest perchance the scribes might see them doing that which it is not lawful to do. 14. If anyone stronger than we comes against us we shall not remain in our city. 15. Jesus having healed a certain man on the sabbath, the scribes were afraid lest the people shouid make Him a king. 16. It is better to die in behalf of the brethren than to do what the apostles exhorted us that we should not do.

## LESSON XXXI

Conjugation of $\delta i \delta \omega \mu$. Second Aorist of $\gamma \iota \nu \dot{\omega} \sigma \kappa \omega$. The Article before $\mu \dot{\epsilon} \nu$ and $\delta \epsilon$. The Aorist Participle Denoting the Same Act as the Leading Verb. First Aorist Endings on Second Aorist Stems.
481.

## Vocabuiary

aídyos, ov, adj. of two ter- $\mu b v o s, \eta$, ov, adj., alone, only. minations, the feminine $\mu \nu \sigma \tau \eta \dot{\eta} \rho L 0 \nu, \tau \dot{\prime}$, a mystery, a being like the masculine throughout, eternal.
àti, prep. with gen., instead of.
à $\pi \delta \delta i \delta \omega \mu$, I give back, $I$ give what is owed or promised, I render, I pay.
$\gamma u v \dot{\eta}, \gamma v y a u k o ́ s, \dot{\eta}$, (with an irregular accent in some forms, see 8566), a woman.
бi $\delta \omega \mu \mu, I$ give.
( $\gamma \nu \omega \nu, 2 n d$. aor. (of $\mu \mathrm{L}$ form)

¿そうovia, मे, authority.
é $\sigma x \circ \nu, 2 n d$. aor. of ëx $\chi \omega, I$ have.
Yaw (has $\eta$ instead of $a$ in the present system. E.g. $\zeta \hat{\eta} \mathrm{s}, \zeta \hat{\eta}$ instead of $\zeta \hat{q} \mathrm{~s}, \zeta \hat{\alpha})$, $I$ live.
Lioú, demonstrative particle, behold! lo! secret.
doá $\omega$, I see (The present system of this verb is very much less common than the present system of $\beta \lambda \dot{\epsilon} \pi \omega$. The common verb to see in the New Testament

 Yet since $\beta \lambda \dot{\epsilon} \pi \omega$ elso has a future $\beta \lambda$ é $\psi \omega$ and a first aorist $\ddot{\beta} \beta \lambda \in \neq \frac{a}{}$, it will perhaps be more convenient to give ö $\psi$ oual etc. as the principal parts of ${ }^{\text {ofad }}$ rather than of $\beta \lambda \dot{\epsilon} \pi \omega)$.
$\pi a \rho a \delta i \delta \omega \mu \iota, I$ delivet over.
$\pi \in \iota \rho a ́ \zeta \omega$, I tempt.
moîos, $a$, $o \nu$, interrogative pron., what sort of?

$\chi \in i p, \chi \in t \rho o ́ s, \dot{\eta}, a$ hand.
482. The verbs which have been studied so far, with the exception of the irregular verb $\epsilon l \mu i$, all belong to the same conjugation. They have various ways of forming their principal parts, but the endings that are appended to the principal parts all belong to the same type. There is in Greek only one other conjugation. It is called the $\mu \mathrm{c}$ conjugation (to distinguish it from the $\omega$ conjugation which has been studied thus far), because its first person singular present active indicative ends in $\mu$.
483. Verbs in $\mu$ differ from verbs in $\omega$ only in the present and second aorist systems.
484. The principal parts of the $\mu \mathrm{verb}, \delta i \delta \omega \mu l, I$ give, are as follows:

485. The stem of $\delta L \delta \omega \mu$ is $\delta 0$. If it were an $\omega$ verb, its first form would be dow.
486. The future $\delta \dot{\alpha} \sigma \omega$ is entirely regular, the final a of the stem being lengthened before the $\sigma$ of the future exactly as in the case (for example) of $\delta \eta \lambda \delta \omega$. From $\delta \Delta \sigma \omega$ all of the future active and middle is formed, in exactly the same way as the corresponding forms of $\lambda \psi \omega$.
487. The first aorist $\epsilon \delta \omega \kappa a$ is quite regularly formed except that $\kappa$ stands instead of $\sigma$.
488. The perfect active $\delta \hat{\delta} \delta \omega \kappa a$ is entirely regular. From $\delta \in \delta \delta \omega \alpha$ all of the perfect active is quite regularly formed.
489. The perfect middle $\delta$ E $\delta o \mu a \iota$ is quite regular except that the final vowel of the stem is not lengthened before
the personal endings (see $\$ 448$ ). From $\delta \delta \delta 0 \mu a c$ all of the perfect middle and passive is quite regularly formed.

490. The aorist passive $\begin{aligned} & \\ & \delta 6 \\ & 67 p \\ & \text { is quite regular, ex- }\end{aligned}$ cept that the final vowel of the stem is not lengthened before the tense suffix $-\theta \epsilon$. From |  |
| :--- |$\delta \theta \eta \nu$ all of the aorist passive and future passive is quite regularly formed.

## The Present System of $\delta i \delta \omega \mu \nu$

491. The sign of the present system of $\delta i \delta \omega \mu$ is the reduplication (of a different form from that in the perfect), which is prefixed to the stern.
492. The present active indicative of $\delta i \delta \omega \mu \mu$ is as follows:

Sing.

1. $\delta i \delta \omega \mu, I$ give.
2. $\delta i \delta \omega s$, thou givest.
3. $\delta i \delta \omega \sigma \ell(\nu)$, he gives.

Plur.

1. $\delta i \delta o \mu \in \nu$, we give.
2. $\delta i \delta o \tau \epsilon$, ye give.
3. $\delta t \delta \delta a \sigma t(\nu)$, they give.
4. The final vowel of the stem (the stem with the reduplication being $\delta$ too-) is lengthened in the singular number, but not in the plural.
5. The personal endings are added directly to the stem, without any variable vowel.
6. These endings are $-\mu,-5,-\tau \iota$ (or $-\sigma \iota$ ), $-\mu \epsilon \nu,-\tau \epsilon,-a \sigma \iota$.
7. The present active subjunctive is as follows:

| Sing. | Plur. |
| :---: | :---: |
| 1. $\delta 10 \hat{\omega}$ | 1. $\delta \delta \delta \hat{\mu} \mu \boldsymbol{\nu}$ |
| 2. $\delta \iota \delta \hat{¢}$ |  |
| 3. $\delta \iota \hat{\partial} \hat{\omega}$ | 3. $\delta \omega \hat{\omega} \sigma \iota(\nu)$ |

497. There has been contraction here, as is shown by the accent. The personal endings are the same as in $\omega$ verbs.
498. The present active imperative is as follows:

Sing.
2. $\delta i \delta o y_{s}$ give (thou).
3. $\delta \delta \delta \partial o t=$, let him give. 3. $\delta \delta \delta \delta \tau \omega \sigma a \nu$, let them give.
499. The present active infinitive is $\delta . \delta \delta \nu a l$, to give. The irregular accent should be noticed.
500. The present active participle is $\delta \iota \delta o u$ s, $\delta \delta \delta o u ̄ \sigma a, \delta \iota \delta \delta \nu$, giving.
501. The genitive singular is $\delta \delta \delta o ́ y$ ros, $\delta i \delta o u ́ \sigma \eta s, \delta i \delta o ́ v-$ ros. The masculine and neuter are declined regularly according to the third declension and the feminine regularly according to the first declension. The dative plural masculine and neuter is $\delta i \delta o \hat{\sigma} \sigma(\nu)$.
502. The accent is irregular in the nominative, not being recessive. Thereafter it follows the general noun rule, except in the genitive plural feminine, $\delta i \delta o v \sigma \omega \hat{\nu}$, where the special rule for nouns of the first declension is followed (see §§14, 51).
503. The imperfect active indicative is as follows:

Sing.
Plur.

1. Eiidouv, I was giving.
2. $\epsilon \delta \delta \delta 0 \mu \epsilon \nu$, we were giving.
3. Eidiסous, thou wast giving.
4. $\varepsilon \delta i \delta 0 \tau \epsilon$, ye were giving.
5. Éidoo, he was giving. 3. eidiסogav, they were giving.
6. The characteristic reduplication, $\delta$-, of the present of course appears here, since the imperfect is always a part of the present system. The augment is regular. The final vowel of the stem is lengthened in the singular, as in

204 NEW TESTAMENT GRIEK
the present. But in the imperfect it is lengthened to av instead of to $\omega$. The same secondary endings appear as in the $\omega$ conjugation, except that the alternative ending $-\sigma a y$ appears instead of $-\nu$ in the third person plural. (See §127).
505. The present and imperfect middle and passive of סiowur may be found in §596. Only a few of these forms occur in the New Testament. They can easily be recognized as they occur.

## Aorist Active of $\delta i \hat{\delta} \omega \mu \mathrm{l}$

506. The aorist active of $\delta i \delta \omega \mu \mu$ is peculiar in that it is first aorist in the indicative and second aorist in the other moods.
507. The aorist active indicative is as follows:

## Sing.

1. ёঠ̀ка, I gave.

Plur.

1. є̇ठढ́ккацєข, we gave.
2. є̇ठ́ஸкатє, ye gave.
3. Eס $\delta \kappa \alpha \square$, they gave.
4. It will be observed that the conjugation is exactly like that of $\begin{gathered}\lambda \\ \nu \\ \sigma a\end{gathered}$, the first aorist active of $\lambda \dot{\prime} w$. But the tense suffix is $\kappa$ instead of $\sigma$. See §§171-177.
5. The aorist active subjunctive is as follows:

Sing.

| 1. $\delta \hat{\omega}$ | 1. $\delta \hat{\omega} \mu \epsilon \nu$ |
| :--- | :--- |
| 2. $\delta \hat{\omega} s$ | 2. $\delta \hat{\omega} \tau \epsilon$ |
| 3. $\delta \hat{\varphi}$ | 3. $\delta \hat{\omega} \sigma \iota(\nu)$ |

Phur.

1. $\delta \hat{\omega} \mu \in \nu$
2. $\delta \hat{\omega} \tau \epsilon$
3. $8 \hat{\omega} \sigma \iota(\nu)$
4. The conjugation is exactly like the present active subjunctive. But the second aorist has the mere verb stem, whereas the present prefixes the reduplication $\delta\llcorner$-.
5. The aorist active imperative is as follows:

Sing.
2. Sós, give (thou).
3. ठótw, let him give.

Plur.
2. $\delta \dot{d} \tau \epsilon$, give (ye).
3. סót $\omega \sigma a v$, let them give.
512. These forms are like the present (without the reduplication), except for $\delta$ ós in the second person singular.
513. The aorist active infinitive is $\delta 0 \hat{\nu} \nu a \iota$, to give.
514. The aoriat active participle is $\delta 0$ is, $\delta 0 \hat{\sigma} \sigma a$, $\delta \dot{o} \nu$, having given.

It is declined like the present participle $\delta \iota \delta o u$ s.
515. The aorist middle of $\delta i \delta \omega \mu L$ occurs oniy a very few times in the New Testament. The forms can easily be understood with the aid of a lexicon.

## The Second Aorist of $\gamma(\nu \dot{\nu} \sigma \kappa \omega$

 ond aorist active of the $\mu \mathrm{f}$ form. The stem is $\gamma \nu 0$ - which is nearly everywhere lengthened to $\gamma \nu \Delta$-.
517. Learn the conjugation in 8601 .

## The Article before $\mu \in ́ y$ and $\delta \dot{E}$.

518. Before $\mu \in ́ \nu$ or $\delta \epsilon$ the article is often used as a pronoun meaning he, she, it, they.
 this they asked him. And he answered them. (2) $\eta \lambda$.Bov
 to them asking something from them. But they did nothing.
519. It should be observed very carefully that this usage is quite different from all the uses of the article which have been studied heretofore. For example, in the phrase oi iy rệ oiku, those in the house, it would be a great mistake
to think that the article is used as a pronoun meaning those. On the contrary, the English idiom those in the house (in which those is not really a demonstrative pronoun at all) is expressed in Greek by saying the in-the-house people. In this Greek phrase, of is just as much an ordinary article as in the phrese oi árafoí, the good people, ty $\tau \hat{\varphi}$ oíкч being treated as an adjective like a $\gamma$ afós. Or, to take another example, it would be a great mistake to suppose that in the phrase $\delta \lambda \dot{u} \omega \nu$, he who looses, the article is used as a pronoun meaning he. On the contrary the article is here just as much an article as in the phrase d ara0bs, the good man. But before $\delta t$ the article can really be used as a pronoun. In $\delta \delta \dot{\epsilon} \epsilon[\pi \epsilon \nu$, but he said, there is no adjective or adjective expression for $\delta$ to go with.

## 520. The Aorist Participle Denoting the Same Act as the Leading Verb

The aorist participle is sometimes used to denote the same act as the leading verb.
 way of answer, or Jesus answered and said. In §§233, 254 it was said that the present participle denotes action contemporary with the action of the leading verb and the aorist participle denotes action prior to the action of the leading verb. That rule needed to be impressed firmiy upon the mind before the exceptions to it could be considered. But as a matter of fact the rule does not completely represent the facts. Properly speaking the tenses in the participle do not have to do with time, and their fundamental, non-temporal character appears in the usage now under discussion. In ámoxpufeis $\epsilon i \pi \in \nu$, the "answering" and the "saying" represent exactly the same act, and the participle simply defines more closely the action denoted by $\epsilon[\pi \epsilon y$. The phrase does not, however, mean while he
was answering he said. That would rather be à aoкрьд́д $\mu$ evos $\epsilon i \pi \epsilon \nu$. It is recommended that the free translation, he answered and said, be adopted invariably for the phrase
 Gospels. And it is exceedingly important that this idiom should not be allowed to obscure the fact that in the majority of cases the aorist participle denotes action prior to the time of the leading verb. The student should carefully avoid any confusion between the present and the morist participle.
(2) $\delta \delta \varepsilon$ atokpt $\theta$ eis $\epsilon i \pi \epsilon \nu$, and he answered and said (with a slight emphasis on he). Of course amokplteis might here be taken as the substantive participle with $\delta$, and the sentence might mean and the having-answered one said, or and the one who had answered said. But in a very great many places where these words occur in the gospels, the article is to be taken as a pronoun and the d $\pi$ okpoteis is joined only loosely to it, in the manner indicated in the translation above.

## 521. First Aorist Endings on Second Aorist Stems

Very frequently, in the New Testament, first aorist endings instead of second aorist endings are used on second aorist stems.

Examples: cinav instead of eimov (third person plural), cimóy instead of elmé (imperative). This usage is much more common in some parts of the aorist than in others. citoy in the indicative has almost exclusively first aorist forms. See $\S 186$, footnote.

## 522.

## Exercises

## ${ }^{1}$ Aorist active indicative of $\kappa \lambda \dot{\alpha} \omega, I$ break.

" тornjplov, ró, a cup.
' кá $\gamma \dot{\text { ú stands for kal Éyú. }}$
${ }^{4} \mathrm{a} \gamma \omega$ is sometimes used in the intransitive sense, $I g 0$.
: $\quad$ \% $\tau$ frequently introduces direct (instead of indirect) discourse. When it introduces direct discourse, it must be left untranslated. In such cases, it takes the place of our quotation marks.

II. 1. The woman besought the apostle that he might give her something. But he ${ }^{1}$ answered her nothing. 2. Those who had killed the women said that they had known the king. But he answered and said that he was not willing to give them what they asked. 3. If we believe on Him who loved us and gave Himself in behalf of us, we shall have eternal life instead of death. 4. While the apostle was giving to the children the things which they had asked, the women were giving gifts to us. 5. The Lord delivered over the gospel to the apostles, and they delivered it over to the Gentiles. 6. What shall we give back to Him who gave Himself in behalf of us? 7. Behold He gives us eternal life. Let us therefore do His will. 8. What shall anyone give instead of his life? 9. Whatever we give to Him will not be enough. 10. Whatever thou wishest that men should give to thee, give thou also to them. 11. Let them give thanks to those who delivered over to them the gospel. 12. They asked the Lord what they should give to Him. And He answered and said to them that to do the will of God is greater than all the gifts. 13. Those women are giving back to the children the things which they have taken from them, lest the king cast them out of the city. 14. When the priests had said these things to those who were in the city, the apostle departed. 15. What is this? Will he give us his flesin? 16. Whatever He asks I will give. But He gave to me eternal life.
${ }^{1}$ In all such cases, the slight emphasis on the he in English is to be expressed in Greek by the pronominal use of the article before $\delta \dot{\delta}$.

## LESSON XXXII

 Accusative and Infinitive in Result Clauses The Subjunctive after éws.
dyoly $\omega$ (for principal parts ka00́s, adv., just as. of this verb and the other kalpos, d, a time, a fixed time, verbs, see the general vocabulary), I apen.
a $\pi \delta \lambda \lambda \nu \mu u$, or $k \pi 0 \lambda \lambda \dot{u} \omega, I$ destroy; middle, I perish.

á $\phi i m \mu \iota_{\text {, }}$ I let go, I permit, I leave, $I$ forgive (when it means forgive, á $\phi$ in $\mu$ takes the acc. of the thing forgiven and the dat. of the person to whom it is forgiven).
סєiкvuщu and $\delta \in \epsilon x \nu i \omega \omega, I$ show. єن்piokw, I find.
etrıt ${ }^{2} \eta \mu$, I lay upon (with acc. of the thing laid and dat. of the person or thing upon which it is laid).
ELcs, adv. with gen., up to, until; conj., while, until.
an appointed time.
$\mu \nu \eta \mu \in i ̂ o \nu, \tau o ́, ~ a ~ t o m b . ~$
$\mu b \nu o \nu$, adv., only.
$\pi \hat{\nu} \rho, \pi \cup \rho o ́ s, \tau o ́, ~ a ~ f i r e$.
aŋцeîov, tó, a sign.
$\sigma \tau \delta \mu a, ~ \sigma \tau \dot{\prime} \mu a \tau о s, \tau b, a$ mouth.
тiөnju, I place, I put; тiөך $\mu$
 life.
$\dot{v} \pi \mathrm{a} \gamma \omega, I$ go away.
 aor. pass., I rejoiced).
xpóvos, $\delta$, time (especially a period of time, as distinguished from кaıpós, a definite or appointed time). ©i $\delta \mathrm{E}$, adv., hither, here. $\ddot{\omega} \sigma \pi \epsilon \rho$, adv., just as.

Ш̈ate, conj., so that.
524. The principal parts of the $\mu l$ verb $\tau 10 \eta \mu$, I place, I put, are as follows:

525. The stem is $\theta_{\epsilon}$. The present system is reduplicated after the same manner as $\delta i \delta \omega \mu \mu$. The future is regular. The first aorist is regular except that (like $\delta i \delta \omega \mu$ ) it has $\kappa$ instead of $\sigma$. The perfect active and the perfect middle are regular except that $\theta \epsilon$ - is lengthened to $\theta \epsilon$ - instead of to $\theta \eta$-. The aorist passive is regular except that (1) the final vowel of the stem is not lengthened, and (2) the stem $\theta \epsilon$ - is changed to $\tau \epsilon$ - to avoid having two $\theta^{\prime}$ s come in successive syllables.
526. Learn the active voice of the present syatem of ri $\theta_{\eta \mu}$ in § 598.
527. The treatment of the stem and of the endings in the present system is very much the same as in the case of $\delta i \delta \omega \mu$. The declension of the participle $\tau \in \theta \in i s$ is like that of $\lambda v \theta$ eis, the aorist passive participle of $\lambda i w^{2}$.
528. Learn the active voice of the aorist system of ti8 $1 \mu \mu$ in $\$ 599$.
529. Like $\delta i \delta a \mu \mu, \tau i \theta \eta \mu \mathrm{~h}$ has a first aorist active in the indicative and a second aorist active in the other moods. The second aorist participle efis is declined like the present participle $\tau \iota \theta$ eis.
530. The present middle and aorist middle forms of ritmpl can easily be recognized when they occur, if it be remembered that the second aorist has the mere verb stem $\theta \in$, whereas the present has the stem $\tau \iota \theta \epsilon$. Thus if a form à $\nu \theta \theta^{\prime} \mu \eta \nu$ be encountered, the student should see that
$\dot{a} \nu-$ is plainly the preposition $\dot{\alpha} \nu \alpha-, \epsilon$ is the augment, $\theta_{\epsilon}$ is the stem of $\tau i \theta \eta \mu$, and $-\mu \eta \nu$ is the secondary ending in the first person singular middle. Therefore, the form is second aorist middle indicative, first person singular. On the other hand, etitevto belongs to the present system because it has the $\tau$ - which is the sign of the present system; it is imperfect, not present, because it has the augment and a senondary ending. It is evidently imperfect middle or passive indicative, third person plural.

The Conjugation of áqipur
531. áфinul, I let go, I permit, I leave, I forgive, is a compound verb composed of the preposition à $\pi \dot{o}^{\prime}$ ('á $\phi^{\prime}$ ' before the rough breathing) and the $\mu t$ verb in $\mu$. The stem of $i \pi \mu \mathrm{is}+$.
532. The forms can usually be recognized if it be remembered that the $i$ - before the stem $\dot{\text { - }}$ is the sign of the present system, and that the short forms with $t$ alone are second zorist. Thus àpeis is evidently second aorist participle ( $\epsilon / / 5$ coming from the stem $\&$ as $\theta$ eis from the stem $\theta \in$ ). In the indicative there is a first aorist active in $\kappa$ instead of $\sigma$, as is the case with $\delta i \delta \omega \mu \mu$ and $\tau i \theta_{\eta \mu}$. The irregular forms of $\dot{\alpha} \phi i \eta \mu \iota$ can be found in the lexicons and reference grammars.
533. Conjugation of $\delta \epsilon i \kappa \nu \nu \mu c$ and $d \pi \dot{j} \lambda \lambda \nu \mu u$

These two verbs have some $\mu$ forms in the present system. The $\mu$ forms can be recognized from the fact that they add the personal ending directly to the present sterm. The present stem ends in $\nu$. Both $\delta \in i \kappa v v \mu$ and $\dot{\alpha} \pi \delta \lambda \lambda \nu \mu$ are also sometimes conjugated like $\omega$ verbs even in the present system. See the vocabulary.

## Accusative and Infinitive after $\ddot{U}^{2} \tau \epsilon$

534. $̈ \sigma \tau \varepsilon$, so that, expressing result, is sometimes followed by the accusative and infinitive.
 he healed them; so that the crowd marvelled.....
535. The accent of $\ddot{\omega} \sigma \tau \epsilon$ gpparently viclates the general rules of accent. But originally the $\tau \in$ was an enclitio separate from the $\dot{\omega} s$. So also $\ddot{\omega} \sigma \pi \epsilon \rho$ and out (for the latter see vocabulary in Lesson XXXIII).

## 536.

The conjunction tws, when it means until, takes the subjunctive with ăy, except when the verb which it introduces refers to an actual occurrence in past time. The $a p$ is sometimes omitted. When ecus means while, it takes the indicative. The phrase $\epsilon \omega s$ ov́ in which $\begin{gathered}\text { ens } \\ \omega \text { is a preposition and }\end{gathered}$ ov the genitive singular neuter of the relative pronoun, has the same meaning as écs (conjunction) alone.

Examples: (1) $\mu \varepsilon \mathfrak{i} \nu a \tau \epsilon$ êws $\tilde{a}^{2} \nu$ ề $\lambda \neq \omega$, remain until I
 (actual occurrence in past time).

## 537.

## Exercises

${ }^{1}$ фíhos, ò, a friend.
${ }^{2} \kappa \omega \lambda \forall \omega, I$ hinder.
${ }^{\prime}$ тоwütos, rolaírn, roLoûto, such. Often ueed with the article.
${ }^{4} \dot{\text { érein }}$
${ }^{5}$ Hầخos, d, Paul.

- $\ddagger$ wototé $\omega$, I make alive, I quicken.
${ }^{r}$ In many such phrases the article is omitted in Greek where it is used in English.
${ }^{8} \dot{\omega} \sigma \epsilon i^{\prime}$ is a strengthened form of $\dot{\omega} \mathrm{s}$.
- "Hpథ̆́ठخs, ov, $\delta$, Eerod.
${ }^{20} \pi a \tau \eta \dot{\rho} \rho$ has a vocative form, $\pi$ á $\tau \epsilon \rho$. But even such noums sometimes use the nominative form in the vocative case.

 тupbs.
II. 1. This commandment he laid upon them, that they should lay down their lives in behalf of their brethren. 2. If ye forgive those who persecute you, I also will forgive you. 3. When the men had found him who had done this thing they left him and went away. 4. Having put the body into the tomb he went away. 5. We saw those who were laying down their lives in behalf of the children. 6. The women saw where the body was placed. 7. We shall question him until he answers us. 8. We ought to give thanks to Him who has forgiven us our sins. 9. We did not know Him, but He knew us. 10. Give me the body in order that I may place it in a tomb. 11. He showed all things to you, in order that you might place them in your hearts. 12. The apostie answered and said to those who were qu'uestioning him that he would not put these gifts into the temple. 13. Aiter we had seen the sigu which Jesus had shown to us, we believed on Him.

## LESSON XXXIII

539. The principal parts of the $\mu \iota$ verb l $\sigma \tau \eta \mu, I$ cause to stand, are as follows:

540. The stem is $\sigma$ тa-. The present system is reduplicated by the prefixing of $l$.. The future end first aorist systems are perfectly regular, the $\sigma \tau a$ - of the stem being lengthened to $\sigma \tau \pi$-before the $\sigma$ of the tense suffixes. The perfect active is regular except that the $\epsilon$ - of the reduplication has the rough breathing. The perfect middle and passive retains the $\sigma \tau \alpha$ - of the stem unchanged instead of lengthening its vowel. The aorist passive also retains the $\sigma \tau a-$, but otherwise is regular.
541. Learn the active voice of the present system of I $\sigma \tau \eta \mu$ in $\$ 600$.
542. The treatment of the stem and of the endings in the present system is very much the same as in the case of $\delta i \delta \omega \mu c$ and $\tau i \theta \eta \mu i$. The declension of the participle i $\sigma \tau \alpha$ is like that of $\lambda \dot{v} \sigma a s$, the aorist active participle of $\lambda \dot{v} \omega$, except for the accent.
543. Learn the middle and passive forms of the present system of $i \sigma \tau \eta \mu i$ in $\$ 600$. It will be noticed that the endings are joined directly to the reduplicated stem iova-, except in the subjunctive mood.
 has a complete second aorist active as well as a complete first aorist active. The first aorist means $I$ caused to stand (transitive), and the second aorist means $I$ stood (intransitive).
545. Learn the second aorist active of " $\sigma \tau \eta \mu \mathrm{in} \$ 601$.
546. It will be observed that the conjugation is very much like that of the aorist passive of $\lambda 6 \omega$. The participle orás is declined like the present participle iotás.
547. A second aorist middle of liбт $\quad \mu \mathrm{l}$ does not occur.
548. In addition to the first perfect active participle, $\dot{\varepsilon} \sigma \tau \eta \kappa \dot{\omega}$, i $\sigma \tau \eta \mu \mathrm{h}$ has a second perfect participle $\dot{\varepsilon} \sigma \tau \dot{\omega} \mathrm{s}$, $\dot{\epsilon} \sigma \tau \hat{\omega} \sigma a, \dot{\varepsilon} \sigma \tau \dot{\prime} s$, gen. $\dot{\epsilon} \sigma \tau \omega ิ \tau o s$, etc. Both $\dot{\varepsilon} \sigma \tau \eta \kappa \dot{\omega} s$ and $\dot{\epsilon} \sigma \tau \dot{\omega} \boldsymbol{s}$ mean standing.
549. Learn the conjugation of of $\delta$ a, $I$ know (a second perfect used as a present, the pluperfect, 㒸 $\delta \in l \nu$, being used as an imperfect) in $\S 603$.

## 550.

The Optative Mood
In the classical period, the Greek language had another mood, the optative, in addition to those which we have studied. In New Testament Greek, however, most of the classical uses of the optative heve practically disappeared. The optative is still retained to express a wish. Thus
 person singular, of yivoual) means may it not take place, God forbid. The few other optative forms in the New Testament can be noted when they occur.

## 551. Conditions Contrary to Fact

Conditions contrary to fact are expressed by the secondary tenses of the indicative in both protasis and apodosis. The protasis is introduced by $\epsilon$, and the apodosis has the particle à $\nu$, which, howrever, is sometimes omitted.
 nou, Lord, if thou hadst been here, my brother would not have died.

## Uses of $\boldsymbol{\gamma}$ ivoдац

552. Thus far, in the exercises, it has usually been possible to translate rivouai by the English word become. But very often, in the New Testament, such a translation is impossible. The English word become requires a predicate nominative, but in very many cases $\gamma^{i}$ vopual $^{\text {has no predicate }}$ nominative. In such eases it means happen, come into being, come to pass, appear, arise, be made. Sometimes it can be translated by the words come or be.
 in those days there was (appeared in history) a certain
 being (or were made) through him. (3) єiठєข $\tau$ à $\gamma \epsilon \nu \dot{o} \mu \epsilon \nu a$, he saw the things that had happened. (4) фwviे E'veveco ek rबิע oúpavêv, a voice came out of the heavens. [But it must not be supposed that rivoual is a verb of motion.]
 and it icame to pass, calls for special comment. There are three forms of this usage, which may be illustrated as follows. ${ }^{1}$
 he came. Here the accusative and infinitive depend on $\epsilon \gamma \dot{-}$ vero in a way that is at least after the analogy of ordinary Greek usage.
(2) кal éyèveтo кal $\bar{\eta} \lambda \theta \in \nu$, and it came to pass and he came. The literal English translation is here intolerable, and the Greek also is not in accordance with the ordinary usage of the Greek language, but is derived from a Febrew idiom.
 This also is not an ordinary Greek usage, $\hat{\eta} \lambda \theta_{\epsilon \nu}$, being left
${ }^{1}$ This method of illustration is talken, in essentials, from J. H. Moulton, Grammar of Nei Testament Greek, Vol. I, "Prolegomena," 2nd Edition, 1906, p. 16.
without a construction. Both (2) and (3), as well as (I) may be translated freely and it came to pass that he came.
553. Exercises

${ }^{1}$ The future of ákoúd is here deponent.
: oúdén $\omega$, not yet.

- इó $\delta o \mu a, \omega \nu$, tá, plural in singular sense, Sodom.
- $\mu \epsilon$ र $\chi$ pl with gen., until, up to.
${ }^{-} \sigma \dot{\eta} \mu \in \rho \circ \nu$, adv., todays $\dot{\eta} \sigma \dot{\eta} \mu \epsilon \rho o \nu$ (supply $\left.\dot{\eta} \mu \dot{\rho} \rho a\right)$, today.
- $\dot{\alpha} \pi a s, ~ a ̈ \pi a \sigma a, ~ a ̈ \pi a \nu$, all (a strengthened form of $\pi \hat{a} s$ ).

II. 1. He forgave those who had risen up against their king. 2. We know that those who are sitting in the house will not go out until they see the apostle. 3. When Jesus had gone down from the mountain, the disciples saw the man sitting in the house. 4. We saw the apostles stending in the presence of the chief priests. 5. When the women inad arrived in the city they saw Jesus doing many miracles. 6. In those days there rose up a certain king who did not know us. 7. Thou hast manifested Thyself to those who are sitting in darkness. 8. When he had seen these things he did not know what he was saying. 9. We are not able to know all these things unless the Lord manifests them to us. 10. We have found the One who is able to take away our sins. 11. We know that no one is able to do what the king does.

[^10]
## PARADIGMS

## PARADIGMS

## First Declension

 and $\gamma \rho a \phi \dot{\eta}, \dot{\eta}$ ，stem $\gamma \rho a \phi a-$ ，a writing，a Scripture，is as follows：

| D. | Ėautois | dautaîs | Eavtoîs | cautais |
| A. | Éautoús | éautds | ceauroús | cautis |

586. The declension of the reflexive pronoun eavtov̂, ins, ov, of himself, of herself, of itself, is as follows:

Sing.
M. F. N.
G. Éautồ ėautn̂s ėavtô̂
 D. ̇̇autệ є̇autĥ taut

## Numerals

587. The declension of $\epsilon[s, \mu i a, \varepsilon \nu$, one, is 4,8 follows:

|  | M. | F. | N. |
| :---: | :---: | :---: | :---: |
| N, | eis | $\mu \mathrm{la}$ | Et |
| G. | èvós | $\mu \mathrm{âs}$ | Evos |
| D. |  | $\mu$ ¢ $\hat{\sim}$ | è $\boldsymbol{\chi}$ i |
| A. | 茹吅 | $\mu \mathrm{L} \boldsymbol{\sim}^{\boldsymbol{\nu}}$ | ¢ $\downarrow$ |

588. The declension of rpeis, $\tau \rho \mathrm{la}$, three, is as follows:

| M. F. | N. |
| :---: | :---: |
| N. tpeîs | N. $\tau$ pia |
| G. $\tau \rho \iota \hat{\omega}$ | G. $\tau \rho<\boldsymbol{A} \nu$ |
| D. $\tau \rho \stackrel{\sigma}{l}(\nu)$ | D. $\tau \rho \iota \sigma l(\nu)$ |
| A. toeis | A. tpla |

The declension of tévoapes, té $\sigma \sigma a p a$, fout, is as follows:
M. F.
N. té $\sigma \sigma a p \in s$
G. $\tau \in \sigma \sigma \alpha \rho \omega \nu$
D. Té $\sigma \sigma a \rho \sigma \iota(\nu)$
A. téorapas
A. té $\sigma \sigma a \rho a$

The conjugation of $\lambda$ irw, $I$ loose, stem $\lambda v$-, is as follows:

## Contract Verbs

590．The present system of $\tau \iota \mu d \omega$ ，I honor，is as follows：
Pres．Act．Imperf．Act．Pres．Mid．and Pass．Imperf．Mid．and Pags．

| Indic．S．1．（ $\tau \mu \dot{\alpha} \omega) \quad \tau$ |  |  |  |  | （ （̇̇гцао́ $\mu \eta \nu$ ） | $\dot{\text { ¢ } \tau<\mu \dot{\mu} \mu \eta \nu}$ |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 2．（ $\tau$ Ludits）t |  | ̇̇tipas | （ $\tau \iota \mu \dot{\alpha}$ ） | $\tau$ ¢ ${ }_{\text {a }}^{\text {a }}$ | （ėtıuíou） |  |
| 3．（ $\tau$ ¢ $\mu \dot{\alpha} \epsilon$ ） |  | titina | （тьй́єта⿱） | тциârat | （Éт兀ци́єто） | ่̇̇тцйто |
|  |  | $\underline{k} \tau \mu \hat{\omega} \mu \epsilon \boldsymbol{v}$ |  | $\tau \iota \mu \dot{\omega} \mu \boldsymbol{\theta} \boldsymbol{a}$ | ＇（＇̇тццаó $\mu$ ¢ $\theta$ a） |  |
| 2．（ $\tau, \mu$ a $\epsilon \tau \epsilon$ ） |  | е̇тциâтє | （ $\tau \iota \mu \dot{\alpha} \epsilon \tau \theta \epsilon$ ） | $\tau<\mu a ̄ \sigma \theta \epsilon$ | （ $\bar{\tau} \tau \mu \dot{\alpha} \in \sigma \theta \epsilon)$ | $\underline{\epsilon} \tau \mu \hat{a} \sigma \theta \epsilon$ |
| 3．（ $\tau$ ¢ $\mu$ áova $(\nu)$ ） |  | ＇́тíncy | （ $\tau$ мáovtal） | $\tau \iota \mu \omega ิ \nu \tau a \downarrow$ | （ $̇$ тцй́oуто） | ¢ $\tau<\mu \hat{\omega} \nu \tau \bigcirc$ |
| Subj．S．1．$(\tau \iota \mu \dot{\alpha} \omega)$ T | $\tau \iota \omega \hat{\omega}$ |  | （ $\tau \iota \mu \dot{\alpha} \omega \mu \boldsymbol{\sim}$ ） | $\tau \mu \omega \hat{\mu} \iota^{\prime}$ |  |  |
| 2．（ $\tau \iota \mu \mathrm{a} p \mathrm{p}$ ） | Tluầs |  | （ $\tau \sim \dot{a}_{\underline{p}}$ ） | tıuă |  |  |
| 3．（ $\tau \iota \mu \mathrm{a} p)$ | $\tau \mu \mu \hat{a}$ |  |  | $\tau \iota \mu a ̂ \tau a t$ |  |  |
| P1．1．（ $\tau<\mu \dot{\alpha} \omega \mu \mu \nu)$ | $\tau \iota \mu \hat{\mu} \mu \boldsymbol{\nu}$ |  |  | $\tau \tau \mu \dot{\mu} \mu \dot{\theta} \dot{0}$ |  |  |
| 2．（ $\tau \mu \dot{\prime} \boldsymbol{\eta} \boldsymbol{\prime} \tau \epsilon)$ | тıиâtє |  |  | $\tau \mu \hat{a} \sigma \theta \epsilon$ |  |  |
| 3．（ $\tau \uparrow \mu \mathrm{a} \omega \sigma \iota(\nu)$ ） | $\tau \iota \mu \hat{\omega} \tau(\nu)$ |  | （ $\tau \iota \mu \dot{\omega} \omega \nu \tau a<)$ | $\tau<\mu \hat{\omega} \nu \tau a \downarrow$ |  |  |
| Imp．S．2．$(\tau / \mu a \epsilon)$ | riцa |  | （тццо́ou） | $\tau<\mu \omega ิ$ |  |  |
|  | $\tau \iota \mu a ́ t \omega$ |  | （ $\tau \mu \mu \mathrm{a}$ ¢́大 $\theta \omega$ ） | $\tau \iota \mu \dot{\sigma} \theta \omega$ |  |  |
|  | $\tau \downarrow \mu \hat{T} \tau \epsilon$ |  | （ $\tau \iota \mu \dot{\alpha} \epsilon \boldsymbol{\sigma} \theta \epsilon$ ） | $\tau \iota \mu \mathrm{a} \sigma \theta \epsilon$ |  |  |
| 3．（ $\tau \tau \mu \mathrm{Q}$ ¢ $\tau \omega \sigma \alpha \nu)$ |  |  |  | ）$\tau \iota \mu \dot{\alpha} \sigma \theta \omega \sigma a$ |  |  |
| Infin．（ $\uparrow \iota \mu \dot{\alpha} \epsilon \iota \nu)$ | rıцầ |  |  | $\tau \iota \mu \hat{a} \sigma \theta a r$ |  |  |
| Part．（ $\tau \iota \mu \dot{\alpha} \omega \nu)$ <br> （ $\tau \mu$ áováa） | $\tau \tau \mu \omega$ <br> $\tau t \mu \hat{\omega} \sigma a$ |  | （ тьцаоднєขоs） <br>  | т $\mu \dot{\prime} \omega \mu \in \nu o s$, $\tau \iota \mu \omega \mu \dot{v} \eta$ |  |  |
| （ $\tau \iota \mu \mathrm{L}$ ov $)$ T | $\tau \iota \mu \omega \bar{\nu}$ |  | （ $\tau \iota \mu$ ао́ $\mu \in \nu о \nu$ ） | $\tau \downarrow \mu \dot{\omega} \mu \boldsymbol{\nu}$ 人 |  |  |

591．The present system of $\phi \lambda \lambda \epsilon \omega, I$ love，is 9 as follows：
Pres．Act．
Imperf．Act．
Pres．Mid．and Pass．
Imperf．Mid．and Pass．

Subj．S．1．（ $\phi \lambda \epsilon \epsilon \omega) \quad \phi \lambda \hat{\omega}$
2．（ $\phi \stackrel{\lambda}{ } \epsilon ́ \eta s) ~ \phi L \lambda \hat{p} s$
3．（ $\phi \iota \lambda \in ́ n) ~ \phi l \lambda \hat{p}$
Pl．1．（ $\phi\llcorner\lambda \epsilon \in \omega \mu \epsilon \nu) \quad \phi \lambda \hat{\omega} \mu \epsilon \nu$
（ $\phi\left\llcorner\lambda e ́(\omega \mu a l) \quad \phi_{\llcorner } \lambda \hat{\omega} \mu a\llcorner\right.$

603. The conjugation of olfa, I know, is as follows:

## VOCABULARIES

## I．Greek－English Vocabulary

（The enclosing of a verb form in parenthesis indicates that no part of the tense system indicated by that form occurs in the New Testament．The figures refer to sec－ tions．）
arafós，$\dot{\eta}, \dot{o} v$, adj．，61，568， good．
$d \gamma a \pi \dot{a} \omega, \dot{a} \gamma a \pi \dot{\eta} \sigma \omega, \dot{\eta} \gamma \dot{\alpha} \tau \pi \sigma a$, ท่ $\gamma \dot{\alpha} \pi \eta \kappa a, \dot{\eta} \gamma \dot{\gamma} \pi \eta \mu a l, \dot{\eta} \gamma a-$ $\pi \dot{\eta} \theta \eta v, 313, I$ love．
dyáan，मे，love．
ä $\gamma \gamma \in \lambda o s, \dot{d}, a \operatorname{messenger}$, an angel．
 （ $\boldsymbol{\eta} \gamma i a k a$ ），$\dot{\eta} \gamma i a \sigma \mu a l, \dot{\eta} \gamma \iota \dot{\alpha}-$ ônv，I sanctify，I conse－ crate，I hallow．
ä $\gamma$ tos，$a$, oy，adj．，holy．
à $\gamma$ oós，$\delta$, a field．
 $\dot{\eta} \gamma \mu a L, ~ \tilde{\eta} \chi \theta \eta \nu, I$ lead．
áde入фós，ó，a brother．
â̂ $\mu a$ ，aí $\mu a \tau о s, ~ \tau o ́, ~ b l o o d . ~$
ait $\rho \omega, \mathfrak{a} \rho \hat{\omega}, \hat{\eta} \rho a, \hat{\eta} \rho \kappa a, \hat{\eta} p \mu a \iota$, $\eta \rho \partial \eta \nu, I$ take up，I take away．
ait $\epsilon^{\prime} \omega$ ，ai $\tau \dot{\eta} \sigma \omega, \ddot{\eta} \tau \eta \sigma a, \ddot{\eta} \tau \eta \kappa \alpha$, （ $\tilde{\eta} \tau \eta \mu \mathrm{al}$ ），$\dot{n} \tau \dot{\eta} \theta \eta \nu, I$ ask（in the sense of request），I ask jor．
aidev，aîvos，$\delta$ ，an age．${ }^{t}$
äínıos，ov，adj．，481，eternal．
а́кท̆коа，2nd perf．of áкоı́w．

入ои́Өпба，グко入ои́Өทка，I fol－ low（takes，the dative）．
 коа，（ $\quad$ кои $\sigma \mu \alpha), ~ \eta \kappa о и ̆ \sigma \theta \eta \nu, ~$ $I$ hear（takes the genitive or the accusative）．
え $\lambda \lambda \dot{\eta} \theta \in \iota a, ~ \grave{\eta}, 53,555$ ，truth．
à入ך $\theta \dot{\eta} \mathrm{s}$ ，$\epsilon^{\prime}$ s， $\operatorname{adj} ., 360-362$ ， 572 ，true．
á入入á，conj．，but（a stronger adversative than $\delta$ é＇）．
à $\lambda \dot{q} \lambda \omega \nu$ ，ous，ous，reciprocal pron．，343，of each other．， of one another．
ä入入os，$\eta, o$ ，other，another． $\dot{a} \mu a \rho \tau \alpha \nu \omega, \dot{\alpha} \mu \alpha \rho \tau \eta \dot{\eta} \sigma, \dot{\eta} \mu \dot{a} \rho-$ т $\eta \sigma a$ or $\eta \eta_{\mu} \mu \rho \tau о \nu, \dot{\eta} \mu \dot{\rho} \rho \tau \eta-$ ка，（ $\dot{\eta} \mu \dot{\alpha} \rho \tau \eta \mu a \iota),(\dot{\eta} \mu a \rho-$ т $\left.\dot{\eta}^{\theta} \eta \nu\right), I \sin$.
$\dot{a} \mu a \rho т i a, \dot{\eta}, a \sin , \sin$. $\dot{a} \mu a \rho \tau \omega \lambda o ́ s, \dot{o}, a$ sinner．
$\dot{a} \nu$, a particle which cannot be translated separately into English，400，536， 551.
àvaßaive，I go up．
ג̀ $\nu a \beta \lambda \in ́ \pi \omega$ ，I look up，I re－ ceive my sight．
àva入apßávs，I take up．
 of a dooíre.
a $\downarrow \dot{\eta} \rho$, à $\nu \delta \rho o ́ s, o ́, ~ 565, a \operatorname{man}$ (as distinguished from women and children).
ӑ» $\downarrow \rho$ шттоs, d, 31-33, 557, a man (as distinguished from other beings).
aviotnju, I cause to rise ; in the intransitive tenses (see under ( $\sigma \sigma \tau \eta \mu l$ ) and in the middle, I stand up, I arise.

 $\chi \theta \eta \nu$ or $\dot{\eta} \nu \in \dot{\epsilon} \chi \neq \eta \nu, I$ open. avil, prep. with gen., instead of.
antoavov, 2nd. aor. of à ào$\theta \nu \dot{\eta} \sigma \kappa \omega$.
àтерхоцац, I go away, I depart.
 $\dot{\alpha} \pi b$, prep. with gen., from. $\dot{\text { á } \pi о \delta \delta \delta \omega \mu}$, I give back, I give what is onsed or promised, 1 pay.
 $\theta a \nu o \nu, I$ die.
а́токріронаи, (атокрьроиิцаи)
 d $\pi \epsilon \kappa \rho i \theta \eta \nu$, dep. with passive forms and rarely with
middle forms, I answer (takes the dative).

 onv, I kill.

 a $\pi_{o} \lambda^{\lambda} \omega \lambda a$, 2nd aor. mid.
 middle, I perish.
a a oòív, I release, I dismiss.

 $\sigma \tau a \lambda \mu 0 .$, , à $\pi \epsilon \sigma \tau a \dot{a} \eta \eta \nu, I$ send (with a commission).
ámóotodos, $\delta$, an aposile.
ápros, $\dot{\mathbf{b}}$, a piece of bread, a loaf, bread.
do $\quad$ خ $\eta$, $\dot{\eta}$, a beginning.
 chief priest, a high priest.
$\ddot{\alpha} \rho \chi \omega, \not{ }^{\alpha} \rho \xi \omega, \dot{\eta} \rho \xi a, 1$ rule (takes the genitive); middle, 344 (footnote), I begin.
ă $\rho \chi \omega \nu$, ă $\rho \chi$ оутos, d, 211, 559, a ruler.
d $\alpha \bar{\omega}$, fut. of aipu.
айтб́s, ท่, ó, 96 f., 10 f., 581, pron., himself, herself, itself, same ; personal pron., $h e$, she, it.

$531 \mathrm{f} ., I$ let go, $I$ leave, $I$ permit; I forgive (with the accusative of the sin or debt forgiven and the dative of the person forgiven).
 164, 538, I 80 (occurs in the New Testament ony in composition).
$\beta a ́ \lambda \lambda \omega, \beta a \lambda \omega, \notin \beta a \lambda o \nu, \beta \epsilon-$ $\beta \lambda \eta \kappa a, \beta \epsilon \beta \lambda \eta \mu a L, \dot{\epsilon} \beta \lambda \dot{\eta} \theta \eta \nu$, I throw, I cast, I pul.
 ( $\beta \in \beta \dot{\alpha} \pi \tau \iota к а), ~ \beta є \beta a ́ \pi \tau \iota \sigma \mu а \iota$,

Bactheia, th, a kingdom.
 357, 564, a king.

вь $\beta \lambda i o d$, tó, a book.
$\beta \lambda \epsilon ̇ \pi \omega, \beta \lambda \epsilon \psi \omega, \epsilon ̆ \beta \lambda \propto \psi a, I$ see
 word for I see in the present and imperfect. In the other tenses the principal parts given under dofa are commonly used).

「a入ınaia, $\dot{\eta}$, Galilee.
$\gamma$ áp, conj., postpositive, for.

$\nu \eta_{\eta}^{\prime} \partial \eta \nu, I$ beget; also of the mother, I bear.
үย้̇os, үèvous, tá, 352-354, 562, a race, a kind.
$\gamma \hat{\eta}, \dot{\eta}, 403$, earth, a land.

 ${ }_{\theta \eta \nu}, 424$ (footnote 2), 550, $552 \mathrm{f} ., I$ become, $I$ come into being, $I$ appear in history, I am; $\gamma^{i \nu} \in \tau a \mathrm{c}$, it comes to pass, it happens.

 $\sigma \theta \eta y, 516$ f., 601, 1 know.
 үрд́ $\mu а$, үрддцатоs, тб, а letter.
 a scribe.
 ing, a Scripture ; ai ypaфal, the Scriptures.

 $\phi \eta \nu, 206,258, I$ write.
रuví, ruvackós, t̀, 566, a romain.

 and, but.
$\delta \epsilon \hat{i}$, impersonal verb, 292, it is necessary.

 є $\delta \in i \chi \theta \eta \nu, 533, I$ show．
$\delta \in \chi \circ \mu a\llcorner, \delta \epsilon \xi \circ \mu a \iota, \epsilon \in \delta \epsilon \xi \alpha \mu \eta \nu$,
 $\delta \eta \lambda o ́ \omega, \quad \delta \eta \lambda \dot{\omega} \sigma \omega, \quad \epsilon \in \delta \dot{\eta} \lambda \omega \sigma a$ ， （ $\delta \epsilon \delta \dot{\eta} \lambda \omega \kappa a), \quad(\delta \epsilon \delta \dot{\eta} \lambda \omega \mu \alpha\llcorner )$, є $\delta \eta \lambda \dot{\omega} \theta \eta \nu, ~ 317-322,592$ ， I make manifest，I show． סıá，prep．with gen．，through； with acc．，on account of．
סı $\delta$ á ккалоs，$\delta$ ，a teacher．
$\delta_{\llcorner\delta \dot{a} \sigma \kappa \omega}, \delta \iota \delta \dot{\xi} \omega, \quad \dot{\epsilon} \dot{i} \delta a \xi a$ ， （ $\delta \in \delta i \delta a \chi a), ~(\delta \in \delta i \delta a \gamma \mu a l)$, ย $\delta \iota \delta \dot{\alpha} \chi \theta \eta \nu, I$ teach．

## II．English－Greek Vocabulary

A certain one，ris；a certain thing，neuter of $\tau i s$.
Abide，$\mu \ell \nu \omega$ ．
Able，iкavós．
Able，am，бфуаца．
About，$\pi \in \rho i$ with gen．
About（with numerals），is．
Above，int $\rho$ with ace．
According to，кard with acc．
Accordingly，oîv．
After，$\mu \in \tau$ d．with acc．
Again，$\pi \dot{c} \lambda_{l} \nu$.
Against，exil with acc．，naтá with gen．
Age，atín．
All，$\pi$ âs，ödos．
Alonggide of，rapa with ace．
Already，$\eta_{j} \delta \eta$ ．
Also，kai．

Am able，$\delta 6 \nu a \mu a r$.
Am about（to do something）， $\mu=\lambda \lambda \omega$ ．
Am going（to do something）， $\mu \in \lambda \lambda \omega$ ．
Am willing，$\theta \in \lambda \omega$ ．
And，кai，ote．
And not，ovide，ofite，$\mu \eta \delta E \in$ ．
Angel，ä $\gamma \boldsymbol{\gamma} \epsilon$ 入os．
Another，ä $\lambda \lambda$ дos，érepos．
Answer，àтокріроца⿱亠䒑
Anyone，$\tau$ ts．

Anything，neut．of $\tau \tau s$ ．
Apart from，$x \omega$ pis．
Apostie，ámbarohos．
Appear in history，$\gamma^{\prime}$ voual．
Around，$\pi \epsilon \rho i$ with ace．
Arrive，тарауігонац．
As，us．
As great as，as much as，as many as，äoos．
Ask（a question），é $\rho \omega \tau \dot{\alpha} \omega$.
Ask（request），ait $\epsilon^{\prime} \omega, \epsilon^{\epsilon} \rho \omega \tau \dot{a} \omega$.
Ask a question of，$\dot{\epsilon} \pi \in \rho \omega \tau \hbar \omega$ ．
At， $\bar{e} \pi i$ with dat．
At some time，$\pi$ or＇${ }^{\prime}$ ．
At the time of，ĖTi with gen．
Authority， $\mathfrak{\epsilon} \xi \mathrm{F}$ ovia．
Bad，какбs．
Baptize，$\beta a \pi \tau i \zeta \omega$ ．
$\mathrm{Be}, \epsilon \mathrm{l} \mu \mathrm{l}$ ．
Bear，$\phi \epsilon \rho \omega$ ；of a mother， $\gamma \in v \nu \dot{d} \omega$ ．
Bear witness，$\mu$ артир $\epsilon \omega$ ．
Beautiful，ка入ós．
Because， 8 rt．
Become，ylvoна．
Become present，taparivo－ нal．
Before，$\pi \rho \delta$ with gen．
Beget， $\boldsymbol{\gamma} \in \nu \nu a \omega$ ．
Begin，middle of áp $\rho \omega$ ．
Beginning，da $\rho \chi$ ク̆．
Behold（verb），$\theta \in \omega \rho \in \dot{\epsilon} \omega$ ．

Behold ！（particle），Lioú．
Believe，$\pi \iota \sigma \tau \epsilon \dot{\omega} \omega$ ．
Beseech，таракал é $^{\omega}$ ．
Beside，$\pi a \rho \dot{\alpha}$ with dat．
Better，крei $\sigma \sigma \omega \nu$ ．
Bless，$\epsilon \dot{\lambda} \lambda o \gamma^{k} \omega$ ．
Blessed，$\mu$ akdolos．
Blind man，tuф入ós．
Blood，aipa．
Boat，$\pi$ 入oíon．
Body，$\sigma \hat{\omega} \mu a$ ．
Book，$\beta \iota \beta \lambda$ lov．
Both ．．．and，koi ．．．kai．
Bread，áptos．
Break，$\lambda \dot{\psi} \omega$ ．
Bring，ф́p $\omega$ ．
Bring to，$\pi \rho \circ \sigma \phi \epsilon \rho \omega$ ．
Brother，à $\delta \in \lambda \phi d s$ ．
But，à $\lambda \lambda \lambda \dot{a}, \delta \varepsilon$ ．
By（of the agent），into with gen．
By means of，expressed by the simple dat．
By the side of，rapd with dat．
Call，калt $\omega$ ．
Carry，фípu．
Cast，$\beta \dot{a} \lambda \lambda \omega$ ．
Cast out，$\ell k \beta \dot{a} \lambda \lambda \omega$ ．
Cause to rise，àviornu（in the transitive tenses）．
 the transitive tenses）．
Chief priest．ḋ $\rho x!\epsilon p \in \dot{\prime}$ s．

Child，$\tau$ éкvoy；jittle child， тuidiov．
Christ，Xplatós．
Church，єкклдбia．
City，$\pi \dot{\partial} \lambda \iota s$.
Clean，katapós．
Come，épzoнаг．
Come down，ratép रoнal．
Come into being，$\gamma$ ivoдац．
Come near，é $\gamma \boldsymbol{\gamma} i \zeta \omega$ ．
Come out， $\begin{gathered}\text { ésppopau．}\end{gathered}$
Come to，пообє́ $\rho$ ооаа．
Come to pass，rivoual．
Come together，$\sigma v$ véf $\rho$ रoual $^{\text {．}}$
Comfort，таракал $\bar{\omega} \omega$ ．
Command，кєлєіш山．
Commandment，évodoht．
Concerning，$\pi \epsilon \rho$ i with gen．
Consecrate，à $\gamma \mathrm{láj} \zeta \omega$ ．
Considerable，iкavós．
Countenance，$\pi \rho \dot{\partial} \sigma \omega \pi \sigma$ ．
Country，xápa．
Crowd，ö $\chi$ 入os．
Crucify，$\sigma \tau a u p o ́ \omega$ ．
Darkness，бкы́тos．
Day，$\dot{\eta}_{\mu} \dot{\rho} \rho$ ．
Dead，vexpós．
Dead，am，perfect of $\theta \nu \mathfrak{j} \sigma \kappa \omega$ ．
Death，$\theta$ ávatos．
Deliver over，тapa $\delta i \delta \omega \mu$ ．
Demon，$\delta a \iota \mu \nu \nu i v$.

Desert，épquos．
Destroy，á $\pi \dot{\partial} \lambda \lambda \nu \mu, \lambda_{i} \omega$.

Die，àmod $\quad \dot{\eta} \sigma \pi \omega$ ．
Disciple，$\mu a \theta \eta \tau \eta{ }^{\prime} s$ ．
Dismiss，ano入úv．
Do，$\pi$ olé $\omega$ ．
Down from，katá with gen．
Drink，rivo．
During，kará with acc．
Each other，a $\lambda \lambda \lambda \dot{j} \lambda \omega \nu$ ．
Ear，ous．
Earth，$\gamma \hat{\eta}$ ．
Eat，$\ell \sigma \theta l \omega$ ．
Encourage，таракa入éw．
Enemy，è $\chi$ Өós．

Eteralal，aíuvos．
Evangelize，$\epsilon \dot{J} a \gamma \gamma \in \lambda i \zeta \omega$ ．
Even，kai．
Evil，тоитрós，какós．
Except，$\epsilon \dot{l} \mu \dot{\eta}, \dot{\epsilon} \dot{a} \nu \mu \dot{\eta}$ ．
Exhort，тарака入є́ $\omega$ ．
Experience，$\pi \dot{\alpha} \sigma \chi \omega$ ．

Face，$\pi \rho \dot{\rho} \sigma \omega \pi о \nu$.
Faith，$\pi i \sigma \tau c s$.
Faithful，$\pi$ Latós．
Fall，$\pi i \pi \tau \omega$ ．
Father，$\pi a \tau \dot{n} p$ ．
Fear，фоß́́онац．
Few，plural of $\Delta \lambda i \gamma o s$.
Field，dypós．
Fill，$\pi \lambda \eta \rho b \omega$ ．
Find，eúpíara．
Fire，Tû $\rho$ ．

First，$\pi р \hat{\text { ритоs．}}$
Five，$\pi \dot{\epsilon} \nu \tau \epsilon$ ．
Five thousand，$\pi \epsilon \nu \tau a k i \sigma \chi i-$入ıol．
Flesh，बáp
Follow，ḋко入outco．
Foot，mous．
For（prep．），use dat．
For（conj．），$\gamma \dot{\alpha}, \rho$ ．
Forever， els tòv alãya．
Forgive，$\dot{\alpha} \phi i \neq \mu u$ ．
Four，té $\sigma \sigma a \rho \in s$ ．
From，ámd with gen．，$\pi a \rho k$ with gen．
Fulfil，$\pi \lambda \eta \rho o ́ \omega$ ．
Full，$\pi \lambda \dot{\eta} \rho \eta s$ ．
Furlong，$\sigma \tau a ́ \delta \iota \nu$.
Galilee，$\Gamma a \lambda_{\iota} \lambda a i a$.
Garment，iцátıv．
Gather together，ouváyw，
Gentiles，plur．of $\epsilon \theta v o s$.
Gift，$\delta \hat{\omega} \rho \circ \mathrm{\nu}$ ．
Give，$\delta i \delta \omega \mu$ ．

Give what is owed or prom－ ised，á $\pi \frac{\delta}{i} \delta \delta \omega \mu$ ．

Glory，סóga．
 $\nu \omega$.

Go down，катаßaiva，кате́р－ रо $\mu \boldsymbol{\alpha}$ ．
Go in，elのé $\rho \chi$ оцац．

$\mu a$ ．
Go through，סıє́ $\chi$ хouat．
Go to，тробє́ $\rho \chi$ оцац．
Go together，$\sigma \cup \nu \dot{c} \rho \chi o \mu a$. ．
Go up，ávaßaivo．
God，$\theta$ és．
Good，à yaOós，кa入ós．
Gospel，eiva $\gamma^{\dagger} \lambda$ iov；preach the gospel，$\epsilon \dot{\omega} a \gamma \gamma \epsilon \lambda i \zeta \omega$ ．
Grace，$\chi$ á $\rho \iota s$.
Great，$\mu \in ́ \gamma a s$, no入ús．
Greater，$\mu \in i j \omega \nu$ ．
Guard，фu入acy．
Hallow，à quás $^{\circ} \omega$ ．
Hand，xelp．
Hand over，$\pi a \rho a \delta i \delta \omega \mu$ ．
Have，é $\chi \omega$ ．
Have mercy upon，énetco．
He，autós．
Heal，$\theta \in \rho a \pi \epsilon i \omega$ ．
Hear，d．кov́w．
Heart，карঠía．
Heaven，oúpavós．
Herself（intensive），feminine of autós．
Herself（reflexive），feminine of éautoù．
Figh priest，ápxıepeis．
Himself（intensive），aúrós．
Himself（reflexive），éautoû．
Holy，äpıos．
Honor（verb），$\tau \iota \mu$ á $\omega$ ．
Hope（noun），Eौतis．

Hour， $\begin{gathered}\text { éa．} \\ \text { a }\end{gathered}$
House，oikоs，oiкia．
How？，तิิs．
I，èүч．

Immediately，$\epsilon \dot{j} \theta \in \omega s, ~ \epsilon \dot{v} \theta \dot{\prime} s$.
In，$\epsilon \nu$ with dat．
In behalf of，$\dot{v} \pi \in \neq p$ with gen．
In front of，$\dot{\varepsilon} \nu \dot{\omega} \pi\llcorner o v$ ．
In order that，zua，ö $\pi \omega \omega$ ．
In order that not，iva $\mu \eta, \mu \eta$ ．
In the presence of，$\pi$ a $\rho \rho^{\prime}$ with

Instead of，àvi with gen．
Interrogate，è $\pi \in \rho \omega \tau \dot{\alpha} \omega$ ．
Into，$\epsilon$ is with acc．
It，neuter of austós（also oft－ en other genders）．
It is lawful，${ }_{\xi} \xi \in \sigma \tau t(\nu)$ ．
Itself（intensive），neuter of aútos（also often other gen－ ders）．
Itself（reflexive），neuter of tautô（also often other genders）．

James，＇Iáк $\alpha \beta$ ßos．
Jesus，＇Inбoûs．
Jew，＇Ioviaios．
Joy，харá．
Judge，крivu．
Judgment，kpiass．
Just as，kad＇ss，$\omega \sigma \pi \in \rho$ ．

Marvel， ，aupáfo．
Mercy，have－upon，enetu．

Messiah，Xplatós．
Miracle，fiviams．
Mountain，opos．
More（adj．），$\pi \lambda \epsilon i \omega \nu$ ．
More（adv．），$\mu \mathrm{â} \lambda \lambda o \nu$.
Mother，$\mu \dot{\eta} \tau \eta \rho$ ．
Mouth，otó $\mu$ ．
Much，$\pi$ ohús．
Multitude，$\pi \lambda \hat{\eta} \theta o s$, öx $\lambda o s$.
My，$\ell$ но́s．
Myself（reflexive），épautoû．
Mystery，$\mu \nu \sigma \tau \dot{\eta} \rho \omega \nu$.

Name，ö уоца．
Nation，ëvos．
Near（adv．），é $\gamma \gamma \dot{\prime}$ śs．

Necessary，it is，$\delta \in$ i．
Neither ．．．．nor，oiot ．．．．

．．．oütc．

No longer，oúkét $\iota, \mu \eta \kappa \in \in \tau L$ ．
No one，nothing，oúdeis，$\mu \eta$－ $\delta$ eis．
Not，oi，$\mu \dot{\eta}$ ．
Not even，oí $\delta \dot{\epsilon}, \mu \eta \delta \delta$ ．
Not yet，ob $\pi \omega$ ．
Now，vûu．
On，è $\pi i$ with gen．
On account of，ded with ace．
On the basis of，$\dot{\varepsilon} \pi \boldsymbol{f}$ with dat．
On the one hand ．．．．on the other，$\mu \dot{\epsilon} \nu$ ．．．$\delta \dot{\varepsilon}$ ．
One，tis．
One another，$\dot{a} \lambda \lambda \dot{\eta} \lambda \omega \nu$ ．
One＇s own，पסlos．
Only（adj．），بóvos．
Only（adv．），，póvov．
Open，àvoír $\omega$ ．
Or，苑．
Other，ä $\lambda \lambda$ доs， $\begin{gathered}\text { ë } \tau \epsilon \rho o s . ~\end{gathered}$
Ought，ò óєi $\lambda \omega$ ．
Our，$\dot{\eta} \mu \dot{\epsilon} \tau \in \rho o s$.
Out of，$\epsilon_{\kappa}$ with gen．

Over， $\begin{aligned} & \pi i \\ & i \\ & \text { with gen．}\end{aligned}$
Owe，$\delta ф \epsilon i \lambda \omega$ ．
Own，one＇s，ìioos．
Parable，$\pi a p a \beta o \lambda \dot{\eta}$ ．
Pay（verb），á $\pi 0 \delta i \delta \omega \mu \mu$.
Peace，єipiju．
People，$\lambda$ aós．
Perish，middle of ámó入入ugl．

Permit，d́фín $\mu$ ．
Persecute，$\delta \iota \dot{\omega} \kappa \omega$ ．
Persuade，$\pi \in \dot{\epsilon} \theta \omega$ ．
Pharisee，Фaploaîos．
Piece of bread，ăpтos．
Pity，$\lambda \lambda \epsilon \epsilon \omega$ ．
Place（noun），tótos．
Place（verb），$\tau i \theta \eta \mu$ ．
Power，סuvaus．

Preach，кnpúrow；preach the gospel，$\epsilon \dot{d} a \gamma \gamma \epsilon \lambda i\} \omega$ ．
Prepare，éтoцдás $\omega$ ．
Priest，iє $\rho$ és．
Prison，$\phi \nu \lambda a k \dot{\eta}$ ．
Proclaim，кпрívoш．
Promise，玄 $\pi a \gamma \gamma \in \lambda i a$ ．
Prophet，$\pi \rho \circ \phi \dot{\eta} \tau \eta s$.
Pure，кatapós．
Pursue，оьөкш．
Put，$\tau i \theta \eta \mu$, ，$\beta a \lambda \lambda \omega$ ．
Put upon，é $\pi \iota \tau i \theta \eta \mu$ ．
Question（verb），é $\pi \in \rho \omega \tau \mathfrak{a} \omega$ ．
Race，$\gamma^{\text {évos．}}$
Raise up，é $\gamma \epsilon i \rho \omega$ ．
Rather，$\mu a ̈ \lambda \lambda o y$.
Receive， $\bar{\delta} \chi \chi о \mu a l, \pi а \rho а \lambda а \mu-$
$\beta \dot{\alpha} \nu \omega, \lambda a \mu \beta \dot{\partial} \nu \alpha$ ．
Receive one＇s sight，à al－ $\beta \lambda \varepsilon ́ \pi \omega$.
Rejoice，xal $\rho \omega$ ．
Release，á $\pi o \lambda j \dot{\omega} \omega$ ．

Remain, $\mu \in \nu \omega$.
Remaining, $\lambda$ дıтbs.
Repent, $\mu \epsilon \tau \alpha \nu=\dot{\epsilon} \omega$.
Rest, the, see under Xoirts.
Retura, imoot $\rho \in \neq \omega$.
Righteous, סíkatos.
Righteousness, סıkalooívn.
Rise, $\dot{\alpha} \nu i \sigma \tau \eta \mu$ (in the intransitive tenses and in the mid-
dle), passive of éyeipa.
Road, ó ós.
Rule, ă $\rho \chi \omega$.
Ruler, á $\rho \chi \omega \nu$.
Sabbath, odßßarov.
Saint, ar $\gamma$ cos.
Salvation, owimpia.
Same, autds.

Save, $\sigma \dot{u} \zeta \omega$.
Say, $\lambda \in \hat{\gamma} \gamma \omega, \phi \eta \mu \mathrm{L}$.
Scribe, $\gamma \rho a \mu \mu a \tau \epsilon / s$.
Scripture, $\gamma \rho a \phi \dot{\eta}$.
Sea, $8 \dot{\alpha} \lambda a \sigma \sigma a$.
See, $\beta \lambda \epsilon \in \pi \omega$, d $\rho \dot{a} \omega$.
Seek, $\zeta \eta \tau \in \omega$.
Seem, докєш.
Send, $\pi \epsilon \mu \pi \omega$, á $\pi 0 \sigma \tau \epsilon \lambda \omega$.
Servant, סoỉhos.
She, feminine of autós.
Show, $\delta \epsilon i x \gamma \cup \mu, \delta \eta \lambda o ́ \omega$.
Sign, $\sigma \eta \mu \in \hat{i} 0 \nu$.
Similar, durotos.
Simon, $\Sigma$ i $\mu \omega \nu$.
Sin (noun), d $\mu a \rho \tau l a$.

Sin (verb), à $\mu a p \tau a \nu \omega$.
Sinner, à $\mu a \rho \tau \omega \lambda$ о́s.

Slave, $\delta$ oûlos.
Small, $\mu \iota к \rho b_{s}$
So, oütcus.
So that, \#̈ate.
Soldier, $\sigma \tau p a \tau \iota \dot{\omega} \tau \eta$.
Sorne one, tis.
Something, neuter of $\boldsymbol{\tau} / \mathrm{s}$.
Son, viós.
Soul, $\psi v \chi \dot{\eta}$.
Sow, $\sigma \pi \epsilon i \rho \omega$.
Speak, $\lambda a \lambda \epsilon \omega$.
Spirit, т $\tau \in \mathbb{U} \mu a$.
Stadium, $\sigma \tau$ dórov.
Stand, iornu (in the in transitive tenses).
Still, ETr.
Stone, $\lambda i$ Oos.
Straightway, єúgéns, eùdus.
Stronger, l $\sigma \chi \cup \rho b \tau \epsilon \rho o s$.
Suffer, $\pi \dot{d} \sigma \chi \omega$.
Sufficient, ixavós.

Take, $\lambda a \mu \beta \& \nu \omega$.
Take along, $\pi a \rho a \lambda \alpha \mu \beta a \nu \omega$.
Take away, alpw.
Take up, alow, dขa入адßáv.
Teach, $\delta \iota \delta \dot{a} \sigma k w$.
Teacher, $\delta \iota \delta a ́ \sigma к a \lambda o s$.
Temple, lepov (the whole sacred precinct), vabs (the temple building itself).

Tempt，$\pi \in \iota \_\dot{\alpha} \zeta \omega$.
Than，多．
Thanks，give，èj犭apıनтécu．
That（conj．）， $\begin{gathered}\text { öt } \\ \text { ．}\end{gathered}$
That（demonstrative），èreí－ vos．
The，$\delta$ ．
Then，róte．
There，èeci．
Therefore，ouv．
Think，סoкé $\omega$ ．
This，oîtos．
Thou，$\sigma \dot{0}$ ．
Three，$\tau \rho \epsilon i s$.
Through，סıá with gen．
Throughout，kaтd with acc．
Throw，$\beta$ àd $\lambda \omega$ ．
Throw out，$\dot{\epsilon} \kappa \beta \dot{\alpha} \lambda \lambda \omega$ ．
Thus，oütus．
Thy，oós．
Thyself（reflexive），$\sigma \epsilon a u \tau 0 \hat{v}$ ．
Time，кalpós（appointed Which（relative），ofs． time），रpóvos＇（period of Which？，tis． time）．
To，$\pi p o ́ s$ with acc．，$\dot{\varepsilon}^{2} \pi i$ with acc．；indirect object，dat． without prep．
Together，gather，ovvá $\gamma \omega$ ．
Tomb，$\mu \nu \eta \mu \hat{i} 0 \nu$ ．
True，à $\lambda \eta \theta_{\eta}^{\prime} s$ ．
Truth，à $\lambda \dot{\eta} \theta \in \mathrm{ec} a$ ．
Turn to，turn， $\begin{gathered}\pi เ \sigma \tau \rho \dot{t} \phi \omega .\end{gathered}$
Two，$\delta$ úo．

Under，únó with acc．
Unless，$\epsilon i \frac{\eta}{\eta}, \dot{\epsilon} \dot{a} \nu \mu \dot{\eta}$ ．
Until，${ }^{\text {ct }} \omega$ ．
Unto，$\pi \rho \rho^{\prime} s$ with acc．
Up to，éms with gen．
Volue，$\tau \iota \mu \alpha \omega$ ．
Village，к凶u
Voice，$\phi \omega \nu \dot{\eta}$ ．
Walk，$\pi \epsilon \rho \iota \pi a \tau \epsilon \omega$ ．
Water，ťó $\omega \rho$ ．
Way，ò óós．
Well，кал⿳亠二口今．
What？，neuter of $\tau l s$ ．
What sort of ？，toios．
Whatever，neuter of oactss．
When（relative），ö $\tau \epsilon$ ．
When？，$\pi \dot{\prime} \tau \epsilon$ ．
Whenever，ö $\quad$ av．
Where（relative），zaov．
Where？，$\pi 00$.

Whichever，örtus．
While，écus．
Who（relative），os．
Who？，tis．
Whoever，öotis．
Whole，8 ${ }^{2}$ os．
Why，$\tau$ ．
Wicked，пои $\quad$ pós．
Will，$\theta \in \lambda \eta \mu a$ ．
Willing，$a m, \theta \in \lambda \omega$ ．

Wisdom, бoфia.
Wish, $\theta \in \lambda \omega$.
With, $\mu \in T \dot{d}$ with gen., ouv with dat.
Witness (verb), $\mu a \rho \tau \nu p \in \in$.
Witness (noun), нартирía.
Woman, yuvin.
Wonder, wonder at, $\theta \alpha u \mu a ́ \zeta \omega$.
Word, $\lambda o ́ \gamma o s, ~ \stackrel{\text { ĝpa. }}{ }$

World, кbбرos.
Work, $\tilde{\epsilon}^{\rho} \rho \gamma \underset{ }{ } \boldsymbol{\nu}$.
Worship, $\pi$ робкиขtш.
Write, $\gamma \rho \mathrm{a} \phi \omega$.
Writing, $\gamma \rho a \phi \eta$.
Year, ëros.
Yet, étl.
Your, ìm $\epsilon \tau \in \rho$ оs.

## INDEX

(Figures refer to sections, except when preceded by p. or pp.)

Abstract nouns, with the article, 78 (footnote 2).
Accent: pronunciation, 9; general rules, 11; rule of verb secent, 13; rule of soun acceat, 14; acoent in gen. and dat. of 1st and 2nd decl., 40, 58; in gen. plur. of lst decl. nouns, 51 ; in anclities and words coming before enclitics, 92f.; in compound verbs, 132; in ${ }^{6} \sigma \tau l(\nu)$, 134; in monosyllables of 3rd deol., 221; in gen. plur. fem. of participles, 228; in mor. pass. part., 263; in contract syllsbles, 316 (iii); in gen, sing. and plur. of nouns in -ts, - $e \omega s, 350$; in $2 n d$ sor. imper., 419; in perf. act. infin., 427; in peri. middle and pass. infin. and pert., $443 f$.; in pres. infn. of $\delta i \delta \omega \mu l$, 499; in pres. part. of $\delta i \delta \omega \mu \mu, 502$; in $\ddot{\omega} \sigma \tau \epsilon$ etc., 535.
Accusalive case: for direct object, 34; after prepositions expressing motion toward, 82; as subj. of infin., 304, 306, 534; acc. of extent of space and time, 382; of specification, 470.
Active voice: conjugation, gee under Verba; use, 17.
Adjectives: declension summarized, 568-575; declension of adjs. in $-0 s,-\eta(a),-0 \nu, b l f$; of adjs. in $-\eta s,-\epsilon 5,360-362$; of irregular
adjs., 365-370; of $\mu \epsilon i \zeta \omega \nu$, atc., 459-461; of adjs. of two terminations, 481; attributive and predicate uses of edje., 68-74, 381; substantive use, 75; comparison, 456-461; poseessive adjs., 473f. Adverbs, 463-465.
A solic dinlects, p. 1.
Agreement: of verb with subj., 29, 145; of adj. with noun, 86; of pronoun with antecedent, 97 (3), 397, 399, 454 (footnote 2).

Alexander the Great, pp. If.
Alphatel, 1 l .
Antepenull, definition, 10.
Aorist tonse: formation and conjugation, see under Verbs; distinction between first and second sor., 167; use of eor. tense in indic., 122, 168-170; in participles, 254,520 ; in subj.. 283; in infin., 299; in imperative, 420. Apostolic Fathers, pp. $3 f$.
Aramaic language, p. 4.
Armstrong. W. P., p. x.
Article: declension, 63-65, 587use: in general, 26,67 ; with attributive adj., 68-70, 72; with Otós, 77; in connection with oútos and ékềlos, 104; with participle, $234 f$. 255 ; with infin., 301-305,468; with proper names, 309; with prepositional phrases, 376f., 380f.; followed by a nown in the genitive, 378f., 381;
as pronoun before $\mu \hat{t} \nu$ and $\delta \hat{e}$ 518f., 522 (footnote)- omitted: with kóv $\mu 0 \mathrm{~s}, 209$ (footnote 1); in phreses such as $\epsilon \nu \nu u k T l, 224$ (footnote 1), $̇ \nu$ oapki, 240 (footnote 1), and d $\pi^{\prime} \dot{\alpha} \rho \chi \hat{\eta}^{\prime} s, 537$ (footnote 7); omitted with $\theta \in$ d $_{s,} \pi \nu E \hat{y} \mu a$, кóofos, sad the like, 311.
Articular Infinitive, 301-305, 468. Alhens, pp. 1-3.
Altic Greek, pp. 1-5.
Altraction, of case of rel. pron. to that of its antecedent, 398.
Atiributive use: of adjectives, 68$70,72,74,381$; of participles, 234, 255, 264; of prepositional phrases, 376, 380f.
Augment, 124-126, 172, 245; of compound verbe, 131; in 2nd z.or., 191, 251.

Blass-Debrunner, p. x.
Broathings, 5.
Button, E. D., p. x.
Capps, Edward, p. x.
Case endings, 33; in 2nd decl., 33; in 1st decl., 40; in 3 rd decl., 212-217, 350 .
Cases, 30; with various verbs, 119.
Classical Greeth, pp. vii, x, 1.
Comparison, of adje., 456-461; expressed by gen. or by th, 462.
Compound verbs, 117.
Conditional relative clauses, 400 .
Conditions, 288-290; contrary to fact, 551.
Conjunctions: uses of kai and oúdé, 146-148.
Contract varbs: pres. syatem, 317-

320, 590-592; priacipal parts, 321, 438, 448 .
Contrachion, rules, 314-316.
Dative case: for indirect object, etc., 36; writh prepositions expressing reat in a place, 82; with a тoкplyopat, 108; of means or instrument, 115; with $\pi \iota \sigma \tau \epsilon i \omega$, 184; of respect, 489; of time, 471.
Declensions, 25.
Deliberative questions, 394.
Demonstrative pronouns: declension, 1024.; use, 104, 106.
Demosthenes, pp. 1, 4 .
Deponent verbs, 116, 144, 207f.;
varbs deponent in some tenses but not in others, 164; fut. of àkoúm, 554 (footnote 1).
Diolects, pp. 13.
Diphthongs, 4.
Direct discourse, sometimes introduced by 8 ri, 522 (footnote 5).

Doric dieleats, p. 1.
Double negative, p. 178 (footnote).
Elision, 97 (footnote 1); 120 (footnote 1 in Greek exercise).
Enclitics, 921., 98.
Exercises, remarks on, p. ix.
Exhoriing, etc., construction after words denoting, 477.
Ertent of space and time, expressed by acc., 382.

Fearing, construction aiter words denoting, 475.
Feminine nouns in as of 2nd decl., 60.
First Aorist: formation and con-
jugation, see under Verbs; 1st aor. endings on 2nd aor. stems, 186 (footnote 1), 424 (footnote 1), 521 .

Firal Declension: summarized, 555550; nouns in -a and $-\eta, 47-58$; nouns in - $\eta \mathrm{s}, 79$.
Future conditions, 288-290.
Future terse: conjugation, see under Verbs.

Gender, 28; of 2nd-decl. nouns in -0s, 28, 60; of 1st-decl. nouns in $-a$ and $-\eta$, 47, in $-\eta 5,78$; of 3 rd -decl. nouns, 218-220; of 3rd-decl. nouns in $-\mu a, 222$, in -cs, $-\epsilon \omega 5$, 351 , in -os, ous, s54, in - $e v s,-E \omega \mathrm{~S}, 357$.
Genitive case: expressing possersion, etc., 35; with prepositions expressing separation, 82; with $\dot{u} \pi \dot{\delta}$ expressing egent, 114f.;
 translation of gea. into English, 120 (footnote 1 in English exercige); gen. absolute, 266; gen. after the article, $378 f$., 381 ; gen. in the predicate aiter el $\mu$ i, p. 175 (footnote l); of comparison, 462; with adverbs of place, 466 ; gen. of time, 467; gen. of articular infin. expressing purpose, 468.
Ginn and Company, 314 (footnote 1).

Grimm-Thayor, p. x.
Hebrew language, pp. 4-6.
Hebrenos, Epistle to the, p. 6.
Hortatory subjunctive, 285.
Hozoard, W. F., 186 (footzote 1), p. x.

Huddilaton, J. H., p. x.

Illustrations, remarks on, pp. 7 f .
Imperative mood: formation and conjugation, see under Verbs; use, $420-422$.
Imperfect tense: formation and conjugation, see under Verbs; use, 122.
Indefinite pronoun: declension, 388f., 584 ; use, 390.
Indǐect discourse, 287, 306-308.

ISEN $\square-57910-1 B O-1$

[^0]:    ${ }^{1} \lambda \hat{d} \omega$ sometinses means I destroy．

[^1]:    1 Abstract nouns, and nouns such as $\zeta \omega \dot{m}$, often have the article Where it is omitted in English.

[^2]:    ${ }^{1}$ Care should be taken to distinguish the two ways in which the English word to is used in this sentence.

[^3]:    ${ }^{1}$ The final vowel of prepasitions is frequently elided before words that begin with a vowel．The elision is marked by an apostrophe．

[^4]:    ${ }^{1}$ Before the rough breathing, the $\pi$ of $\alpha \pi$ ' becomes $\phi$.
    ${ }^{2}$ Before the rough breathing. $\tau$ of $\mu \epsilon \sigma^{\prime}$ becomes $\theta$.

[^5]:    ${ }^{1}$ An alternative form for $\lambda 6 y$ is $\lambda U \in l$. But the former seems to be preferred in the New Testament.

[^6]:    id viòs rô̂ $\dot{\alpha} \nu \theta \rho \dot{\omega} \pi \sigma$, the Son of Man. This is the form in which the phrase occura in the gospels as a self-designation of Jesus.

[^7]:    ${ }^{1}$ With ă $\rho \chi o \mu a l, I$ begin, the present infinitive, not the aorist infinitive, should be used.

[^8]:    ${ }^{1}$ What noun is naturally to be supplied with $\tau \hat{\eta} \mu \mathrm{n} \rho \bar{q}$ ?

[^9]:    ${ }^{1}$ What construction has been used after likavbs to express the idea sufficient (or worthy) that they should. . . . . . I

[^10]:    ${ }^{1}$ raúoual (middle), I cease.
    z'I wános, ov, ó, John.
